Academies The Electrification of Russia, 1880–1926 is the first full account of the widespread adoption of electricity in Russia, from the beginning in the 1880s to its early years as a state technology under Soviet rule. Jonathan Coopersmith has mined the archives for both the tsarist and the Soviet periods to examine a crucial element in the modernization of Russia. Coopersmith shows how the	Communist Party forged an alliance with engineers to harness the socially transformative power of this science-based enterprise. A centralized plan of electrification triumphed, to the benefit of the Communist Party and the detriment of local governments and the electrical engineers. Coopersmith’s narrative of how this came to be elucidates the deep-seated and chronic conflict	between the utopianism of Soviet ideology and the reality of Soviet politics and economics. <u>The Story of</u> <u>Philosophy</u> University of Wales Press Under the influence of mounting foreign competition in the late- Victorian and Edwardian periods, many Britons sought to bolster England’s world position by reinforcing the unity of the Empire. For the most part their effort were channelled
---	--	---

into an attempt to construct a formal political union or federation of Britain's overseas dominions. However, when the so-called Imperial Federation Movement failed to produce a viable constitutional solution the problem of unity a number of people began to search for an alternative, non-political approach. In this connection a campaign was mounted during the

first two decades of the twentieth century that came to emphasise the informal, spiritual ties which supposedly bound the Empire together. This title, first published in 1987, brings to light the assumptions, aspirations and schemes of those predominantly middle-class figures who orchestrated the Imperial Studies Movement at the turn of the twentieth-century. This title will be of

interest to students of history and education. *The Recognized Book of Authentic Information on Hawaii, Combined with Thrum's Hawaiian Annual and Standard Guide* Univ of California Press
A new edition of Pound's groundbreaking shorter poems. If the invention of literary modernism is usually attributed to James Joyce, T. S. Eliot and Ezra Pound, it was Pound

alone who provided (in Hugh Kenner's words) "the synergetic presence") to convert individual experiment into an international movement. In 1926 Pound carefully sculpted his body of shorter poems into a definitive collection which would best show the concentration of force, the economy of means, and the habit of analysis that were, to him, the hallmarks of the new style. This

collection, where Pound presented himself in a variety of characters or "masks," was called *Personae*. In 1926, *Personae's* publication gave solidity to a movement today the work stands as one of the classic texts of the twentieth century. Pound scholars Lea Baechler (of Columbia) and A. Walton Litz (Holmes Professor of English Literature at Princeton) have prepared

a corrected text and supplied an informative "Note on the Text" explaining both Pound's original criteria for his selection and the volume's subsequent history.

Routledge
In this thoroughly innovative work, Hans Ulrich Gumbrecht evokes the year 1926 through explorations of such things as bars,

boxing, movie palaces, hunger artists, airplanes, hair gel, bullfighting, film stardom and dance crazes. From the vantage points of Berlin, Buenos Aires, and New York, the reader is allowed multiple itineraries, ultimately becoming immersed in the activities, entertainments, and thought patterns of the citizens of 1926.	Forgotten Books 29 CFR, Part 1926 Safety and Health Regulations for Construction Independently Published <i>The Weimar Republic Sourcebook</i> Routledge Levy-Bruhl speculates about what he posited as the two basic mind-sets of mankind; "primitive" and "Western." The primitive mind does not differentiate the supernatural from reality, but rather uses "mystical	participation" to manipulate the world. Moreover, the primitive mind doesn't address contradictions. The Western mind, by contrast, uses speculation and logic. 'How Natives Think' IS an accurate and valuable contribution to anthropology. <u>In 1926</u> Independently Published Reproduces (translated into English) contemporary documents or writings with an introduction to each section. <i>Statistics</i>

major forces in the subculture of science fiction. It analyses the history of the field and the related developments, for instance the Bomb, that have shaped the literature. It examines the complex of activity and background tradition, the body of accepted beliefs and conventions, and the ethics and values of the world of science fiction.

 Harvard University Press
 The object of this book is to provide with a popular and a comprehensive edition of Sappho, containing all that is so far known of her unique personality and her incompatible poems Little remains today of the writings of the archaic Greek poet Sappho (fl.

late 7th and early 6th centuries B.C.E.), whose work is said to have filled nine papyrus rolls in the great library at Alexandria some 500 years after her death. The surviving texts consist of a lamentably small and fragmented body of lyric poetry--among them, poems of invocation, desire, spite, celebration, resignation, and remembrance--that nevertheless enables us to hear the living voice of the

poet Plato called the tenth Muse. Sappho is rated as the supreme poetess and is regarded in the same vein as Shakespeare and Homer the supreme poets.	Harlow Wm. li. Some Ecological Notes on the Local Distribution of Ribes in the Towns of Newmarket, Hampton and Stratham, N. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Conn's study

includes

familiar places

like the

Metropolitan

Museum of Art

and the

Academy of

Natural

Sciences, but

he also draws

attention to

forgotten

ones, like the

Philadelphia

Commercial

Museum, once

the repository

for objects

from many

turn-of-the-

century

world's fairs.

What emerges

from Conn's

analysis is

that museums

of all kinds

shared a

belief that

knowledge

resided in the

objects

themselves.

Using what

Conn has

termed

"object-based

epistemology,

" museums of

the late

nineteenth

century were

on the cutting

edge of

American

intellectual

life. By the

first quarter of

the twentieth

century,

however,

museums had

largely been

replaced by

research-

oriented

universities as

places where

new

knowledge

was produced.

According to

Conn, not only

did this mean

a change in

the way

knowledge

was

conceived, but

also, and

perhaps more

importantly,

who would have access to it.
