What's the problem with literacy at college? How might everyday literacy be harnessed for educational ends? Based on the first major study of literacy practices in colleges in the UK, this book explores the reading and writing associated with learning subjects across the college curriculum. It investigates literacy practices in which students engage outside of college, and teaching and learning strategies through which these can help support the curriculum. With insightful analyses of innovative practices, it considers ways of changing teaching practices to

enable students to draw upon their full potential. Recent research work has challenged the myth of individual student deficit, arguing cogently that people have 'funds of knowledge' from diverse and vibrant cultural roots, and that these have been misguidedly disqualified by the education system. It has claimed that different 'ways with words' can provide valuable resources for learning. However, the empirical exploration of this claim has lagged far behind the theoretical debate. *Improving Learning in College* resolves this by showing the integrity and richness of the literacy practices of a significant population, not previously the focus of such research: those who take vocational and academic college courses in colleges. It addresses an issue which has not until now been developed within this research tradition: that of how these practices can not only be valued and validated, but mobilised and harnessed to enhance learning in educational settings. This book will interest all teachers, teacher-educators and researchers concerned with post-compulsory education and vocational education in compulsory schooling.

Reflective Playwork provides an introduction to playwork values, principles and practice for all who work with children. It recognizes that play is a need for all, and seeks to encourage the provision of time and space for all children to freely enjoy its benefits. In a world where we are ever seeking to protect our children and to encourage their educational progress, it is often overlooked that the need for play is as important as the need for food and sleep. Play deprivation can result in a child having less energy for education, a lower ability to use creative and imaginative ways of problem solving, a poorer self image, being

less able to cope with the stresses and strains of life and sometimes being more likely to look for 'kicks' in anti-social ways. This book encourages a greater understanding of play from the child's perspective, and suggests ways in which adults can support and enhance play. It covers: □ Playwork principles and practice □ Play theory □ The child □ Playwork values and practice □ Playwork and society □ Playwork education, training and continuing professional development □ Quality and management of playwork It is written for those who are instinctively, or otherwise, looking to promote and celebrate the need for play in all of their work with children, and who see their role as supportive rather than supervisory. Further, it is for those who recognize that the rewards of working with children come as a privilege. *Reflective Playwork* is for the playworker and for all others who work with children - such as childcare practitioners, teaching assistants, health workers, social workers, teachers and those in management - who are looking to understand and adopt, at appropriate times, the values and principles in their own settings.
