On the Mathematical Foundations of Theoretical Statistics

...Foundations of

mathematics is the study of the philosophical and logical and/or algorithmic

basis of mathematics, or,

in a broader sense, the

mathematical investigation of what underlies the philosophical theories concerning the nature of mathematics. In this latter sense, the distinction between foundations of mathematics and philosophy of mathematics turns out to be quite vague. Foundations of mathematics can be conceived as the study of the basic mathematical concepts (set, function, geometriFoundations of mathematics - WikipediaTheoretical and
