 "Renowned luthier John S. Bogdanovich crafted the project shown inside for his own personal use. The design he presents is simple but elegant and is a composite of ideas borrowed from several different guitars admired for their tonal qualities and aesthetic details. In close-up photographs Bogdanovich invites you to stand by his side and follow the entire process from start to finish. He offers guidance through every step, and explains every decision, from the arrangement of his workbench and the selection of the wood, to tuning and setting up the instrument. Bogdanovich also provides a choice of alternative methods and materials -- to help you find your own style of working, and to enable you to add your personal touches to your project. By the time your instrument is finished, you'll have acquired a world of knowledge, from the difference between quartersawn and flat-sawn wood to the pros and cons of lacquer versus French polish. You'll have mastered dozens of skills, including bending and aminating wood and cutting and seating wire frets. Best of all, you'll have a beautiful instrument, designed to your own specifications, that will give pleasure to everyone who hears it." -- Book jacket.

 "This is a very comprehensive text that combines theory, harmony and voicing material with emphasis placed on voice leading. Although this book's primary focus is on four-note chord voicings on the middle strings of the guitar, much of the knowledge conveyed here can be appreciated and used by all jazz musicians, not only guitarists. Topics covered include: Tensions, Voice Leading Chord Scales, Enharmonic Chordal Substitutions, Fourth Voicings, Chromatic Guide Lines, Triad Over Bass Voicings,

and much more! The best part of this book, however, is the unique and practical way the author takes modern harmonic concepts and shows you how to apply them in real music situations! Written for the intermediate to advanced music theory enthusiast who wishes to master this facet of music."

Le sei corde magiche. Appendice al metodo: la chitarra ritmica Hal Leonard Corporation

This booklet was written by the first American string teacher to observe and study the Suzuki Method® in Japan, Mr. John Kendall.

Kendall's gift is in large part his ability to bring the concepts and practicalities of the Suzuki Method® to the doorstep of the American private and classroom teacher in language that can be readily understood. The author takes a stab at clearing up the misconceptions sometimes applied to Suzuki, among them: Teaching "en masse," playing with recordings, and a magic formula. The booklet provides a succinct set of ten key factors in the Talent Education process: * begin at an early age * regular listening * lessons are private * parents help with practice * all music is memorized * note reading is introduced later * all students follow the same sequence of pieces * carefully selected music * cooperation, not competition, is the motivation * flexibility and freedom of movement. "...some totality of understanding -- some vision of the basic concepts -- is essential for an intelligent application of the ideas." Thus John Kendall sums up his brilliant analysis of the Talent Education process, always leaving the door open for the American teacher to tailor the basic philosophy to his or her unique teaching situation.
