 NEW YORK TIMES BESTSELLER Edward Snowden, the man who risked everything to expose the US government's system of mass surveillance, reveals for the first time the story of his life, including how he helped

to build that system and what motivated him to try to bring it down. In 2013, twenty-nine-year-old Edward Snowden shocked the world when he broke with the American intelligence establishment and revealed that the United States government was secretly pursuing the means to collect every single phone call, text message, and email. The result would be an unprecedented system of mass surveillance with the ability to pry into the private lives of every person on earth. Six years later, Snowden reveals for the very first time how he helped to build this system and why he was moved to expose it. Spanning the bucolic Beltway suburbs of his childhood and the clandestine CIA and NSA postings of his adulthood, *Permanent Record* is the extraordinary account of a bright young

man who grew up online—a man who became a spy, a whistleblower, and, in exile, the Internet’s conscience. Written with wit, grace, passion, and an unflinching candor, *Permanent Record* is a crucial memoir of our digital age and destined to be a classic.

'Part autobiography, part heartfelt plea to change the way we look at gender, *Girls will be Girls* is an excellent primer on feminist theory. Every teenage girl should be given a copy' HOT PRESS
Being a woman is, largely, about

performance - how we dress and modify our bodies, what we say, the roles we play, and how we conform to expectations. Gender stereotypes are still deeply embedded in our society, but Emer O'Toole is on a mission to re-write the old script and bend the rules of gender - and she shows how and why we should all be joining in. Exploring what it means to 'act like a girl', Emer takes us on a hilarious and thought-provoking journey through her life (including singing 'Get Your Pits Out for the Lads' on national TV after growing out her body hair). Cross-dressing, booty-shaking, sexual disasters, family dinners and full-body waxing are all lovingly dissected in search of wisdom. With game-changing ideas, academic intelligence and laugh-out-loud humour,

this book will open your mind and revolutionise the way that you think about gender.

From carefully aimed pouts and shifting blame to the threat of an all-out tantrum, this laugh-out-loud story for kids and adults focuses on the clever antics, advantage-taking, limit-testing, and childhood shenanigans of three-year-old Emmy. When Emmy spills juice and her dad's pants get "orange-hosed," she takes refuge behind Mom's knee. Expecting a reprimand, Emmy is surprised when Mom tells Dad, "Now, sweetheart, you should let it be. After all . . . she's only three." Once Emmy discovers that she's too young to be punished, she constantly wrangles her

way out of trouble by proclaiming, “I’m only three!” and pulls a handy weapon from her arsenal of manipulative maneuvers. With hilarious, rhyming text and energetic ink and watercolor illustrations that capture Emmy’s expressions, from angelic to livid, readers discover that Emmy can’t get away with her outrageous behavior forever and that her actions do eventually have consequences.

New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity’s creation and evolution—a #1 international bestseller—that explores the ways in which biology and history

have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, Sapiens integrates history and science to reconsider accepted narratives, connect past developments with contemporary

concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

[It] is liable to draw a large, bedazzled readership."—The New York Times "Marries movie noir with novelistic trickery. . . hang on tight. You'll be surprised by what horrors lurk around the bend."—USA Today "Like its train, the story blasts through the stagnation of these lives in suburban London and the reader cannot help but turn

pages.”—The Boston Globe “Gone Girl fans will devour this psychological thriller.”—People EVERY DAY THE SAME Rachel takes the same commuter train every morning and night. She's even started to feel like she knows them. Jess and Jason, she calls them. Their life--as she sees it--is perfect. Not unlike the life she recently lost. UNTIL TODAY And then she sees something shocking. It's only a minute until the train moves on, but it's enough. Now everything's changed. Unable to keep it to herself, Rachel goes to the police. But is she really as unreliable as they say? Soon she is
