Simple Salting Out Method For A simple salting out procedure for extracting DNA from human nucleated cells. ... Lewis AK, Meincke LJ, Hildebrand

CE. A rapid and simple method for the isolation of high molecular weight cellular and chromosome-specific DNA in solution without the use of organic solvents. Nucleic Acids Res. 1987 Jan 26; 15(2):859-859. A simple salting out procedure for extracting DNA from ... extracted by use of

modified salting out method. The quality and quantity of extracted DNA was measured spectrophotometrically at wave length 260nm and 280 nm. The result showed that this method produces good quality high molecular weight DNA, also it was simple, rapid, minimum cost laboratory method.

In the present study, we describe a simple, easy, and non-toxic salting-out method for DNA extraction from PETs, comparing it with a traditional phenol-chloroform method and with a commercial DNA isolation kit to demonstrate

the efficiency of this method in producing a high yield and a high quality of DNA to be used in pathology laboratories.
