MARQUES WHEELER

Information and Communication Technologies in Tourism 2015 IGI Global

This book outlines the status quo of worldwide wildlife tourism and its impacts on planning, management, knowledge, awareness, behaviour and attitudes related to wildlife encounters. It sets out to fill the considerable gaps in our knowledge on wildlife tourism, applied ecology, and environmental education, providing

comprehensive information on and an interdisciplinary approach to effective management in wildlife tourism.

Examining the intricacies, challenges, and lessons learned in a meaningful and rewarding tourism niche, this interdisciplinary book comprehensively examines the major potentials and controversies in the wildlife tourism industry. Pursuing an insightful, provocative and hands-on approach, it primarily addresses two questions: 'Can we reconcile the needs of the wildlife tourism industry, biodiversity conservation, ecological learning and

animal ethics issues?' and 'What is the Future of the Wildlife Tourism Industry?'. Though primarily intended as a research text, it also offers a valuable resource for a broad readership, which includes university and training students, researchers, scholars, tourism practitioners and professionals, planners and managers, as well as the staff of government agencies.

Academic, Industry and Government Bridges IGI Global

Research and development in agriculture is a very relevant topic in today's society, especially given the evolution of land

ownership structures and resources exploitation. These transformations have paved the way for new approaches in the allocation and management of agricultural systems. *Agricultural Management Strategies in a Changing Economy* brings together emergent research and best practices in the area of agricultural management, policy, and structures. Highlighting theoretical concepts and empirical research, this book will be an all-encompassing reference source for professionals, researchers, academicians, practitioners, and students in the field of agricultural economics and sustainable development, as well as in related disciplines.

Pace and the Search for the "Good Life" Emerald Group Publishing

This timely Research Agenda explores and proposes critical lines of research to support understanding of the conditions under which urban tourism contributes to the development of urban systems, and what can be done to create and conserve these conditions. Chapters highlight conceptual discussions, concrete case studies and policy reviews to address the issues surrounding the economic,

environmental and social impacts of tourism on cities.

Towards a Sustainable Future Channel View Publications

China's Belt and Road Initiative (BRI) has attracted growing attention from around the world since it was first announced. It is, along with the Asian Infrastructure Investment Bank (AIIB), a critical instrument for realizing what the Chinese government calls the Community of Common Destiny (CCD). The core idea presented in this volume is that the CCD represents a new paradigm for promoting regional collaboration in socio-economic development, and plays a crucial role in reshaping the international geopolitical landscape. Contributors show that the belief in common development and common security transcends differences in cultural tradition and pre-existing level of development. This belief underlies the commitments among countries and regions participating in the BRI to working closely together in pursuit of shared and sustained prosperity. The chapters are based on papers presented at 'Building the Community of Common Destiny between China and Its Neighbors: Challenges and

the Future', an international forum co-organized by the National Institute for Global Strategy of the Chinese Academy of Social Sciences and the University of International Relations (China). Thirty experts from more than twenty countries have contributed to this volume.

Travel and Tourism in the Caribbean Routledge

This comprehensive volume was put together in response to the growing amount of research on tourism in Asia and an increasing number of authors from Asian countries. It concentrates on two aspects of Asian Tourism: first, the Asian tourists themselves, and second, economic development and tourism in the Asian region. The first part of the collection focuses on three areas: the motivations of different types of Asian tourist; the characteristics and behaviour of particular Asian tourist segments; and, finally, an analysis of specific research issues. The second part of the book then goes on to explore the governance and organisation of tourism in the Asian region, and the nature of Asian growth and competitiveness as it relates to tourism. The articles in this book were originally

published in the journal *Current Issues in Tourism*.

China's Belt And Road Initiative And Building The Community Of Common Destiny Routledge

"Aftermath: Fukushima and the 3.11 Earthquake" is a comprehensive analysis of recovery and reconstruction following the triple disaster in Japan on March 11, 2011. This collection addresses the question of why, despite the relative success of network governance in brokering a response to the disaster and to reconstruction, politics failed either to prepare for the disaster or to respond adequately to it. In examining Japan's political system leading up to 3/11, *Aftermath* looks at the system of network governance that operated between various organizations and levels of government. The book scrutinizes the political influence network that united politicians and the bureaucracy with the major corporations and created a system to promote nuclear power. Through political, policy, economic and social analysis, *Aftermath* aims to contribute to the development of mechanisms and structures to minimize the impact of

disasters. (Series: Japanese Society Series) [Subject: Politics, Governance, Japanese Studies, Nuclear Studies]

Travel, Tourism, and Identity Varna University of Management

Companies and destinations in the tourism sector are confronted with increasing managerial challenges and have to deal with a competitive, turbulent, and fast-changing environment. The understanding that both tourism companies and destinations endowed with the best assets (natural and cultural) cannot survive the escalating international competition without good managerial practices, has provided significant momentum for the development of the disciplinary field of tourism management in the last three decades. This volume recognizes the relevance of travel, tourism, and tourism activities as major economic drivers in the contemporary global economy, with a specific focus on performance, strategies, and sustainability. It is the collective intellectual effort of a number of international scholars, who cultivate original research on tourism management from a variety of theoretical perspectives. Together, they outline the importance for

tourism companies and destinations to achieve and maintain a sustained competitive advantage by embracing sustainability and a Triple Bottom Line (TBL) approach to performance.

Handbook of Neoliberalism Routledge

Through expanded intelligence, the use of robotics has fundamentally transformed the business industry. Providing successful techniques in robotic design allows for increased autonomous mobility, which leads to a greater productivity and production level. *Rapid Automation: Concepts, Methodologies, Tools, and Applications* provides innovative insights into the state-of-the-art technologies in the design and development of robotics and their real-world applications in business processes. Highlighting a range of topics such as workflow automation tools, human-computer interaction, and swarm robotics, this multi-volume book is ideally designed for computer engineers, business managers, robotic developers, business and IT professionals, academicians, and researchers.

Collaboration in Tourism Businesses and Destinations BoD - Books on Demand
To maintain a healthy ecosystem for

contemporary society, and for future generations, policies must be implemented to protect the environment. This can be achieved by consistent evaluation of new initiatives and strategies. Sustainable Development: Concepts, Methodologies, Tools, and Applications is a comprehensive source of scholarly information on the latest research for sustainability concerns across a multidisciplinary perspective. Highlighting a broad range of innovative topics such as renewable energy, urban development, and green technologies, this multi-volume book is ideally designed for academics, researchers, professionals, students, and practitioners interested in the preservation of the environment. *Concepts, Methodologies, Tools, and Applications* Emerald Group Publishing

The European Journal of Tourism Research is an interdisciplinary scientific journal in the field of tourism, published by Varna University of Management, Bulgaria. Its aim is to provide a platform for discussion of theoretical and empirical problems in tourism. Publications from all fields, connected with tourism such as management, marketing, sociology,

psychology, geography, political sciences, mathematics, statistics, anthropology, culture, information technologies and others are invited. The journal is open to all researchers. Young researchers and authors from Central and Eastern Europe are encouraged to submit their contributions. Regular Articles in the European Journal of Tourism Research should normally be between 4 000 and 20 000 words. Major research articles of between 10 000 and 20 000 are highly welcome. Longer or shorter papers will also be considered. The journal publishes also Research Notes of 1 500 – 2 000 words. Submitted papers must combine theoretical concepts with practical applications or empirical testing. The European Journal of Tourism Research includes also the following sections: Book Reviews, announcements for Conferences and Seminars, abstracts of successfully defended Doctoral Dissertations in Tourism, case studies of Tourism Best Practices. The European Journal of Tourism Research is published in three Volumes per year. The full text of the European Journal of Tourism Research is available in the following databases: EBSCO

Hospitality and Tourism CompleteCABI Leisure, Recreation and TourismProQuest Research Library Individual articles can be rented via journal's page at DeepDyve. The journal is indexed in Scopus and Thomson Reuters' Emerging Sources Citation Index. The editorial team welcomes your submissions to the European Journal of Tourism Research. Volume 14, Year: 2016 Routledge

This text provides an innovative approach to the pedagogy of contemporary planning processes within different cultural contexts globally. It adopts an innovative multi-disciplinary social science approach and through the inclusion of international case studies, considers the extent to which intelligent design has enabled the needs of disabled residents and visitors to have universal access to social spaces and facilities. In incorporating the consideration into the fabric of the book it will encourage the mainstreaming of universal design and accessible tourism, as keystones of planning processes within the 21st.

The Routledge Handbook of Tourism Impacts Routledge

The papers presented in this volume

advance the state-of-the-art research on big data and analytics, social media, electronic marketing, mobile computing and recommender systems, mobile sensors and geosocial services, augmented reality, wearable computing, smart tourism, electronic distribution for tourism and hospitality products and services, e-learning, responsive web design and management, and eTourism for development. This book covers the most significant areas contributed by prominent scholars from around the world and is suitable for both academics and practitioners who are interested in the latest developments in e-Tourism.

Management of Travel Destinations

Edward Elgar Publishing

The papers in this volume study how all language levels are constantly involved in promoting insignificant places as desirable tourist destinations. Drawing on different communicative practices from various cultures, the case studies show that language use and the concept of the 'tourist gaze' are in a permanent strategic interplay.

Role and Impact of Tourism in Peacebuilding and Conflict

Transformation Academic Conferences and publishing limited
Transport and sustainability are intrinsically linked. This book examines the links between transport, tourism, and sustainability by means of a series of large case studies covering several countries. *ICTR 2018 International Conference on Tourism Research* IGI Global
Heritage Conservation in Postcolonial India seeks to position the conservation profession within historical, theoretical, and methodological frames to demonstrate how the field has evolved in the postcolonial decades and follow its various trajectories in research, education, advocacy, and practice. Split into four sections, this book covers important themes of institutional and programmatic developments in the field of conservation; critical and contemporary challenges facing the profession; emerging trends in practice that seek to address contemporary challenges; and sustainable solutions to conservation issues. The cases featured within the book elucidate the evolution of the heritage conservation profession, clarifying the role of key players at the central, state, and local

level, and considering intangible, minority, colonial, modern, and vernacular heritages among others. This book also showcases unique strands of conservation practice in the postcolonial decades to demonstrate the range, scope, and multiple avenues of development in the last seven decades. An ideal read for those interested in architecture, planning, historic preservation, urban studies, and South Asian studies.

International Perspectives Bloomsbury Publishing

Neoliberalism is easily one of the most powerful discourses to emerge within the social sciences in the last two decades, and the number of scholars who write about this dynamic and unfolding process of socio-spatial transformation is astonishing. Even more surprising though is that there has, until now, not been an attempt to provide a wide-ranging volume that engages with the multiple registers in which neoliberalism has evolved. The *Routledge Handbook of Neoliberalism* seeks to offer a comprehensive overview of the phenomenon of neoliberalism by examining the range of ways that it has been theorized, promoted, critiqued, and

put into practice in a variety of geographical locations and institutional frameworks. With contributions from over 50 leading authors working at institutions around the world the volumes seven sections will offer a systematic overview of neoliberalism's origins, political implications, social tensions, spaces, natures and environments, and aftermaths in addressing ongoing and emerging debates. The volume aims to provide the first comprehensive overview of the field and to advance the established and emergent debates in a field that has grown exponentially over the past two decades, coinciding with the meteoric rise of neoliberalism as a hegemonic ideology, state form, policy and program, and governmentality. It includes a substantive introductory chapter and will serve as an invaluable resource for undergraduates, graduate students, and professional scholars alike.

Innovative Perspectives on Tourism Discourse BRILL

Travel, Tourism and Identity addresses the psychological and social adjustments that occur when people make contact with others outside their social, cultural, or

linguistic groups. Whether such contact is the result of tourism, seeking exile, or relocating abroad, the volume's contributors demonstrate how one's identity, cultural assumptions, and worldview can be brought into question. In some cases, the traveller finds that bridging the social and cultural gap between himself and the new society is fairly easy. In other cases, the traveller discovers that reorienting himself requires absorbing a new cultural history and traditions. The contributors argue that making these adjustments will surely enhance the traveller's or tourist's experience; otherwise the traveller or tourist will be at risk of becoming a marginalized figure, one disconnected from the society that surrounds him. This latest volume in the Culture & Civilization series features a collection of essays on travel and tourism. The essays cover a range of topics from historical travels to modern social identities. They discuss ancient travels, contemporary travels in Europe, Africa and sustainable eco-tourism, and the politics of tourism. Essays also address experiences of Grenada's "Spice Island" identity, and the effects of

globalization and migrations on personal identity.

Routledge

Though conflict is normal and can never fully be prevented in the international arena, such conflicts should not lead to loss of innocent life. Tourism can offer a bottom-up approach in the mediation process and contribute to the transformation of conflicts by allowing a way to contradict official barriers motivated by religious, political, or ethnic division. Tourism has both the means and the motivation to ensure the long-term success of prevention efforts. *Role and Impact of Tourism in Peacebuilding and Conflict Transformation* is an essential reference source that provides an approach to peace through tourism by presenting a theoretical framework of tourism dynamics in international relations, as well as a set of peacebuilding case studies that illustrate the role of tourism in violent or critical scenarios of conflict. Featuring research on topics such as cultural diversity, multicultural interaction, and international relations, this book is ideally designed for policymakers, government officials,

international relations experts, academicians, students, and researchers.

OECD Territorial Reviews: Japan 2016
Springer

This book approaches the tourism and hospitality industry from a regional science perspective. By analyzing the spatial context of tourist travels, the hospitality sector, and the regional impacts of tourist activities, it demonstrates the value of the regional science paradigm for understanding the dynamics and effects of tourism and hospitality-related phenomena. Written by leading regional science scholars from various countries as well as professionals

from organizations such as OECD and AirBnB, the contributions address topics such as migration, new types of accommodation, segmentation of tourism demand, and the potential use of tracking technologies in tourism research. The content is divided into five parts, the first of which analyzes spatial effects on the development of firms in the tourism industry, while the second approaches temporal and spatial variability in tourism through analytical regional science tools. The broader economic and social impacts of tourism are addressed in part three. Part four assesses specific tourism segments and tourist behaviors, while part five discusses environmental aspects and

tourism destination policies. The book will appeal to scholars of regional and spatial science and tourism, as well as tourism specialists and policymakers interested in developing science and evidence-based tourism policies.

Sustainable Transport and Tourism Destinations IGI Global

Japan is embarked on a demographic transition without precedent in human history: the population is both declining and ageing rapidly. This raises important questions about the country's future economic geography, as public policies will need both to respond to these shifts and also to shape them.
