### True Accounts of Slave Rescues: Then and Now

Pebble  
 In this pathbreaking and provocative new treatment of some of the oldest dilemmas of psychology and relationship, Gordon Wheeler challenges the most basic tenet of the West cultural tradition: the individualist self. Characteristics of this self-model are our embedded yet pervasive ideas that the individual self precedes and transcends relationship and social field conditions and that interpersonal experience is somehow secondary and even opposed to the needs of the inner self. Assumptions like these, Wheeler argues, which are taken to be inherent to human nature and development, amount to a controlling cultural paradigm that does considerable violence to both our evolutionary self-nature and our intuitive self-experience. He asserts that we are actually far more relational and intersubjective than our cultural generally allows and that these relational capacities are deeply built into our inherent evolutionary nature. His argument progresses from the origins and lineage of the Western individualist self-model, into the basis for a new model of the self, relationship, and experience out of the insights and implications of Gestalt psychology and its philosophical derivatives, deconstructivism and social constructionism. From there, in a linked series of experiential chapters, each of them a groundbreaking essay in its own right, he takes up the essential dynamic themes of self-experience and relational life: interpersonal orientation, meaning-making and adaptation, support, shame, intimacy, and finally narrative and gender, culminating in considerations of health, ethics, politics, and spirit. The result is a picture and an experience of self that is grounded in the active dynamics of attention, problem solving, imagination, interpretation, evaluation, emotion, meaning-making, narration, and, above all, relationship. By the final section, the reader comes away with a new sense of what it means to be human and a new and more usable definition of health.

These are my lines on a paper napkin. Napkins are disposable. When no longer useful, we discard them. We too are useful and eventually go away. However, descriptions of past places and unusual and challenging events and funny, risky, and tragic episodes are flotsam that keep our essences in the life current of succeeding generations. This book coheres a riot of random chatter from my life, a life not boring or uninteresting, but a life pulsing with adventures. An examined life full of trials, trauma, fun, frolic, risk, sorrow, silliness, great joy, and worth telling for the inherent lessons. Eventually I'll forfeit my being; however, by putting my lines in a book, perhaps this life won't end up in a waste bin so quickly.

The Secret Story of India's Quest to be a Nuclear Power Archie Comic Publications (Trade)

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, Incidents in the Life of a Slave Girl, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

This book challenges the widely-held view that Marxism is unable to deal adequately with environmental problems. Jonathan Hughes considers the nature of environmental problems, and the evaluative perspectives that may be brought to bear on them. He examines Marx's critique of Malthus, his method, and his materialism, interpreting the latter as a recognition of human dependence on nature. Central to the book's argument is an interpretation of the development of the productive forces which takes account of the differing ecological impacts of different productive technologies while remaining consistent with the normative and explanatory roles that this concept plays within Marx's theory. Turning finally to Marx's vision of a society founded on the communist principle to each according to his needs, the author concludes that the underlying notion of human need is one whose satisfaction presupposes only a modest and ecologically feasible expansion of productive output.
