Conclusions and recommendations.
Aerobic Granular Sludge Media Pressindo
This book presents a technical review of
ecological and life history information on a
range of Bornean wildlife species, aimed
at identifying what makes these species
sensitive to timber harvesting practices
and associated impacts. It addresses three
audiences: 1) those involved in assessing
and regulating timber harvesting activities
in Southeast Asia, 2) those involved in
trying to achieve conservation goals in the
region, and 3) those undertaking research
to improve multipurpose forest
management. This book shows that forest

management can be improved in many
simple ways to allow timber extraction and
wildlife conservation to be more
compatible than under current practices.
The recommendations can also be
valuable to the many governmental and
non-governmental organisations
promoting sustainable forest management
and eco-labelling. Finally, it identifies a
number of shortcomings and gaps in
knowledge, which the hope can interest
the scientific community and promote
further research. This review is, an
important scientific step toward
understanding and improving sustainable
forestry practices for long-term

biodiversity conservation. Even in the short term, however, significant improvements can be made to improve both conservation and the efficiency of forest management, and there is no need to delay action due to a perceived lack of information. In the longer term it is expected that the recommendations from this review will be implemented, and that further research will continue to help foster an acceptable balance among the choices needed to maintain healthy wildlife populations and biodiversity in a productive forest estate.

Senarai Bijak terhadap Alam dan Inspiratif dalam Gagasan W. W. Norton & Company
Salam Redaksi Rp 11,9 T untuk Peningkatan Ekonomi Rakyat pada 2016
Pemerintah Aceh pada bulan April 2016
PEMERINTAH Aceh pada bulan April 2015 membahas arah pembangunan 2016 melalui Musyawarah Rencana Pembangunan (Musrenbang). Pemerintah kabupaten/kota se-Aceh bersama pemerintah provinsi membahas arah pembangunan Aceh 2016. Pembangunan tahunan itu tentu harus sesuai dengan dokumen Rencana Pembangunan Jangka Panjang (RPJP) 2012-2032 dan Rencana Pembangunan Jangka Menengah (RPJM) 2012-2017, sehingga pembangunan terarah dalam menggapai target. Pembangunan Aceh pada 2016 terfokus pada lima arah, yaitu: 1. Pengembangan dan revitalisasi kawasan-kawasan strategis yang memiliki potensi ekonomi dalam rangka meningkatkan daya saing ekonomi Aceh di tingkat global dan regional. 2. Memastikan kemudahan serta mendorong pertumbuhan investasi yang

terkait dengan pengembangan agroindustri serta penuntasan akses jalan yang menjangkau wilayah terisolir. 3. Penurunan angka kemiskinan dan pengangguran Aceh secara signifikan. 4. Peningkatan nilai tambah produk komoditas unggulan sudah menunjukkan hasil yang nyata. 5. Pencapaian tujuan pembangunan milenium khususnya pelayanan kesehatan dan mutu pendidikan tidak hanya dijaga agar tetap konsisten, melainkan juga menjadi daya tarik bagi masyarakat luar dan dalam Aceh sehingga dapat menambah pendapatan Asli Aceh. Dari lima arah pembangunan 2016 di atas hampir semuanya bermuara pada peningkatan ekonomi rakyat. Arah pembangunan nomor urut satu hingga nomor empat sangat jelas mengandung pesan bahwa pembangunan 2016 adalah peningkatan pendapatan ekonomi rakyat melalui program-program pembangunan kawasan-kawasan strategis, pertumbuhan investasi di bidang agroindustri, penuntasan akses jalan hingga daerah terisolir, penurunan angka kemiskinan, serta peningkatan nilai tambah produk komoditas unggulan. Anggaran yang diproyeksikan untuk mencapai arah

pembangunan 2016 adalah sebesar Rp. 11.904.101.542.547. Semua instansi terkait di level provinsi dan kabupaten/kota harus mampu memanfaatkan RAPBA 2016 ini untuk dijabarkan dalam wujud program/kegiatan yang berdampak pada peningkatan ekonomi rakyat sesuai target yang telah ditetapkan, yaitu pertumbuhan ekonomi menjadi 6,9% (dari 6,7% pada 2015), tingkat kemiskinan menjadi 11,5% (dari 16,98% pada 2015), dan pengangguran menjadi 6,8% (dari 7% pada 2015). Disinilah pentingnya Musrenbang untuk penyamaan visi sehingga pembangunan tetap terarah dan semua target yang sudah dituangkan dalam RPJP 2012-2032 dan RPJM 2012-2017 akan tercapai. Semoga!

Fokus buku ini adalah beberapa format naskah dinas yang digunakan sehari-hari oleh PNS yang menduduki jabatan eselon IV (Jabatan Pengawas) dan Pelaksana, seperti naskah-naskah korespondensi internal (memorandum dan nota dinas), naskah korespondensi eksternal (surat dinas), dan telaahan staf. Untuk

memudahkan pembaca menggunakan buku ini, setiap format dilengkapi dengan contoh. Sebagian besar contoh yang dikemukakan bersumber dari penelaahan mendalam penyelenggaraan tata naskah dinas di lingkungan instansi Pemda, tugas-tugas latihan dan diskusi dalam ruang-ruang diklat, dan masukan dari rekan-rekan sejawat (widyaiswara) dalam membimbing peserta pelatihan.

Priority Areas for National Action
Deepublish

This interdisciplinary book parameterizes the global ecodynamic process. The discussion considers basic global problems of the Nature-Society-System (NSS) dynamics and reviews key problems of ensuring its sustainable development. The book includes an analysis of trends in changing ecological systems and estimates characteristics of current global ecodynamics. The authors propose a new approach to NSS numerical modelling and demonstrate the results of modelling the dynamics of this system's characteristics.

Economics, Ecology, and Justice

Houghton Mifflin Harcourt

This book includes twenty-one comprehensive chapters addressing

various soil and crop management issues, including modern techniques in enhancing crop production in the era of climate change. There are a few case studies and experimental evidence about these production systems in specific locations. Particular focus is provided on the state-of-the-art of biotechnology, nanotechnology, and precision agriculture, as well as many other recent approaches in ensuring sustainable crop production. This book is useful for undergraduate and graduate students, teachers, and researchers, particularly in the fields of crop science, soil science, and agronomy.

LSAP UAQi Springer Science & Business Media

Environmental and Natural Resource Economics is the best-selling text for natural resource economics and environmental economics courses, offering a policy-oriented approach and introducing economic theory and empirical work from the field. Students will leave the course with a global perspective of both environmental and natural resource economics and how they interact. Complemented by a number of case studies showing how underlying economic

principles provided the foundation for specific environmental and resource policies, this key text highlights what can be learned from the actual experience. This new, 11th edition includes updated data, a number of new studies and brings a more international focus to the subject. Key features include: Extensive coverage of the major issues including climate change, air and water pollution, sustainable development, and environmental justice. Dedicated chapters on a full range of resources including water, land, forests, fisheries, and recyclables. Introductions to the theory and method of environmental economics including externalities, benefit-cost analysis, valuation methods, and ecosystem goods and services. Boxed 'Examples' and 'Debates' throughout the text which highlight global examples and major talking points. The text is fully supported with end-of-chapter summaries, discussion questions, and self-test exercises in the book and multiple-choice questions, simulations, references, slides, and an instructor's manual on the Companion Website.

Water Quality Management covers the fundamentals of water quality; water quality modeling and systems analysis of streams, reservoirs, and estuaries; and practical water quality topics and problems. The book presents topics on the legal aspects; the physical, chemical, and biological dimensions of water quality; and water quality requirements. The text also describes the pollution inputs from both point and nonpoint sources; eutrophication; thermal pollution; and groundwater quality. Detailed discussions on water quality parameters and characteristics; hydrologic and hydraulic aspects of water quality; mixing; and simple and complex water quality models are also included. The book further tackles topics on waste assimilative capacity determination, as well as effluent outfall design. Practicing environmental engineers and professionals involved in pollution abatement programs,

environmental students undertaking studies in water quality management, and professionals involved in water quality management or water resources problems will find the text quite.

Dimensi lingkungan perencanaan pembangunan Routledge

This country profile reviews the drivers of deforestation and forest degradation in Indonesia, sets out the institutional, political and economic environment within which REDD+ is being implemented in Indonesia, and documents the process of national REDD+ policy development during the period 2007 – early 2012. While Indonesia is committed at the national and international level to addressing climate change through the forestry sector, there are clearly contextual challenges that need to be addressed to create the enabling conditions for REDD+. Some of the major issues include inconsistent legal frameworks, sectoral focus, unclear tenure, consequences of decentralisation, and weak local governance. Despite these challenges, however, REDD+ opens up an opportunity for improvements in forest governance and, more broadly, in land use governance. More democratic political-

economic processes in general, greater freedom of civil society and the press, and heightened awareness of environmental issues can help build support and solidify policies in this direction.

Pembangunan dan lingkungan Wipf and Stock Publishers

Can a livable society also be sustainable? How can we move beyond anthropocentrism without surrendering humanity's unique contribution to the globe? What of the contradictions conservative economics seems to reveal in so-called liberal approaches to economics and ecology? Does Christianity have anything to say about living in a world of limits? In 'Sustainability', John Cobb argues that reflections on ecological issues inevitably raise religious questions as well. Admittedly, traditional Christian teaching to subdue the earth had contributed to the mindset responsible for the crisis we are facing today. But Christianity can contribute to the discussion of how to keep the planet from ecological disaster. For one thing, Christianity can keep ecological issues closely tied to those of social justice -- a necessity for a sustainable society. Christianity can also

make clear the need for individual change of heart (conversion) that is a prerequisite to real social and economic change. As the Earth Summit testified, our world stands in need of new visions, to nurture new ways of integrating its human, mineral, animal, vegetable, and energy components. 'Sustainability' is John Cobb at his best . . . timely, incisive, and vigorous.

Rencana strategis Kementerian Lingkungan Hidup tahun 2010-2014

Elsevier

Discusses the reckless annihilation of fish and birds by the use of pesticides and warns of the possible genetic effects on humans.

Green Manufacturing: Fundamentals and Applications introduces the basic definitions and issues surrounding green manufacturing at the process, machine and system (including supply chain) levels. It also shows, by way of several examples from different industry sectors, the potential for substantial improvement and

the paths to achieve the improvement. Additionally, this book discusses regulatory and government motivations for green manufacturing and outlines the path for making manufacturing more green as well as making production more

sustainable. This book also: Discusses new engineering approaches for manufacturing and provides a path from traditional manufacturing to green manufacturing Addresses regulatory and economic issues surrounding green manufacturing Details

new supply chains that need to be in place before going green Includes state-of-the-art case studies in the areas of automotive, semiconductor and medical areas as well as in the supply chain and packaging areas
