From CEMA standard components to complete systems, you can rely on KWS to exceed your expectations. As the industry leader, KWS designs and manufactures conveying equipment for every bulk material handling application. Cost-Effective Solutions Bulk Material Handling Equipment | Screw Conveyors | Belt ... Many bulk material handling systems incorporate screw conveyors to move

material upwards or from a hopper into the processing line. Screw conveyors offer a few advantages over other conveying systems in certain situations. Flexible Screw Conveyors | Bulk Material Handling Equipment Screw Conveyors are one of the oldest and simplest methods for moving bulk materials and consist primarily of a conveyor screw rotating in a stationary trough. Material placed in the trough is moved along its length by rotation of the screw which is supported by hanger bearings, inlets, outlets and other accessories controlling the material and its disposition. Screw Conveyors - Syntron Material Handling Screw Conveyors Screw Conveyors transport bulk materials while utilizing a screw to

transport the material and are controlled in one or numerous inlet areas. The bulk material moves forward with each revolution of the screw. Conveying capacities up to 10,000 cubic feet per hour can easily be handled with Kase Screw Conveyors. Kase Screw Conveyors | Bulk Material Handling The screw conveyor is one of the most cost-effective methods for transporting bulk materials. Screw conveyors are used in thousands of applications in almost every industry. Corrosive Products – Screw conveyors must be fabricated from alloys not affected by the corrosive product. Typical materials of construction for corrosive products are 304, 310, 316, 410 and 430 stainless steels. Screw Conveyor Manufacturer | Bulk Material Handling Founded in 1932, Screw Conveyor Corporation is a leading manufacturer of bulk material handling equipment. The experience and knowledge of the five original founders produced a very successful business venture. Today, the legacy continues to grow under family leadership. Bulk Handling Equipment | Screw Conveyor Corporation Screw Conveyors, Augers and Bulk Material Handling Systems to handle your toughest jobs: A versatile and hard-working screw conveyor system from Austin Mac is one you know stands ready to handle the demands of your materials. Screw Conveyors | Bulk Material Handling - Austin Mac, Inc KWS Screw Conveyors are used to efficiently convey bulk materials from one process to another. Screw conveyors are very cost-effective and require minimal maintenance to operate. Ideal for conveying dry to semi-fluid materials – free-flowing to sluggish; Efficiently distributes bulk materials to various locations using multiple discharge points.
