The Chinese Art of the Occult Singing Dragon

The medicine of the 20th century was about the treatment of illness. The medicine of the 21st century is about wellness. Crossing the Healing Zone advances the new concepts of the emerging frontiers of integrative medicine, bringing together Eastern and Western healing traditions and merging body, mind, and spirit in a Jungian perspective. The journey through the Healing Zone that Dr. Bedi proposes is guided by archetypes and myths, active imagination, dreams and synchronicities, and the neuroplastic mysteries of our complex physical reality. The Healing Zone can be described in many ways—as the fourth dimension of consciousness, as quantum consciousness, as Jung's "psychoid space," as the Buddhist Third Way, or as the "gap" between the ego and the soul. Here, we can access all three areas of the triune brain—reptilian, limbic, and neocortical—all of which must be addressed in order to achieve full integration and healing. The Healing Zone is a bridge between the ego and the soul—a bridge that we can cross to reach the healing wisdom of the universe. Dr. Bedi outlines how to work with psychological and soul processes in moving from illness to wellness, and provides practical methods and techniques that can help readers access and engage the Healing Zone. The book contains informative and visual guidelines and practices that can help us create and manage our own personal wellness programs and become full and active partners in our own

journeys from illness to wellness.

Fire Dragon Meridian Qigong is a traditional Chinese internal alchemy method that embodies the spirit of the rising dragon, an auspicious symbol of transformation in Chinese culture. The form works directly on the acupuncture meridians, releasing areas of stagnation and bringing the physical and emotional body into a balanced state of well-being. This Qigong form implements special visualization and breathing techniques in addition to movements that imitate sparks arising from a bonfire and swirling upward like a spiraling dragon. Stoking our 'inner fire' melts away the 'ice', or the areas of blockage and disease, opens our energetic pathways and allows the smooth flow of Qi in our meridians. The Fire Dragon practice follows the traditional internal alchemy process, where Jing (essence) transforms to Qi (vital energy), Qi transforms to Shen (spirit), and Shen returns to Emptiness. Fire Dragon Meridian Qigong is a key Qigong form for those seeking healing from cancer and other significant health challenges, and is the practice the authors turned to in order to transform the grief over their son's death. The book provides background information and a detailed description of the form itself, illustrated with calligraphy, meridian drawings, and photographs throughout.

The Eight Extraordinary channels are amongst the most interesting and clinically important aspects of Chinese medicine and Qigong. This book introduces the theory behind the channels, explains their clinical applications, and explores their psycho-emotional and spiritual qualities. The author also describes how to cultivate the channels through Nei Dan Inner Meditation. As a practitioner of Chinese medicine or acupuncture, the key to creating effective individual treatment plans is having a wide understanding of channel theory, and a comprehensive knowledge of the pathways and the points on the channels. David Twicken provides treatment strategies, methods and case studies, offering a variety of approaches so as to give the reader a solid foundation from which to confidently create customized treatment plans for each patient. Offering a historical perspective as well as modern insights, this book will be essential reading for novice as well as experienced practitioners.

These discussions are accompanied by extensive illustrations, including drawings rendered from photographs of famous Ba Gua masters holding the Nei Gong postures. "The Heavenly Stems and Earthly Banches constitute an ancient Chinese cosmological science--a complex calendrical system--which codifies the

patterns of life and of the universe. The ten Stem symbols express the yin/yang perspective of the Five Elements and embody the Way of Heaven.

The 12 Branch symbols manifest in the 12 animals of the Chinese zodiac, and hold the root of each Element, embracing the Way of Earth. With this set of study cards, Daoist Master Wu Zhong Xian decodes some of the fundamental messages for the 22 Stem/Branch symbols. The Chinese character and key characteristics of each Stem or Branch are shown, with insights into their symbolic and numerological meanings. The stroke order is clearly illustrated on 11 separate calligraphy cards. With introductory cards that concisely explicate the ancient cosmology, this set makes a convenient learning tool for those interested in Chinese classical texts, Chinese medicine, fengshui, Chinese astrology and cosmology, Qigong, Neigong, Taiji, and other inner cultivation practices."--The Publisher's website.

For the first time in English, Benebell Wen reveals the rich history and theoretical principles underlying the ancient practice of crafting Fu talismans, or magical sigils, in the Chinese Taoist tradition and gives detailed instructions for modern practitioners who would like to craft their own Fu. Fu talismans are ideograms and writings typically rendered on paper and empowered by means of invocations, ritual, and transferences of energy, or Qi. Talismans can be used for many purposes, such as strengthening or weakening personality characteristics, finding love, earning more money, or easing emotional tensions in the home. The Tao of Craft shows how metaphysical energy can be harnessed to amplify, strengthen, weaken, dispel, or block other metaphysical energy and to rectify perceived imbalances in the material plane. Supported by an abundance of detailed charts and images, this book serves as a step-by-step handbook that gives readers the knowledge and confidence to craft their own Fu talismans for personal empowerment. Wen, author of Holistic Tarot, delves into historic and cultural contexts of the Fu, from the neolithic period of Chinese history to contemporary practices of esoteric Taoism. Providing a solid foundation in the principles of Eastern spellcrafting, she highlights the blending of Taoist metaphysical practices with Western approaches to magic by pointing out eclectic, integrating, and harmonizing facets from other cultures and religions. Historically, Fu talismans were used by medieval Chinese for alleviating illness; averting misfortune, magical attacks, and curses; defending against assaults; and avoiding poverty. This book shows Western practitioners that the skill and knowledge to develop an interactive relationship with spirit realms are still available to them today, and serves as a practical handbook for accumulating Qi energy from sources in the environment and channeling it in concentrated form into their own Fu talismans. Once the traumas are identified and treated, the body will function at an optimum level and will respond to treatments for other conditions present. This book integrates the multi-diagnostic and treatment methods existing in Chinese medicine, and contains diagnostics such as facial, pulse, tongue, and channel palpation diagnosis. Treatments include acupuncture, Chinese herbal formulas, qigong, shamanic drumming, and lifestyle and nutritional recommendations. Many types of emotional traumas and their manifestations are presented, including fear, anxiety, panic attacks, PTSD, depression, mood swings, insomnia and sensory organ impairment. In many old martial arts films you often see a master capable of extraordinary supernormal feats such as being able to move with the speed of wind, throw incredibly heavy objects, destroy them with a strike, stride over water, or even fly through the air. Are such things possible? The Chinese Taoists say "yes" if the master practiced special exercises to cultivate their inner energy, or yang chi (qi). These practices to cultivate inner power are called nei-gong, or the internal martial arts, and are related to the mastery of the kundalini energies cited in Indian yogic and Buddhist literature, which also explains the various superpowers that become possible with its cultivation. Many people today want to be able to attain such supernormal skills, or they simply want to understand why and how these skills were cultivated so they might be duplicated as best possible. Some practitioners of Tai Chi Chuan, Hsing-Yi, Ba Gua Zhang, Five Animals, Aikido, Karate, Judo, Northern Shaolin, and other Kung Fu Wushu traditions have alternatively damaged their bodies from their practice, or have reached a training plateau, and want some sure methods to break their current limits and bring their martial arts skills to the next level. This book explains the major practices on how to properly cultivate nei-gong safely to achieve all these objectives. The information provided, because of its advance nature, was usually considered the high "secrets" of martial arts lineages made available only to the top students who also practiced breathing methods and meditation. It explains how to cultivate the mythical martial arts through the initial practice of qi-gong, and then inner nei-gong exercises involving anapana, pranayama, one-pointed visualization, kasina meditations, and sexual cultivation. It provides training information applicable to Iron Palm, Iron Shirt or Dim Mak techniques, which though incredible in themselves still fall far short of the special supernormal achievements possible after a martial arts student successfully opens up their chakras and chi channels, in particular their sushumna central channel and the macrocosmic chi circulation within the body. This is the only book in English offering detailed instructions on how to cultivate the Taoist concept of shen, which is the stage of awareness attained after cultivating your chi to a high level. For purposes of attaining inner gong-fu (kung fu), it also teaches how to cultivate the Six Yogas of Naropa and the Tibetan tantric mantras for opening up the body's central chi channel. In terms of specific long term nei-gong methods, it stresses visualization and anapana practices which are explained in conjunction with more advanced techniques for dissolving inner energy blockages. Rather than just focusing on internal martial arts kung fu, the authors go even a step further also bring forth many rarely discussed modern training principles for peak athletic performance that can be applied to martial arts, and provide practical information on various vitamin-mineral supplements, detoxification routines, and bodywork therapies that can help

heal martial arts injuries and lead to improved skills even if the nei-gong route of internal martial arts energies and gong-fu is not mastered. This is a truly unique book, quite different than what's normally available for the martial arts tradition, because it provides full materials on topics rarely covered elsewhere, and reveals not one, two or three but a plethora of inner training practices, even for qi-gong, along with what are normally considered their secret training details.

This book focuses on a key aspect of Nei Gong and Qi Gong which is often ignored in practice; this is the practice of connecting with, feeling and adjusting the energy body directly, using the consciousness. The practice sits somewhere between Qi Gong, meditation and the lesser-known art of Shen Gong, and although it is known in China it has never before been written about in an accessible way in the West. The book contains step-by-step instructions on how to experience the various elements which make up a person's energy body, learning to identify and feel the meridians, and to diagnose imbalances and restore harmony through them. The book contains step-by-step instructions on how to experience the various elements which make up a person's energy body, learning to identify and feel the meridians, and to diagnose imbalances and restore harmony through them. Daoists pay close attention to all different modes and dimensions of time. They carefully observe the planetary movements in nature and set up detailed guidelines to match their course and follow the Chinese calendar with its various man-made divisions, such as the twenty-four solar periods, twenty-eight lunar stations, and the sexagenary cycle. Beyond this, Daoists activate the trigrams and hexagrams of the Yijing to designate phases of growth and decline and to mark certain temporal units with specific significance. Moving beyond this, they also work with time in the human body, linking certain features to stages of life and creating temporal rhythms by their own physical actions. They revert the flow of entropy within the body, establishing mastery over time, and transfigure their very physical constitution to subtler levels, opening ways to transcend time altogether. This volume brings together senior and junior scholars as well as practitioners to explore these various topics under three main headings: planetary, calendar, and body time. They cover the entire history of Daoism, from its precursors in the Han to its monastic and popular activation in the 21st century, as well as a plethora of different methods-social predictions, personal horoscopes, physiognomy, healing modalities, qigong, self-cultivation, internal alchemy, and more. Opening new ways of looking at time and expressing uniquely Daoist features, the volume is path-breaking and highly relevant today. A must for anyone interested in time studies, religious practice, and Chinese culture.
