Junior in college. Star athlete. Constant attention from the opposite sex. On this campus, I'm worshiped. While seven hundred miles away, back in my hometown, I'm still trailer park trash, child of the town tramp, and older sibling to three kids who are counting on me to keep my shit together so I can take them away from the same crappy life I grew up in. These two opposing sides of myself never mix until one person gets a glimpse of the true me. I never expected to connect with anyone like this or want more beyond one night. This may be the real deal. Problem is Dr. Kavanagh's my literature professor. If I start anything with a teacher and we're caught together, I might as well kiss my entire future goodbye, as well as my family's and especially Dr. Kavanagh's. Except sometimes love is worth risking everything. Or at least, it damn well better be, because I can only resist so much.

The Mogao grottoes in China, situated near the oasis town of Dunhuang on the fabled Silk Road, constitute one of the world's most significant sites of Buddhist art. In some five hundred caves carved into rock cliffs at the edge of the Gobi desert are preserved one thousand years of exquisite murals and sculpture. Mogao, founded by Buddhist monks as an isolated monastery in the late fourth century, evolved into an artistic and spiritual center whose renown extended from the Chinese capital to the far western kingdoms of the Silk Road. Among its treasures are miles of stunning wall paintings, more than two thousand statues, magnificent works on silk and paper, and thousands of ancient manuscripts, such as sutras, poems, and prayer sheets, which in 1900 were found sealed in one of the caves and then dispersed to museums throughout the world. Illustrated in color throughout, Cave Temples of Mogao combines lavish photographs of the caves and their art with the fascinating history of Mogao, Dunhuang, and the Silk Road to create a vivid portrait of this remarkable site. Chapters discuss the development of the cave temples, the iconography of the wall

paintings, and the extraordinary story of the rare manuscripts, including the oldest printed book in existence, a ninth-century copy of the Diamond Sutra. The book also describes the long-term collaboration between the Getty Conservation Institute and Chinese authorities in conservation projects at Mogao as well as the caves and the museum that can be visited today. The publication of this book coincides with the centenary of the discovery of the manuscripts in the Library Cave.

From one of our most widely read, award-winning journalists – comes the powerful, unputdownable story of the very human cost of a global pandemic of staggering scope and scale. It is essential reading for our times. In 28, Stephanie Nolen, the Globe and Mail's Africa Bureau Chief, puts a human face to the crisis created by HIV-AIDS in Africa. She has achieved, in this amazing book, something extraordinary: she writes with a power, understanding and simplicity that makes us listen, makes us understand and care. Through riveting anecdotal stories – one for each of the million people living with HIV-AIDS in Africa – Nolen explores the effects of an epidemic that well exceeds the Black Plague in magnitude. It is a calamity that is unfolding just a 747-flight away, and one that will take the lives of these 28 million without the help of massive, immediate intervention on an unprecedented scale. 28 is a timely, transformative, thoroughly accessible book that shows us definitively why we continue to ignore the growth of HIV-AIDS in Africa only at our peril and at an intolerable moral cost. 28's stories are much more than a record of the suffering and loss in 28 emblematic lives. Here we meet women and men fighting vigorously on the frontlines of disease: Tigist Haile Michael, a smart, shy 14-year-old Ethiopian orphan fending for herself and her baby brother on the slum streets of Addis Ababa; Alice Kadzanja, an HIV-positive nurse in Malawi, where one in six adults has the virus, and where the average adult's life expectancy is 36; and Zackie Achmat, the hero of South Africa's politically fragmented battle against HIV-AIDS. 28 also tells us how the virus works, spreads and, ultimately, kills. It explains the connection of HIV-AIDS to conflict, famine and the collapse of states; shows us how easily treatment works for those lucky enough to get it and details the struggles of those who fight to stay alive with little support. It makes vivid the strong, desperate people doing all they can, and maintaining courage, dignity and hope against insurmountable odds. It is – in its humanity, beauty and sorrow – a call to action for all who read it.

The main purpose of this book is to provide an introduction to central topics in elementary algebra from a problem-solving point of view. While working with students who were preparing for various mathematics competitions or exams, the author observed that fundamental algebraic techniques were not part of their mathematical repertoire. Since algebraic skills are not only critical to algebra itself but also to numerous other mathematical fields, a lack of such knowledge can drastically hinder a student's performance. Taking the above observations into account, the author has put together this introductory book using both simple and challenging examples which shed light upon essential algebraic strategies and techniques, as well as their application in diverse meaningful problems. This work is the first volume in a series of such books. The featured topics from elementary and classical algebra include factorizations, algebraic identities, inequalities, algebraic equations and systems of equations. More advanced concepts such as complex numbers, exponents and logarithms, as well as other topics, are generally avoided. Nevertheless, some problems are constructed using properties of complex numbers which challenge and expose the reader to a broader spectrum of mathematics. Each chapter focuses on specific methods or strategies and provides an ample collection of accompanying problems that graduate in difficulty and complexity. In order to assist the reader with verifying mastery of the theoretical component, 105 problems are included in the last sections of the book, of which 52 are introductory and 53 are advanced. All problems come together with solutions, many employing several approaches and providing the motivation behind the solutions offered.

Winner of the 2015 Hiett Prize in the Humanities. Sometimes it seems like you need a PhD just to open a book of philosophy. We leave philosophical matters to the philosophers in the same way that we leave science to scientists. Scott Samuelson thinks this is tragic, for our lives as well as for philosophy. In *The Deepest Human Life* he takes philosophy back from the specialists and restores it to its proper place at the center of our humanity, rediscovering it as our most profound effort toward

understanding, as a way of life that anyone can live. Exploring the works of some of history's most important thinkers in the context of the everyday struggles of his students, he guides us through the most vexing quandaries of our existence—and shows just how enriching the examined life can be. Samuelson begins at the beginning: with Socrates, working his most famous assertion—that wisdom is knowing that one knows nothing—into a method, a way of approaching our greatest mysteries. From there he springboards into a rich history of philosophy and the ways its journey is encoded in our own quests for meaning. He ruminates on Epicurus against the sonic backdrop of crickets and restaurant goers in Iowa City. He follows the Stoics into the cell where James Stockdale spent seven years as a prisoner of war. He spins with al-Ghazali first in doubt, then in the ecstasy of the divine. And he gets the philosophy education of his life when one of his students, who authorized a risky surgery for her son that inadvertently led to his death, asks with tears in her eyes if Kant was right, if it really is the motive that matters and not the consequences. Through heartbreaking stories, humanizing biographies, accessible theory, and evocative interludes like "On Wine and Bicycles" or "On Zombies and Superheroes," he invests philosophy with the personal and vice versa. The result is a book that is at once a primer and a reassurance—that the most important questions endure, coming to life in each of us.
