A Novel Springer Science & Business Media

The police don't want to catch the killer. So he'll have to. Tel Aviv, 1949 - A young Arab woman lies murdered in the city morgue and no one seems to care. The newspapers won't report it. The police won't investigate. No one is trying to solve the case. Except one man. Private detective Adam Lapid is the only one investigating the murder. And he won't rest until the killer is off the streets. Adam's investigation soon plunges him into a sordid underworld of crime and depravity. An underworld that hides a ruthless killer with a twisted mind. To catch the murderer, Adam must use all his skills. And if he's not careful, he'll be the one who ends up dead next.

This book constitutes the thoroughly refereed post-proceedings of the 5th International Conference on High Performance Computing for Computational Science, VECPAR 2002, held in Porto, Portugal in June 2002. The 45 revised full papers presented together with 4 invited papers were carefully selected during two rounds of reviewing and improvement. The papers are organized in topical sections on fluids and structures, data mining, computing in chemistry and biology, problem solving environments, computational linear and non-linear algebra, cluster computing, imaging, and software tools and environments.

Wild caprinae, including sheep and goats, are an extremely valuable group of mammals. While most live in mountains, some inhabit desert grasslands, tropical forests or even arctic tundra. They range in size from the 30kg goral to the 350kg musk ox and display a variety of horn shapes and sizes as well as coat and body coloration. They are highly prized by hunters on account of their horns and their coats. Today, despite their important domestic relations, many wild caprinae are in danger of being lost forever: over 70 of caprinae taxa are threatened and over 30 endangered or critical. The main threats to them are over-harvesting, habitat loss and resource competition from livestock. Some face an additional threat from trophy hunters. Despite this, however, conservation legislation is either absent or, more often, poorly enforced. This action plan explores the value of caprinae to biodiversity, the threats facing the members of the species, and makes recommendations to reverse current trends. It also emphasizes the importance to carpiniae conservation and survival of close collaboration among all parties involved in wildlife conservation including local peoples and hunting organizations,

governments, scientists and academic institutions.

Lois on the Loose
"As I was seated in remembrance and contemplation one night, in front of me appeared a great stag, shining and shimmering in whiteness, and there was a concentration of brilliant white light above its head. The stag was some feet away and was moving toward me. As it got closer, I could see that the white light on its head was emanating from a flaming brand, a torch, lit, glowing with brilliant white star-like light. The flaming brand, 'qabas' in Quranic Arabic, was as if a projection from the top of its head. The stag came straight toward me, approached me until it was so near I could have reached out and touched it, and then the flaming brand that was on its head, was suddenly but so naturally, held by it in its mouth. The stag bowed its head and placed this flaming brand, this qabas at my feet, and disappeared. As this happened the following verse flashed

through my mind, and I knew I had been given permission to spread the teachings that are coming to me, and I was given the name under which to do so; It is 'Qabas', a flaming brand; a torch for warmth and a light for guidance. *إِذْ رَأَىٰ نَارًا فَقَالَ لِأَهْلِهِ امْكُثُوا إِنِّي آنَسْتُ نَارًا لَّعَلِّي آتِيكُم مِّنْهَا بِقَبَسٍ أَوْ أَجْدٌ عَلَىٰ النَّارِ هُدًىٰ* ayah 10When he saw a fire he said to his family, "tarry here, I have indeed perceived a fire maybe I can bring you from it a flaming brand or I can find guidance at the fire"***This is the first volume in the four volume Qabas series. It collects 40 poems, composed of four series of 10 pieces each, that are collected for the blessing and spiritual state of the number 40. These poems were penned by the author during the years preceding her formal initiation into spiritual training. Works written during the beginning, middle, and end stages of her training comprise volumes 2, 3 and 4 in this series.

Best Practices for Administering Online Programs is a practical volume for university teams seeking to manage effective online programs. Defining, designing, implementing, and updating online courses is a highly collaborative effort, particularly with limited resources and expanding student enrollment. This book unites the efforts of program directors, supervisors, department chairs, participating faculty, instructional designers, IT specialists, and support staff toward a common goal: affordable, accessible, and scalable online learning. Readers will find guidelines for fostering quality, faculty skills, academic integrity, learning objectives, course improvement, and more.

The 20th Century St. Martin's Press

A motorcycle's electrical system can be daunting to even the most adept home mechanic. And yet, the more complex these systems become—and the more important to a motorcycle's function—the more useful, even critical, it will be to know something about them. That's where this book comes in with a user-friendly guide to understanding, diagnosing, and fixing the electrical systems and components that make a bike run . . . or falter. Veteran technician Tracy Martin explains the principles behind motorcycle electrical systems and how they work. He details the various tools, such as multimeters and test lights, that can be used to evaluate and troubleshoot any vehicle's electrical problem. And in several hands-on projects, he takes readers on a guided tour of their vehicle's electrical system, along the way giving clear, step-by-step instructions for diagnosing specific problems.

The Japanese serow (*Capricornis crispus*) has been protected by law since 1955 in Japan, because it was becoming rarer and approaching extinction. Thereafter, the serow population has increased gradually. The Japanese serow is thought to be a

primitive relict species on the islands of Japan, and the geographical range of the serow has retracted upwards into the mountain forests to avoid contact with humans. Little was therefore known about these animals. However, increasing losses of forest habitat due to exploitation of the mountain forests or expanding cultivation by local foresters have driven the Japanese serow back into the lowlands of Japan. Since then, complaints of damage to trees and other vegetation have accumulated against the serow. In some prefectures the shooting of Japanese serow was allowed in order to prevent damage to forests. The animals killed were taken for research by the Departments of the Environment and by universities. was set up at the summit of Mt. Gozaisho, The Japan Serow Center Komono-cho, Mie Prefecture, in 1962 and has made a great effort to breed the serow and its related species in captivity. In addition, the International Studbook of Capricorn is crispus in captivity was established in Japan, and the state of breeding of the Japanese serows is now reported annually. However, without detailed scientific research, it is impossible to conduct sensible protection, conservation or management of the serow in captivity or in the wild.

The Biology and Management of Capricornis and Related Mountain Antelopes Oxford University Press, USA

From Beth Harbison, the New York Times bestselling author of *When in Doubt*, *Add Butter* and *Shoe Addicts Anonymous*, comes *Chose the Wrong Guy*, *Gave Him the Wrong Finger*, a delightful new novel that will make you look at second chances in a whole new way. Ten years ago, Quinn Barton was on her way to the altar to marry Burke Morrison, her high school sweetheart, when something derailed her. Rather, someone derailed her—the Best Man who at the last minute begged her to reconsider the marriage. He told her that Burke had been cheating on her. For a long time, Quinn, stunned, hurt, and confused, struggled with the obligation of fulfilling her guests' expectations—providing a wedding—and running for her life. She chose running. With the Best Man. Who happened to be Burke's brother, Frank. That relationship didn't work either. How could it, when Quinn had been engaged to, in love with, Frank's brother? Quinn opted for neither, and, instead, spends the next seventeen years working in her family's Middleburg, Virginia, bridal shop, *Talk of the Gown*, where she subconsciously does penance for the disservice she did to marriage. But when the two men return to town for another wedding, old anger, hurt, and passion resurface. Just because you've traded the good guy for the bad guy for no guy doesn't mean you have to stay away from love for the rest of your life, does it? Told with Beth Harbison's flair for humor and heart, *Chose the Wrong Guy* will keep you guessing and make you

believe in the possibilities of love.

Science Focus 3 Carson-Dellosa Publishing

In 2011, at the height of tension between the British and Iranian governments, travel writer Lois Pryce found a note left on her motorcycle outside the Iranian Embassy in London: ... I wish that you will visit Iran so you will see for yourself about my country. WE ARE NOT TERRORISTS!!! Please come to my city, Shiraz. It is very famous as the friendliest city in Iran, it is the city of poetry and gardens and wine!!! Your Persian friend, Habib Intrigued, Lois decides to ignore the official warnings against travel (and the warnings of her friends and family) and sets off alone on a 3,000 mile ride from Tabriz to Shiraz, to try to uncover the heart of this most complex and incongruous country. Along the way, she meets carpet sellers and drug addicts, war veterans and housewives, doctors and teachers - people living ordinary lives under the rule of an extraordinarily strict Islamic government. *Revolutionary Ride* is the story of a people and a country. Religious and hedonistic, practical and poetic, modern and rooted in tradition - and with a wild sense of humour and appreciation of beauty despite the comparative lack of freedom - this is real contemporary Iran.

The Dead Sister Haynes Manuals N. America, Incorporated
Antonia Fraser re-creates the seventeenth-century terrorist conspiracy known as the Gunpowder Plot, untangling the web of

religion, politics, and personalities that surrounded that fateful night of November 5, 1605.

Cursed Tales Haynes Manuals N. America, Incorporated
Young and beautiful, Lois Pryce was a rising star at the BBC. Unbeknownst to her co-workers, Lois lived a parallel life as a biker babe with an overwhelming sense of wanderlust. So she packed in her career to ride her motorcycle on her own from the northernmost tip of Alaska to the southernmost tip of South America. Alone. Armed only with the Spanish words for 'caution' and 'cheese', Lois was rather under-prepared for multiple bear sightings, bribing her way through borders, spending a night in a Mexican brothel and crashing her bike in the wilds of Patagonia. She most certainly got the adventure she craved, and her pulse-pounding, soul-searching adventure has already attracted fans worldwide - a weblog that she kept whilst on her travels was receiving more than two-thousand hits a day. Her hilarious, brilliantly written travelog will appeal to anyone who's ever dreamt of jacking-it-all-in and running away to see the world. *On the Road to Shiraz, the Heart of Iran* Routledge
WHAT DO KATY PERRY AND THE high school cheerleader next door have in common? Braces. Braces are dental appliances used to straighten a person's teeth and correct unhealthy overbites or under-bites. Braces are usually worn by kids 10 to 14 years old, but many adults wear braces - even celebrities. In fact, of the four million people in the US who wear braces, one million are adults. Most of the time braces are used for cosmetic reasons. Everyone wants a beautiful smile, but it is not always a matter of vanity. Crooked teeth and misaligned jaws can cause serious health problems. Teeth that do not fit together right are harder to clean, making the person more at risk for tooth decay, periodontal disease, and even lost teeth. Crooked teeth can also create stress on the jaw and facial muscles that leads to headaches, TMJ syndrome, and pain in the neck, shoulders, or back. When the need for braces is indicated, the person to see is an orthodontist. An orthodontist is a dentist who specializes in moving teeth and adjusting misaligned jaws. Most of the time that means installing braces, but there are many different types of appliances that can be used to move teeth, retrain muscles, and affect the growth and position of jaws. Some of these devices are fixed, others are removable, and still others are (nearly) invisible. They all work by applying gentle pressure over an extended period of time on teeth and jaws. Some cases require surgery, in which case the orthodontist may perform the surgery or collaborate with another dental specialist. There is a great need for orthodontists. There are fewer than 10,000 practicing today, which is barely enough to handle the number of people seeking their services. Experts are predicting a job outlook that is better than any other occupation can expect.
