Millions of adults have divorced parents. Choose a Better Path provides thought-provoking, helpful, and healing information for adult children of divorce in a user-friendly format. Through workshops, interviews, articles, and international radio programs, Kent Darcie helps adults with divorced parents apply God's healing to triggers, fears, trust issues, anger, father hunger, unforgiveness, and the fallout from gray divorce (empty-nest parents splitting up). As a researcher, author, speaker, therapist, and adult with divorced parents, Kent brings a wealth of information and tools to those who struggle when dealing with parents, steps, ex-steps, and the menagerie of players that come and go in the years that follow the divorce. While never bashing or demeaning divorced parents or others, Kent does tackle the tough and often subtle issues that damage the relationships and marriages of adult children of divorce. If you, or someone you know, have divorced parents, reading Choose a Better Path is an important step toward breaking the cycle of divorce.

Cutting-edge explorations and discussions of DMT experiences and plant sentience from leading luminaries in the field of psychedelic research • Includes contributions from Rupert Sheldrake, Rick Strassman, Dennis McKenna, Graham Hancock, Jeremy Narby, Erik Davis, Peter Meyer, David Luke, and many others • Explores DMT beings, plant sentience, interspecies communication, discarnate consciousness, dialoguing with the divine, the pineal gland, the Amazonian shamanic perspective on Invisible Entities, and the science behind hallucinations Encounters with apparently sentient beings are reported by half of all first time users of the naturally occurring psychedelic DMT, yet the question of DMT beings and plant sentience, interspecies communication, discarnate consciousness, and perhaps even dialoguing with the divine has never been systematically explored. In September 2015, ten of the world's leading luminaries noted for exploring the mysterious compound DMT (dimethyltryptamine) gathered with other researchers at Tyringham Hall in England to discuss the subject. Over three days, they pooled their expertise from a wide range of subjects--archaeology, anthropology, religious studies, psychology, neuroscience, chemistry, and psychopharmacology, to name a few--to explore the notion of "entheogenic plant sentience" and the role of DMT as a conduit between Spirit and Matter. Offering cutting-edge insights into this visionary domain, this book distills

the potent exchange of ideas that occurred at Tyringham Hall, including presentations and discussions on DMT entities, the pineal gland, the possibility of DMT as a chemical messenger from an extraterrestrial civilization, the Amazonian shamanic perspective on Invisible Entities, morphic resonance, and the science behind hallucinations. Contributors to the talks and discussions include many leading thinkers in this field, including Rupert Sheldrake, Rick Strassman, Dennis McKenna, Graham Hancock, Jeremy Narby, Erik Davis, Ede Frecska, Luis Eduardo Luna, Bernard Carr, Robin Carhart-Harris, Graham St. John, David Luke, Andrew Gallimore, Peter Meyer, Jill Purce, William Rowlandson, Anton Bilton, Vimal Darpan, Santha Faiia, and Cosmo Feilding Mellen.

With the economic crisis that began in 2008, a long-standing trend toward increased regulation is becoming a flood. The clamor for improved enterprise risk management and the complexity of multinational compliance present executives with a dramatically new array of challenges. Governance should offer solutions, but it is clear that yesterday's governance practices aren't up to the task. In both design and implementation, they are too disconnected and incomplete to fully address our complex compliance and risk management puzzle. Executives get only fragmented views of their true business performance, and inefficiencies drive up costs. The consequences of inadequate governance were demonstrated in the economic meltdown of 2008. As the world struggles to recover from that crisis, business is now faced with a confusing array of evolving regulations, the challenge of managing compliance across multinational organizations and a new imperative for risk management that is coordinated across the enterprise. It's clear that yesterday's governance practices don't meet today's need for centralized controls, integrated compliance and risk management and greater transparency. The need for organizations to change—and change now—is clear. Under Control captures decades of business governance experience from many of the leading authorities at CA, Inc. This book sets out not only to explain the essential challenges of effective business governance, but to help you build solutions for your organization based on lessons learned at CA from its customers and in its own corporate structure. From governing the organization's policies as a whole instead of in silos, to a department-by-department look at the role and impact of governance, to governing your green initiatives, to the role of the board of directors, to the importance of risk management, this book lays out some of the strategies and processes that may help

your organization manage its risk and regulatory requirements. It is clear that the governance standards in the past were inadequate, and that risks have not been properly assessed or understood. This book is a first step in solving this problem so that your organization is prepared and able to respond and thrive in today's rapidly evolving environment. Under Control is the first book published in the new CAPress imprint, a joint publishing program between Apress and CA Inc. "One of the defining factors of the first decade of the 21st century has been the increase of regulation and governance. To explain these trends, and the various best practices for ensuring governance, enterprise IT management solutions provider CA Inc. enlisted more than a dozen subject matter experts from its ranks to contribute content. The resulting book explores the need for broad governance, different areas where governance is important, and various ways for organizations to manage and implement compliance, including IT governance, project portfolio management, information governance and sustainability management. The book, while largely vendor-neutral, draws on CA's experience creating governance solutions as well as managing its own governance issues." —Aaron Smith, Projects@Work

Examines the English ode as it was written during the period extending from the middle of the seventeenth century to the middle of the nineteenth century and considers the development of the form and uses to which it was put by writers who varied considerably in outlook, inspiration, and ability in order to present a history of the English ode, to consider the special values of the form, and to weigh the effect ode writing had upon the prosody of lyric verse.

**Three Case Studies** Springer Science & Business Media

This book is about HCI research in an industrial research setting. It is based on the experiences of two researchers at the IBM T. J. Watson Research Center. Over the last two decades, Drs. John and Clare-Marie Karat have conducted HCI research to create innovative usable technology for users across a variety of domains. We begin the book by introducing the reader to the context of industrial research as well as a set of common themes or guidelines to consider in conducting HCI research in practice. Then case study examples of HCI approaches to the design and evaluation of usable solutions for people are presented and discussed in three domain areas: - item Conversational speech technologies, - item Personalization in eCommerce, and - item Security and privacy policy management technologies In each of the case studies, the authors illustrate and discuss examples of HCI approaches to design and evaluation that worked well and those that did not. They discuss what was learned over time about different HCI methods in practice, and changes that were made to the HCI tools used over time. The Karats discuss trade-offs and issues related to time, resources, and money and the value derived from different HCI methods in practice. These decisions are ones that need to be made regularly in the industrial sector. Similarities and differences with the types of decisions made in this regard in academia will be discussed. The authors then use the context of the three case studies in the three research domains to draw insights and conclusions about the themes that were introduced in the beginning of the book. The Karats conclude with their perspective about the future of HCI industrial research. Table of Contents: Introduction: Themes and Structure of the Book / Case Study 1: Conversational Speech Technologies: Automatic Speech Recognition (ASR) / Case Study 2: Personalization in eCommerce / Case Study 3: Security and Privacy Policy Management Technologies / Insights and Conclusions / The Future of Industrial HCI Research *Law and Inflation* Guinness World Records Limited Under Control Governance Across the Enterprise Apress *Governance Across the Enterprise* Lonely Planet An Incredibly Humorous Coloring book for Kids and Adults! *Trek* Simon and Schuster Predator 500, 2003-2007; Predator 500 (Troy Lee Designs) 2005-2006

**Antique Watches and how to Establish Their Age** Peachpit Press

The work will explore issues related to educational leadership in various settings in the 21st century. It will argue that the context for leadership within many nation states and international scenarios involves interaction between multiple and diverse social cultures. A further proposition is that the dominant leadership theory and discourse in the past reflects forms of western hegemony and mono-cultural assumptions drawn largely from the Anglo-American worldview. It will argue that such frameworks have limited validity in multicultural societies such as Australia, Britain, Canada, Europe and the USA and with indigenous communities within such nations. These societies contain significant populations which do not share the core values which inform established leadership practice and institutional paradigms in such nations. The consequence can often be insensitivity towards non-mainstream cultures, inappropriate structures, failed interventions and alienation of individuals from major institutions

and traditions. Another proposition is that as more developing nations increase in affluence and view education as a key economic strategy, they become increasingly exposed to western discourses about leadership and management. Whilst acknowledging that western traditions have much to offer, there is a danger that this can involve forms of cultural imperialism whereby local traditions are ignored or subjugated. There is a need for developing nations to recognise and value the traditions and practices from their own cultures and assess the extent to which they are compatible with borrowings from other nations. Such processes require a sophisticated degree of reflective analysis to determine potential compatibilities and conflicts. This is an alternative to unmediated cultural borrowing, cloning, and hybridization. Western leadership scholars who work in such contexts have some responsibility to address this interaction instead of blithely offering practices and recipes from their metropolitan world views. The final proposition is that there is a need to develop models and practices for intercultural dynamics which are responsive to intercultural complexity. When these are thoroughly developed there will be clear implications for education. The unique features of this book include; • It introduces a new theoretical perspective on leadership and intercultural issues which builds upon the previous work of cross-cultural theorists from previous decades in educational leadership discourse • It will explore the three primary contexts for leadership and intercultural interaction; with indigenous communities in nation states, with multicultural communities in nation states and with international education and development programs • The book will draw upon a variety of authors from across the globe; from Australia, Britain, Canada, China, Fiji, Hong Kong, Mexico Sweden and the United States • The book will provide opportunities for the development of comparative and wide ranging perspectives within specific fields. For instance students will be able to compare issues related to indigenous education in New Zealand, Canada and Fiji. Multicultural perspectives can be informed by experiences from Britain, Canada and the US. One of the strong chapters in the book is on A First Nation leadership program in the US. International programs can be compared from contexts as diverse as Bellarus, China and Pacific Islands. • As such the book will supplement and challenge the mono-cultural texts which tend to dominate leadership preparation programs in both developed and developing nations. The intended audience for this book includes academics and students in the fields of education, health, public administration and community development in both the developed and developing world. It will also appeal to practitioners in national state and local sites who operate in intercultural contexts.

**A Working Theory of Love** Haynes Manuals N. America, Incorporated

How can professionals maintain or improve the quality of care they provide when pressured by payers to reduce the cost of care? Clinicians today face the challenge of providing optimal care in an environment where costs drive clinical practice. But high quality, not cost, remains the goal of professionals. By arming themselves with measurable results, clinicians can improve the processes of delivering mental health care and translate those improvements into better outcomes for patients and their families. In this timely guide, the editors have gathered the work of 49 distinguished contributors and crafted a valuable resource for overcoming the extraordinary challenge of delivering high quality mental health care. This groundbreaking book is divided into three sections: The challenges today's clinicians face in providing optimal mental health care -- Beginning with a review of the report to then-President Clinton from the Advisory Commission on Consumer Protection and Quality in the Health Care Industry, subsequent chapters discuss professional ethics and managed care, how Wall Street investors are changing the practice of medicine, problems faced by managed care, and

changes needed in medical education to ensure that physicians are well prepared to practice medicine in the 21st century. Proven techniques for quality measurement -- Measuring quality of care presents significant conceptual and methodological problems. These chapters review quality measurement methods and describe support by the federal government to improve these methods. Also addressed are how consumers are joining the quality of care measurement movement and how one large urban county mental health program is advancing quality measurement. Fourteen case reports of quality improvement projects -- These chapters detail principles and techniques that can be replicated or tailored to fulfill the requirements of a variety of clinical settings, ranging from the national health service in Great Britain to a small geriatric unit in a large hospital. The work showcased here was done by clinicians or administrators who, concerned about the quality of care in their own settings, used data to test for themselves whether their interventions resulted in improved care. Even if managed care disappeared, we would still need to question, examine, and improve the quality of patient care -- with clinicians taking the lead, because only they can appreciate the subtle nuances that maintain or improve quality standards, and only they can make substantive changes in their clinical settings. As both a broad conceptual framework for considering the quality of mental health care and as a practical field guide to real-life techniques for measuring the quality of care, this volume will prove exceptionally valuable for mental health care professionals, administrators, and policymakers as well as for consumers and consumer advocates, researchers, students, and public health professionals.

*Improving Mental Health Care* "O'Reilly Media, Inc."

Our story begins with Charles Culver, a hyper-imaginative boy flustered by the mundane reality of the world he inhabits. Attempting to make a great escape from the tedium, he discovers a zany invention called the Magic Go-Kart, and sets launch on an electrifying flight of fancy to the center of the Mirth, a mystical island harboring blunderous creatures and perilous adventure. *Color My Butt* Holt Rinehart & Winston Making friends can sometimes be a daunting experience, as Toad knew only too well. One day, Water Snail approaches Toad and offers to coach him on how to make friends. Happy to be getting help, Toad practices saying hello to an unsuspecting shrimp, with funny consequences. Follow Toad's bravery as he tries to make friends with a whole range of animals and insects, with heart-warming results.

**A Study of 1400 Cases of Rape** powerHouse Books

Itching to build interesting projects with Drupal, but confused by the way it handles design challenges? This concise guide helps small teams and solo website designers understand how Drupal works by demonstrating the ways it outputs content. You'll learn how to manage Drupal's output, design around it, and then turn your design into a theme. In the second of three volumes on Drupal design, award-winning designer Dani Nordin takes you beyond basic site planning and teaches you key strategies for working with themes, layouts, and wireframes. Discover how to use Drupal to make your vision a reality, instead of getting distracted by the system's project and code management details. Learn strategies for sketching, wireframing, and designing effective layouts Break down a Drupal layout to understand its basic components Understand Drupal's theme layer, and what to look for in a base theme Work with the 960 grid system to facilitate efficient wireframing and theming Manage Drupal markup, including the code generated by the powerful Views module Use LessCSS to organize CSS and help you theme your site more efficiently *Designing and Evaluating Usable Technology in Industrial Research* Courier Corporation This 1935 study on rape was conducted by the American Social Hygiene Association.
