Hodding Carter writes, "The unsung hero of human history was, of course, the Brain of Drains, the Hub of Tubs, the Power of Showers, the Brewer of Sewers...the humble plumber.... The Irish may have saved civilization, once, but plumbers have done so countless times." When we consider the amenities that really make a difference in our well-being, surely good plumbing must rank near the top. But rarely have we taken the time to appreciate the engineering marvels that bring clean water into our homes with the turn of a tap and wash our waste products away with the flip of a lever. Until now. Witty, anecdotal, and thoroughly entertaining, *Flushed* not only chronicles the long and notable history of plumbing, but follows Hodding Carter's travels and travails as he casts his own Roman lead water pipes inspired by the writings of Pliny the Elder, descends into the sewers of London, installs a state-of-the-art Japanese toilet in his bathroom, and fearlessly tries to

understand everything about this most underappreciated pillar of civilization. A winning combination of history, science, and firsthand experience, *Flushed* will entertain and educate all those who have never contemplated the hidden intricacies of this miracle of everyday technology.
