The second generation Range Rover was arguably Land Rover's first model designed as a luxury vehicle. It was a major leap for the company, but a very successful one as well. Despite controversy over its looks, and some initial teething problems, it became a worthy successor to the much-loved original. *Range Rover Second Generation The Complete Story* draws on the memories of designers and engineers as well as on a wide variety of factory sources to provide the most authoritative history of the mode yet. The book covers the full development history; the changes during eight years of production; Range Rovers for the North American market; full technical specifications and finally Range Rovers and the emergency services. A companion volume to the author's *Range Rover First Generation - The Complete Story* (Crowood 2018).

It forced the government, employers and trade unions to align themselves to new realities. There is an ongoing transition in industrial relations on the global scale as well. Employee Relations Management focuses on this ongoing transition from industrial relations to employee relations. A roadmap for understanding the business challenges and opportunities in China By 2025, China and India will be two of the world's four largest economies. By then, economic ties between them should also rank among the ten most important bilateral ties worldwide. Their leaders are well aware of these emerging realities. In May 2013, just two months after taking charge, Premier Li Keqiang left for India on his first official trip outside China, a clear signal of China's foreign policy priorities. The Silk Road Rediscovered is the first book ever to analyze the growing corporate linkages between India and China. Did you know that: India's Mahindra is the fifth largest tractor manufacturer in China? Tata Motors' Jaguar Land Rover unit is the fastest growing luxury auto seller in China? India's NIIT is the most influential IT training brand in China? China's Huawei has its second largest R&D center in Bangalore and employs over 5000 people in India? Shanghai Electric earns its largest revenues outside China from India? As these developments illustrate, pioneering Indian and Chinese companies are rediscovering the fabled Silk Road which joined their nations in ancient times. Winning in each other's markets is also making them stronger and whetting their appetite for further

global expansion. This book examines how Indian companies such as Tata Consultancy Services, Mahindra Tractors, NIIT, Tata Motors/Jaguar Land Rover and Sundaram Fasteners have figured out how to win in China. Their experiences may inspire and offer lessons to other Indian companies. The book also examines how Chinese pioneers such as Lenovo, Huawei, TBEA, Haier and Xinxing have made a strong commitment to India and are beginning to realize the fruits of this commitment. The key lessons that emerge from these analyses are: the odds of success go up dramatically when executives adopt a global rather than local-for-local perspective and are skillful at learning on the ground.

Today, some suppliers have grown

increasingly powerful and in certain cases, earn revenues that rival or even exceed that of their automaker clients. In the pre-globalisation period, automakers wielded absolute power over their significantly smaller suppliers. This book reveals the upending of this relationship, with the gradual shift in the balance of power from automakers to their suppliers in this era of globalisation. The book examines how suppliers in the global tyres, seats, constant velocity joints (hereafter 'CVJs'), braking systems and automotive semiconductor industries have evolved into powerful oligopolies through a mix of acquisition and organic growth strategies. It also highlights how joint ventures could be strategically deployed as springboards to acquisition, as they enable firms to familiarise themselves with their partners' markets and operations. Moreover, the book analyses the disruption stirred by the entry of well-resourced technology titans into this industry and their inevitable clash with the traditional incumbents. This book is an invaluable reference for anyone interested in learning more about the automakers' and now their suppliers' relentless quest to create market-dominating intelligent driving systems.

The ecologist and author of *Soil & Soul* makes a compelling and provocative argument for a new way of life in the face of climate change. Climate change is the greatest challenge that the world has ever faced. In this groundbreaking book, Alastair McIntosh summarizes the science of what is happening to the planet using his home country of Scotland as a case study. He then

argues that the root of our climate crisis is not in our politics but in our consumerism—an addictive mentality where wants have replaced needs and consumption drives our very identity. In a fascinating journey through literature that speaks to climate change—including the ancient Sumerian Epic of Gilgamesh, Plato's myth of Atlantis, and Shakespeare's Macbeth—McIntosh reveals the psychohistory of modern

consumerism. He shows how we have fallen prey to a numbing culture of violence and the manipulation of marketing. Only when we resist these vices and face reality will we discover the spiritual meaning of our troubled times. Only then can magic, new meaning, and all that gives life, start to mend a broken world. "What [McIntosh] does brilliantly here is offer an alternative, deeply humanist version of green politics." —The Scotsman, UK
