How I Made 2,00,000 In The Stock Market
Nicholas Darvas, author of How I Made 2,000,000 in the Stock Market, concluded that Wall Street was nothing more than a huge gambling casino. It bristled with dealers, croupiers and touts--and he

explained all of this in a later highly successful book, Wall Street: The Other Las Vegas. How I Made 2,000,000 in the Stock Market is an extraordinary book. It tells one of the most unusual success stories in the history of the stock market. Darvas was not a stock market professional trading on inside information. He was one half of the highest paid dance team in show business. Ye he was able to make himself a millionaire several times over by his unique investment approach. Unlike other so--called systems, it worked regardless of whether the market rose or

fell. When news of Darvas' fantastic profits and methods leaked out, he was featured in Time Magazine. He then was persuaded to write a book which became an instant hit, selling nearly 200,00 copies in eight weeks. Many of the companies talked about in this book no longer exist. Many of the stocks are no longer traded. Nevertheless, the basic principles are as sound as ever.

 The empowering story of Larry Hite's unlikely rise to the top of the hedge fund world—with critical insights and lessons you can take to the bank In *The Rule*, legendary trader and hedge fund pioneer Larry Hite recounts his working-class upbringing in Brooklyn as a dyslexic, partially blind kid who was anything but a model student—and how he went on to found and run Mint Investment Management Company, one of the most profitable and largest quantitative hedge funds in the world. Hite's wild success is based on his deep understanding that markets are flawed—just like people. Through his early-life struggles and failures, Hite came to know himself well—his fears, his frustrations, his self-doubt, and his tolerance for all of the above. This motivational book reveals that by accepting the facts of his life and of himself, he was able to accept markets as they are. And that was the key to his success. In these pages, you'll walk of the footsteps of an investing legend, who imparts smart, practical trading lessons throughout the journey. Making a

successful living in trading isn't about beating the markets. It's about meeting markets where they are, embracing the fact of risk, knowing yourself, and playing it strictly by the numbers. *The Rule* shows that investing decisions are not only bets or gambles, but investments in time, energy, and attention. By focusing on realistic returns on your investments—versus what you expect or hope to get—you immediately improve your probability for success.

Comprehensive coverage of the four major trading styles Evolution of a Trader

explores the four trading styles that people use when learning to trade or invest in the stock market. Often, beginners enter the stock market by: Buying and holding onto a stock (value investing). That works well until the trend ends or a bear market begins. Then they try Position trading. This is the same as buy-and-hold, except the technique sells positions before a significant trend change occurs. Swing trading follows when traders increase their frequency of trading, trying to catch the short-term up and down swings. Finally, people try Day trading by completing their trades in a single day. This series provides comprehensive coverage of the four trading styles by offering numerous tips, sharing discoveries, and discussing specific trading setups to help you become a successful trader or investor as you journey through each style. *Trading Basics* takes an in-depth look at money management, stops, support and resistance, and offers dozens of tips every trader should know. *Fundamental Analysis and Position Trading* discusses when to sell a buy-and-hold position, uncovers which fundamentals work best, and uses them to find stocks that become 10-baggers—stocks that climb

by 10 times their original value. *Swing and Day Trading* reveals methods to time the market swings, including specific trading setups, but it covers the basics as well, such as setting up a home trading office and how much money you can make day trading.
