[Generator Set Neutral Earthing Fg Wilson - wakati.co](#)

Generator neutral (star point) is to be connected by insulated earthing conductor through the neutral earthing link or device to main earthing bar. Neutral earthing conductor is to be suitably sized to carry maximum earth fault current for time it takes the system protection to operate with final conductor temperature not exceeding 160 deg. C, but not less than 30 mm² per 100 kVA of generator rating, with a minimum of 50 mm².
