The ocean covers more than seventy percent of our planet, and yet we rarely

glimpse its depths - and especially its exquisite beauty as documented by legendary photographer David Doubilet. His work in and on water has set the standard for decades. In this remarkable and highly-anticipated collection by artist and diver David Doubilet, whose innovation, eye for beauty, and passion for conservation have long set the bar for underwater photography, Doubilet unites life above and below the water's surface. Spotlighting a stunning selection of images from Doubilet's 50-year career, spanning the Galapagos to the Red Sea, the icy waters of the Antarctic Ocean to the tropical Great Barrier Reef, the body of work raises important questions about conservation and global warming, topics never far from the headlines.
