Theory of Structures S. Chand Publishing
 The definitive programming guide to ASP.NET, by popular author and Microsoft MVP Imar Spaanjaars Updated for ASP.NET 4, this introductory book retains its helpful examples and step-by-step format from the previous version and keeps the style of offering code examples written in both C# and Visual Basic. Beloved author and Microsoft ASP.NET MVP walks you through ASP.NET, Microsoft's technology for building dynamically generated Web pages from database content. You'll discover many improvements that

ASP.NET 4 offers over the previous version, such as the ASP.NET MVC framework, Ajax improvements, jQuery support, and more. You'll gradually build a Web site example that takes you through the processes of building basic ASP.NET Web pages, adding features with pre-built server controls, designing consistent pages, displaying data, and more. Popular author and Microsoft ASP.NET MVP Imar Spaanjaars updates you on the latest updates to ASP.NET 4, Microsoft's technology for building dynamic Web pages from database content Shows you how the 4 version differs from ASP.NET 3.5 and reviews its new features, including the ASP.NET MVC framework, various Ajax improvements, jQuery support, and more Spaanjaars's distinct writing style puts you at ease with learning ASP.NET 4.

JPSC Mains Assistant Engineer Section-I (Objective Papers) for Civil Engineering with Previous Year Questiona S. Chand Publishing
 The basic principles of early disease detection, practical considerations, including the application of screening procedures in a number of different disease conditions, and, finally, present techniques and possible developments in methodology. Screening for the chronic non-communicable diseases prevalent in the more advanced countries forms the main subject of the report, but the problems facing countries at other stages of development and with different standards and types of medical care are also discussed, and because of this communicable disease detection is also death with to some extent.

Flow in Open Channels Routledge

The Author has over 40 years of experience in the construction field exposed to Contractors, Consultants, Clients and teaching environments. His special interest is Construction Auditing and he has done various researches, submitted articles to construction magazines and presented research papers at international conferences. His personal opinion is that the Construction Cost professional Institutions and the Professionals at large have completely ignored the field of construction auditing for a long time. The governments' construction expenditure, which now involve a significant portion of the budget of many countries mandated to be audited as check & balance. This government construction auditing exercise is still carried out by Financial Institutions under the name of Performance Auditing. The lack of interest by the Cost Construction professional Institutions resulted in the continuation of Performance Auditing by Financial Accountants. Construction at present is huge, complicated, involving different entities with various Contractual arrangements. The Financial Accountants do not have the sufficient skill to audit construction in the present environment and the results are plain to see. The loss owing to Frauds in government double (internal & external) audited construction has reached upwards of US \$ 4 Trillion per year according to Transparency International. That is US \$ 1.50 per head per day of the entire world population. This is an affront to the 21 century as more than a Billion people live below US \$ 1.25 per day. The immediate requirement is a Post- Graduate course on Construction Auditing, Construction Auditing standards and a union for such auditors. The author hopes that this book will serve some purpose in that long exercise. The book can also be helpful to practicing construction professionals and students following construction related courses. . The other books by the author How To Win and Manage Construction Projects Published by Authorhouse Irregularities, Frauds and The Necessity of Technical Auditing in Construction Industry. Published by Authorhouse How To Be Successful At Interviews" Published by Notionpress, India.

Objective Civil Engineering By GK Mithal John Wiley & Sons

This book is meant for diploma students of chemical engineering and petroleum engineering both for their academic programmes as well as for competitive examination. This book Contains 18 chapters covering the entire syllabus of

diploma course in chemical engineering and petrochemical engineering. This book in its present form has been designed to serve as an encyclopedia of chemical engineering so as to be ready reckoner apart from being useful for all types of written tests and interviews faced by chemical engineering and petrochemical engineering diploma students of the country. Since branch related subjects of petrochemical engineering are same as that of chemical engineering diploma students, so this book will be equally useful for diploma in petrochemical engineering students.

Textbook of Strength of Materials [Concise Edition] Upkar Prakashan

Common Aptitude Test or popularly known as CAT is dream and most popular exam amongst students who wants to persue career in management. But as common its name is, it is the toughest exam in India and needs thorough concept clarity and immense practice. CAT, today is doorway to some of the best B-Schools in India and hence thousands of students appear every year for the examination. The current edition of "Face To Face CAT" has been carefully and consciously revised to reinforce the conceptual clarity in the aspirants by providing the Sectionwise and Topicwise previous 27 Years' (1993-2019) Questions along with the detailed solutions. The book is basically divided into 3 sections; Quantitative Aptitude, Data Interpretation and Logical Reasoning, and Verbal Ability and Reading Comprehension, which is exactly according to the paper pattern giving the complete coverage of the entire syllabus. 3 Previous Years' Questions Papers [2019 -2017] are being provided right in the beginning of the book that gives the insight of the pattern of the examination which help candidates to prepare accordingly. Moreover 3 Practice Papers are also attached at the end of the book for thorough practice which also helps to track the self progress. With such voluminous set of questions that too in sectionwise and topicwise manner, it offers a robust tool to attune aspirants with constant self-evaluation to move on the way for success in this exam. TABLE OF CONTENTS Introduction: CAT (About the Exam & How to Succeed in it?), CAT Solved Paper 2019, CAT Solved Paper 2018, CAT Solved Paper 2017, SECTION-I: Quantitative Aptitude, SECTION-II: Data Interpretation and Logical Reasoning, SECTION-III: Verbal Ability and Reading Comprehension, Practice Sets (1-3).

Surveying and Levelling S. Chand Publishing

For a decade, Structural Engineering

(Conventional and Objective Type) has provided fundamental knowledge of the subject to the students of Civil Engineering and aspirants of GATE students. Divided in 10 parts, each of which delves in primary topics of the subject. Major topics which are dealt with Structural Materials, Architectural Materials, Solid Mechanics and Structural Systems, Design of Steel Structures, Design of Reinforced Concrete Structures, Design of Prestressed Concrete Structures, Design of Masonry and Timber Structures, Construction Technology, Soil Mechanics & Foundation Engineering and GATE Questions.

Textbook of Refrigeration and Air Conditioning KHANNA PUBLISHING

This book contains exhaustive collection of more than 6500+ MCQs with solution explained in easy language for engineering students of Electrical Engineering. In addition, the questions have been selected from various competitive exams to give the students an understanding of various types of exams. This book is essential to candidates appearing for U.P.S.C. (Engineering & Civil Services), State and Central Level Services Exams: Assistant Engineer /Junior Engineer, SSC-JE, RRB-JE, State Electricity Boards (APPGC, ASEB, BSPHCL, CSPGCL, HPGC, JSEB, KPCL, KSEB, MPPGCL, MSEB, RSEB, UPRVUNL, WBPDCL, OPGC, TNEB, TPGC, PSPCL, JTO, PSUs : NPCIL, PGCIL, NHPC, PSOC, NLC, DVC NTPC, REC, BEST, KPTCL, TNEB and Metro Exams Like : DMRC, LMRC, NMRC, JMRC, BMRC, HMLR, KMRR, MMRR, PMRR and Admission/Recruitment Test and other Technical Exams in Electrical Engineering. *R.C.C. Mechanical Engineering (O.T.) Elsevier

The State of the World's Land and Water Resources for Food and Agriculture is FAO's first flagship publication on the global status of land and water resources. It is an 'advocacy' report, to be published every three to five years, and targeted at senior level decision makers in agriculture as well as in other sectors. SOLAW is aimed at sensitizing its target audience on the status of land resources at global and regional levels and FAO's viewpoint on appropriate recommendations for policy formulation. SOLAW focuses on these key dimensions of analysis: (i) quantity, quality of land and water resources, (ii) the rate of

use and sustainable management of these resources in the context of relevant socio-economic driving factors and concerns, including food security and poverty, and climate change. This is the first time that a global, baseline status report on land and water resources has been made. It is based on several global spatial databases (e.g. land suitability for agriculture, land use and management, land and water degradation and depletion) for which FAO is the world-recognized data source. Topical and emerging issues on land and water are dealt with in an integrated rather than sectoral manner. The implications of the status and trends are used to advocate remedial interventions which are tailored to major farming systems within different geographic regions.

Mechanical Engineering (objective Type). CBS Publishers & Distributors Pvt Limited, India

I feel elevated in presenting the New edition of this standard treatise. The favourable reception, which the previous edition and reprints of this book have enjoyed, is a matter of great satisfaction for me. I wish to express my sincere thanks to numerous professors and students for their valuable suggestions and recommending the patronise this standard treatise in the future also.

Principles and Practice of Screening for Disease S. Chand Publishing

This book is meant for diploma & degree student of metallurgical engineering for their academic programs as well as for various competitive examination for securing jobs. This book has been structured in three sections. First section contains multiple choice type questions of various subjects of metallurgical engineering. Second section contains chapter wise question of GATE (Graduate Aptitude Test in Engineering) from 1991 to 2016. Third section contains SHORT QUESTIONS & ANSWERS in METALLURGICAL ENGINEERING. Fourth section contains APPENDICES containing Glossary of terms related to Metallurgical Engineering and Q&A of GATE-2017. This book has been designed to serve as "Hand Book of Metallurgical Engineering" which will be useful for various competitive examinations for recruitment in various public sector & Private Sector companies as well as for GATE Examination. Questions have been arranged subject wise and answers are given at the bottom of the page.

Civil Engineering (Objective Types) S. Chand Publishing

A Textbook of workshop

Technology (Manufacturing Processes) to

the students of degree and diploma of all the Indian and foreign universities. The object of this book is to present the subject matter in a most concise, compact, to the point and lucid manner. While writing the book, we have constantly kept in mind the various requirements of the students. No effort has been spared to enrich the book with simple language and self-explanatory diagrams. Every care has been taken not to make the book voluminous, as the students have also to face other subjects of equal importance.

Face To Face CAT 27 years Sectionwise & Topicwise solved paper 2020 Civil Engineering (Conventional & Objective Type) Civil Engineering Objective Type Mechanical Engineering (objective Type) Civil Engineering (Objective Types) Structural Engineering [Conventional and Objective Type]

This text on building materials includes discussion of structural clay products, rocks and stones, wood, materials for making concrete, ferrous and non-ferrous metals, and miscellaneous materials. *Structural Engineering [Conventional and Objective Type]* Routledge The Multicolor Edition Has Been thoroughly revised and brought up-to-date. Multicolor pictures have been added to enhance the content value and to give the students and idea of what he will be dealing in reality, and to bridge the gap between theory and Practice.

Design of Bridge Structures Tata McGraw-Hill Education

While writing the book, we have continuously kept in mind the examination requirements of the students preparing for U.P.S.C. (Engg. Services) and A.M.I.E. (I) examinations. In order to make this volume more useful for them, complete solutions of their examination papers up to 1975 have also been included. Every care has been taken to make this treatise as self-explanatory as possible. The subject matter has been amply illustrated by incorporating a good number of solved, unsolved and well graded examples of almost every variety.

Civil Engineering Infinity Educations Ideal for students on all construction courses Topics presented concisely in plain language and with clear drawings Updated to include revisions to Building and Construction regulations The Building Construction Handbook is THE authoritative reference for all construction students and professionals. Its detailed drawings clearly illustrate the construction of building elements, and have been an invaluable guide for builders since 1988. The principles and processes of

construction are explained with the concepts of design included where appropriate. Extensive coverage of building construction practice, techniques, and regulations representing both traditional procedures and modern developments are included to provide the most comprehensive and easy to understand guide to building construction. This new edition has been updated to reflect recent changes to the building regulations, as well as new material on the latest technologies used in domestic construction. Building Construction Handbook is the essential, easy-to-use resource for undergraduate and vocational students on a wide range of courses including NVQ and BTEC National, through to Higher National Certificate and Diploma, to Foundation and three-year Degree level. It is also a useful practical reference for building designers, contractors and others engaged in the construction industry.

Through Objective Type Questions

Engineers Academy Publications

GKP's 'Objective' series has been used by engineering students over the years to prepare for GATE, PSU examinations and campus recruitment tests. The series includes five books i.e. Computer Science and IT, Electrical, Electronics and Communication, Mechanical and Civil. In order to make students thorough with the variety of questions, each book in this series provides them with questions segregated into two sections. The first section includes a set of practice exercise under each topic and the second section provides previous year's questions of exams such as GATE and various PSU exams. Each question in the later section has been tagged with the exam name to make the preparation all the more easier. This combination of conceptual questions and previous year's questions would completely solve the purpose of the students for a quick practice with complete preparation for the exam. The books in this series will also be helpful to prepare for the technical section of various campus recruitment tests.

The State of the World's Land and Water Resources for Food and Agriculture S. Chand Publishing

This edition has been thoroughly revised and enlarged. It is still considered to be a must for all those sitting Civil Engineering examinations.

Civil Engineer's Handbook of Professional Practice G.K Publications Pvt. Limited Principles of Engineering Mechanics is written keeping in mind the requirements of the Students of Degree, Diploma and A.M.I.E. (I) classes. The objective of this

book is to present the subject matter in a most concise, compact, to-the-point and lucid manner. All along the approach to the subject matter, every care has been taken to arrange matter from simpler to harder, known to unknown with full details and illustrations. A large number of worked examples, mostly examination questions of Indian as well as foreign universities and professional examining bodies, have been given and graded in a systematic manner and logical sequence, to assist the students to understand the text of the subject. At the end of each chapter, a few exercises have been added, for the students, to solve them independently. Answers to these problems have been provided.

Objective Civil Engineering McGraw Hill Education (India) Pvt Ltd

The construction of buildings and structures relies on having a thorough understanding of building materials.

Without this knowledge it would not be possible to build safe, efficient and long-lasting buildings, structures and dwellings. Building materials in civil engineering provides an overview of the complete range of building materials available to civil engineers and all those involved in the building and construction industries. The book begins with an introductory chapter describing the basic properties of building materials. Further chapters cover the basic properties of building materials, air hardening cement materials, cement, concrete, building mortar, wall and roof materials, construction steel, wood, waterproof materials, building plastics, heat-insulating materials and sound-absorbing materials and finishing materials. Each chapter includes a series of questions, allowing readers to test the knowledge they have gained. A detailed appendix gives information on the testing

of building materials. With its distinguished editor and eminent editorial committee, Building materials in civil engineering is a standard introductory reference book on the complete range of building materials. It is aimed at students of civil engineering, construction engineering and allied courses including water supply and drainage engineering. It also serves as a source of essential background information for engineers and professionals in the civil engineering and construction sector. Provides an overview of the complete range of building materials available to civil engineers and all those involved in the building and construction industries Explores the basic properties of building materials featuring air hardening cement materials, wall and roof materials and sound-absorbing materials Each chapter includes a series of questions, allowing readers to test the knowledge they have gained
