Legendary Motocross Bikes Haynes Manuals N. America, Incorporated

This book discusses all important aspects of emergency medicine in older people, identifying the particular care needs of this population, which all too often remain unmet. The up-to-date and in-depth coverage will assist emergency physicians in identifying patients at risk for adverse outcomes, in conducting appropriate assessment, and in providing timely and adequate care. Particular attention is paid to the common pitfalls in emergency management and means of avoiding them. Between 1980 and 2013, the number of older patients in emergency departments worldwide doubled. Compared with younger patients, older people suffer from more comorbidities, a higher mortality rate, require more complex assessment and diagnostic testing, and tend to stay longer in the emergency department. This book, written by internationally recognized experts in emergency medicine and geriatrics, not only presents the state of the art in the care of this population but also underlines the increasing need for adequate training and development in the field.

Honda CR125R and CR250R 1992-1997 Crowood

"Don't get me wrong. I loved my sister. I never, not once, wished her dead." Brady and Sabine Wilson are sisters born eleven months apart, but they couldn't be more different. Popular Sabine, the head cheerleader dating the high school hunk, seems to have all the luck, while her younger, artsy sister "Brady Brooder" is a loner who prefers the sidelines to the limelight. After Sabine dies in a horrific cheerleading accident, grief unravels Brady and her family. Once recognized for her artistic talent, 17-year-old Brady finds herself questioning the value of everything she once held dear. Her best friend betrays her. Her parents' marriage is crumbling. And the boy everyone blames for the accident seems to be her only ally in the search for answers in the wake of her sister's death. As an unlikely friendship emerges, Brady learns more about Sabine—and love—than she bargained for.

Motocross & Off-road Performance Handbook Harper Collins

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.
