This comprehensive treatment of Neo-Kantianism discusses the main topics and key figures of the movement and their intersection with other 20th-century philosophers. With the advent of phenomenology, existentialism, and the Frankfurt School, Neo-Kantianism was deemed too narrowly academic and science-oriented to compete with new directions in philosophy. These essays bring Neo-Kantianism back into

contemporary philosophical discourse. They expand current views of the Neo-Kantians and reassess the movement and the philosophical traditions emerging from it. This groundbreaking volume provides new and important insights into the history of philosophy, the scope of transcendental thought, and Neo-Kantian influence on the sciences and intellectual culture. In the company of a Mahatma, We Watch the

seeker Grow The Autobiography of a saint is an experience in Truth. In, it, we are introduced to variety of experiences that constitute the life of a seeker. Ishvara Darshan narrates the journey of Subramaniam, a young seeker from Kerala who grew into the venerated rishi Swami Tapovan Maharaj. Deftly weaved into the narrative on the natural beauty of the Himalayas, a place that he seldom left, and his reminiscences of the spiritual leaders he met. Narrated in third person,

Ishvara Darshan is a book where its author unfolds his own evolution as neutral observer, uninvolved in the proceedings that make up his life. Translated from the original Sanskrit, it is both a learning and a pilgrimage every seeker must take.

Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce

major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their

analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing. New States and their Political Origins New Central Book Agency What can be more vital to each of us than our health? Yet, despite unprecedented health care spending, the U.S.

health system is substantially underperforming, especially with respect to what should be possible, given current knowledge. Although the United States is currently devoting 18% of its Gross Domestic Product to delivering medical care; more than \$3 trillion annually and nearly double the expenditure of other advanced industrialized countries; the U.S. health system ranked only 37th in performance in a World Health Organization

assessment of member nations. In *Vital Directions for Health & Health Care: An Initiative of the National Academy of Medicine, the U.S. National Academy of Medicine (NAM, formerly the Institute of Medicine)*, which has long stood as the nation's most trusted independent source of guidance in health, health care, and biomedical science, has marshaled the wisdom of more than 150 of the nation's best researchers and health policy experts to assess opportunities for

substantially improving the health and well-being of Americans, the quality of care delivered, and the contributions of science and technology. This publication identifies practical and affordable steps that can and must be taken across eight action and infrastructure priorities, ranging from paying for value and connecting care, to measuring what matters most and accelerating the capture of real-world evidence. Without obscuring the difficulty of the changes needed, in

*Vital Directions*, the NAM offers an important blueprint and resource for health, policy, and leaders at all levels to achieve much better health outcomes at much lower cost.
