MAREN JAYCE

Donne ristrette Springer Nature

This timely book examines the ever-increasing prevalence of Central Purchasing Bodies (CPBs), analysing their use and structure across different EU Member States. It argues that since CPBs are only partially regulated at EU level, their operations will depend on the legislation of the individual Member States and more importantly on the States' distinct practices and traditions. Comparative contributions consider the legal nature and structures of CPBs across 12 Member States and the UK.
Advances and Updates in Diffuse Cystic Lung Diseases John Wiley

& Sons

Focusing on methodologies, applications and challenges of textual data analysis and related fields, this book gathers selected and peer-reviewed contributions presented at the 14th International Conference on Statistical Analysis of Textual Data (JADT 2018), held in Rome, Italy, on June 12-15, 2018. Statistical analysis of textual data is a multidisciplinary field of research that has been mainly fostered by statistics, linguistics, mathematics and computer science. The respective sections of the book focus on techniques, methods and models for text analytics, dictionaries and specific languages, multilingual text analysis, and the applications of text analytics. The interdisciplinary contributions cover topics including text mining, text analytics, network text analysis, information extraction, sentiment analysis,

web mining, social media analysis, corpus and quantitative linguistics, statistical and computational methods, and textual data in sociology, psychology, politics, law and marketing.

Diritto sanitario Acquired Heart Disease in Children: Pathogenesis, Diagnosis and Management

Obwohl die Arzneimitteltherapie zunehmend komplexer, risikoreicher und kostenintensiver wird, verharren die Arzneimittelversorgungsprozesse im Krankenhaus in überkommenen Strukturen und folgen traditionellen Prozessen. Entsprechend schlecht ist die Ergebnisqualität: Nach Infektionsgefahren stellen Medikationsfehler für Patienten im Krankenhaus das größte Risiko dar. Die Datenlage zu Patienten, die durch vermeidbare Medikationsfehler und horrenden Folgekosten geschädigt wurden, ist erdrückend. Obwohl dies seit Jahren bekannt ist, geschieht bislang wenig. Doch die Situation wird sich in Kürze ändern müssen. Struktur-, Prozess- und Ergebnisqualität stehen auf der aktuellen politischen Agenda ganz oben und der Arzneimittelversorgungsprozess ist ein wichtiger Querschnittsprozess mit erheblichem Einfluss auf die Ergebnisqualität. Der geschlossene Medikationsprozess (Closed Loop of Medication Administration) mit elektronischer Verschreibung, pharmazeutischer Validierung und Unit-Dose-Versorgung ist der Goldstandard zur Lösung prozessualer Probleme bei der Arzneimittelversorgung. Das Buch vermittelt mit direktem Praxisbezug alles Wissenswerte zum Aufbau des Closed Loop Medication Managements. Neben der theoretischen Aufarbeitung von Schwächen und Risiken des traditionellen Versorgungsprozesses liegt der Schwerpunkt auf konkreten praktischen Gesichtspunkten der innovativen

Arzneimittelversorgung. Im Fokus stehen die notwendige Infrastruktur, die Auswahl von Soft- und Hardware, das Changemanagement in Apotheke und Klinik sowie die Wirtschaftlichkeit.

Global Lessons from the COVID-19 Pandemic Frontiers Media SA

A comprehensive overview of the latest achievements, trends, and the current state of the art of this important and rapidly expanding field. Clearly and logically structured, the first part of the book explores the fundamentals of tissue engineering, providing a separate chapter on each of the basic topics, including biomaterials stem cells, biosensors and bioreactors. The second part then follows a more applied approach, discussing various applications of tissue engineering, such as the replacement or repairing of skins, cartilages, livers and blood vessels, to trachea, lungs and cardiac tissues, to musculoskeletal tissue engineering used for bones and ligaments as well as pancreas, kidney and neural tissue engineering for the brain. The book concludes with a look at future technological advances. An invaluable reading for entrants to the field in biomedical engineering as well as expert researchers and developers in industry.

Comorbidities in Psoriatic Arthritis and their Impact on Therapeutic Strategies Edizioni Epoké

Widely regarded as the definitive reference in the field, Youmans and Winn Neurological Surgery offers unparalleled, multimedia coverage of the entirety of this complex specialty. Fully updated to reflect recent advances in the basic and clinical neurosciences, the 8th Edition covers everything you need to know about

functional and restorative neurosurgery, deep brain stimulation, stem cell biology, radiological and nuclear imaging, and neuro-oncology, as well as minimally invasive surgeries in spine and peripheral nerve surgery, and endoscopic and other approaches for cranial procedures and cerebrovascular diseases. In four comprehensive volumes, Dr. H. Richard Winn and his expert team of editors and authors provide updated content, a significantly expanded video library, and hundreds of new video lectures that help you master new procedures, new technologies, and essential anatomic knowledge in neurosurgery. Discusses current topics such as diffusion tensor imaging, brain and spine robotic surgery, augmented reality as an aid in neurosurgery, AI and big data in neurosurgery, and neuroimaging in stereotactic functional neurosurgery. 55 new chapters provide cutting-edge information on Surgical Anatomy of the Spine, Precision Medicine in Neurosurgery, The Geriatric Patient, Neuroanesthesia During Pregnancy, Laser Interstitial Thermal Therapy for Epilepsy, Fetal Surgery for Myelomeningocele, Rehabilitation of Acute Spinal Cord Injury, Surgical Considerations for Patients with Polytrauma, Endovascular Approaches to Intracranial Aneurysms, and much more. Hundreds of all-new video lectures clarify key concepts in techniques, cases, and surgical management and evaluation. Notable lecture videos include multiple videos on Thalamotomy for Focal Hand Dystonia and a video to accompany a new chapter on the Basic Science of Brain Metastases. An extensive video library contains stunning anatomy videos and videos demonstrating intraoperative procedures with more than 800 videos in all. Each clinical section contains chapters on technology specific to a clinical area. Each section contains a

chapter providing an overview from experienced Section Editors, including a report on ongoing controversies within that subspecialty.

Arzneimitteltherapiesicherheit im Krankenhaus John Wiley & Sons

Grounded in state-of-the-art research, this book explores how English language learners develop both the oral language and literacy skills necessary for school success. Chapters examine the cognitive bases of English acquisition, and how the process is different for children from alphabetic (such as Spanish) and nonalphabetic (such as Chinese) language backgrounds. The book addresses a key challenge facing educators and clinicians: identifying students whose poor English skills may indicate an underlying impairment, as opposed to still-developing language proficiency. Implications for diagnosis, intervention, and instruction are highlighted throughout.

Sfide e prospettive manageriali nella sanità che cambia

Antonio Giangrande

Antonio Giangrande, orgoglioso di essere diverso. ODIO OSTENTAZIONE ED IMPOSIZIONE. Si nasce senza volerlo. Si muore senza volerlo. Si vive una vita di prese per il culo. Tu esisti se la tv ti considera. La Tv esiste se tu la guardi. I Fatti son fatti oggettivi naturali e rimangono tali. Le Opinioni sono atti soggettivi cangianti. Le opinioni se sono oggetto di discussione ed approfondimento, diventano testimonianze. Ergo: Fatti. Con me le Opinioni cangianti e contrapposte diventano fatti. Con me la Cronaca diventa Storia. Noi siamo quello che altri hanno voluto che diventassimo. Facciamo in modo che diventiamo quello che noi avremmo (rafforzativo di saremmo) voluto diventare.

Rappresentare con verità storica, anche scomoda ai potenti di turno, la realtà contemporanea, rapportandola al passato e proiettandola al futuro. Per non reiterare vecchi errori. Perché la massa dimentica o non conosce. Denuncio i difetti e caldeggio i pregi italiani. Perché non abbiamo orgoglio e dignità per migliorarci e perché non sappiamo apprezzare, tutelare e promuovere quello che abbiamo ereditato dai nostri avi. Insomma, siamo bravi a farci del male e qualcuno deve pur essere diverso!

Textbook of Addiction Treatment Frontiers Media SA

This book focuses on new sensing technologies, measurement techniques, and their applications in medicine and healthcare. Specifically, the book briefly describes the potential of smart sensors in the aforementioned applications, collecting 24 articles selected and published in the Special Issue “Smart Sensors for Healthcare and Medical Applications”. We proposed this topic, being aware of the pivotal role that smart sensors can play in the improvement of healthcare services in both acute and chronic conditions as well as in prevention for a healthy life and active aging. The articles selected in this book cover a variety of topics related to the design, validation, and application of smart sensors to healthcare.

Local Area Planning in the Lombardy Region IPSOA

This vital guide takes a new approach to conduct and oppositional defiant disorders (CD and ODD), presenting the science in an accessible way to empower both parents and practitioners. Vanzin and Mauri cover a range of key topics, including distinguishing between typical and atypical behavioral development, how to choose the best course of treatment for a child and how parental behavior can help or hinder progress,

providing a comprehensive overview of these two disorders. In six clearly labeled chapters, the authors explain the science behind popular treatments, providing practical advice and clear, step-by-step instructions on how to approach challenging behavior. Written in concise and straightforward language, each chapter concludes with “important points” summarizing key information, designed to help those living or working with children suffering from behavioral disorders to both understand the nature of the disorders and achieve the best outcome for the child. The final chapter of the book presents an in-depth case study of a child with behavioral disorders, thoroughly detailing symptoms, treatment and outcome, providing a demonstration of best practice and affirming that challenging behavior can be effectively managed. Illustrated with clinical vignettes of the experiences of children living with CD and ODD, *Understanding Conduct Disorder and Oppositional-Defiant Disorder* is essential reading for parents and caregivers, as well as practitioners in clinical and educational psychology, counseling, mental health, nursing, child welfare, public healthcare and those in education.

Death and Mourning Processes in the Times of the Coronavirus Pandemic (COVID-19) BoD – Books on Demand

Depuis le 1er avril 2019, le Code de la commande publique réunit en un seul texte toutes les règles applicables aux marchés publics et aux concessions. Ouvrage de référence, ce manuel analyse les sources et notions fondamentales de la législation et de la réglementation relatives aux marchés publics et concessions, explicite le rôle de chacune des parties au contrat et étudie chronologiquement le déroulement de la vie du contrat, de sa passation à son exécution, aussi bien technique que financière. Chaque chapitre permet de saisir les règles, parfois subtiles, qui sont propres à chaque contrat et à son environnement : fondements théoriques et pratiques, objectif poursuivi et mise en oeuvre. Le contentieux des contrats de la commande publique est également pleinement abordé. Enfin, grâce à son approche pédagogique et opérationnelle, ce livre fournit toutes les clés de compréhension des régimes contractuels, jurisprudence et doctrine, indispensables à tous les praticiens du droit public. Cette 6e édition tient compte de la publication du Code de la commande publique, mais aussi de la loi n° 2019-486 du 22 mai 2019 relative à la croissance et la

transformation des entreprises dite « Loi Pacte » et du décret n° 2019-748 du 18 juillet 2019 relatif à la facturation électronique dans la commande publique. Cet ouvrage s'adresse aux universitaires, avocats, juristes et étudiants.

Centralising Public Procurement Frontiers Media SA

“This timely book provides insight into the changing role of the ‘hospital’ in the face of technological, organizational innovation and ever-tightening health budgets.” James Barlow, Imperial College Business School, UK “This book covers various relevant aspects of the hospital in different states and contexts. Underlining the importance of business models for future hospitals, this publication presents models of care from a historic and a current perspective. All authors possess a deep insight into different health care systems, not only as scholars but as experts working for world-renowned health policy institutions such as the World Health Organization, the World Bank or the European Observatory for Health Systems.” Siegfried Walch, Management Center Innsbruck, Austria “For an organisation like mine, representing those involved in the strategic planning of healthcare infrastructure, this book provides invaluable insights into what really matters – now and for the future – in the complex and contentious field of hospital development.” Jonathan Erskine, European Health Property Network, Netherlands This book seeks to reframe current policy discussions on hospitals. Healthcare services turn expensive economic resources—people, capital, pharmaceuticals, energy, materials—into care and cure. Hospitals concentrate the use and the cost of these resources, particularly highly-trained people, expensive capital, and embedded technologies. But other areas of health, such as public health and

primary care, seem to attract more attention and affection, at least within the health policy community. How to make sense of this paradox? Hospitals choose, or are assigned, to deliver certain parts of care packages. They are organised to do this via “business models”. These necessarily incorporate models of care – the processes of dealing with patients. The activity needs to be governed, in the widest senses. Rational decisions need to be taken about both the care and the resources to be used. This book pulls these elements together, to stimulate a debate.

Springer Nature

L'ACPI 2018 elenca le abbreviazioni comuni coniate ad uso degli Italiani contenute soprattutto in alcuni dei giornali quotidiani del 2018. Lo scopo è quello di facilitare la lettura e la comprensione dei testi che fanno uso della brachigrafia.

International Perspectives Edward Elgar Publishing

Improve your patients' quality of life with evidence-based, practical guidance on every aspect of today's dialysis. For more than 20 years, Henrich's Principles and Practice of Dialysis has been the go-to resource for comprehensive, accessible information on the challenges of managing the wide variety of patients who receive dialysis. This Fifth Edition brings you fully up to date with new chapters, a new eBook edition, two new editors and new contributors who offer practical experience and a fresh perspective. Clearly written and unique in scope, it helps you meet the growing demand for this procedure by providing a solid foundation in both basic science and clinical application.

Smart Sensors for Healthcare and Medical Applications Antonio Giangrande

This book collects the contributions of a number of clinical psychiatrists all over the world, interested in developing basic research about anxiety and in applying it in clinical contexts. It is divided into four sections, covering general issues about anxiety (ethological and developmental ones), basic research issues on specific aspects of anxiety (bioanatomical ones, correlation with personality structure and so on), and new clinical and therapeutical proposals and hypothesis. Each author summarized the clinical importance of his work, underlining the clinical pitfalls of this publication.

Cuidados intensivos en nefrología MWV

Per amore della Lombardia: capire il disastro per guarirne le ferite Ledizioni

Adverse outcomes of CKD, including endstage renal disease, cardiovascular disease (CVD), and premature death, can be prevented or delayed by medical interventions. This handbook presents diagnostic tools to identify the CKD patient in the outpatient practice setting, including risk stratification. Comprehensive management strategies to reduce the risk of CKD and maximize the health of the CKD patient are presented, including proper management of hypertension, CVD risk factors,

proteinuria, anemia, and renal bone disease.

Précis du droit de la commande publique Frontiers Media SA

I primi mesi del 2020 sono stati un'emergenza straordinaria capace di determinare, da svariati punti di vista, il momento di difficoltà più acuto per molti Paesi, tra cui certamente l'Italia, dal secondo dopoguerra a oggi. In quali condizioni il sistema sanitario lombardo ha dovuto fronteggiare l'emergenza? Cosa è successo in questi mesi? Dalle file di camion che trasportano via le bare dalla città di Bergamo, ai segni delle mascherine capaci di scavare solchi indelebili sulla carne provata degli infermieri e dei medici alla preghiera solitaria di Papa Francesco, il volume ripercorre tutte le tappe della gestione politica e sanitaria di questa emergenza in Lombardia, un'emergenza sanitaria a cui sta seguendo lo tsunami economico e sociale di cui percepiamo oggi solo i primi segnali. I diritti d'autore verranno devoluti al Fondo di Mutuo Soccorso del Comune di Milano.

A guide to symptoms, management and treatment Springer Nature

Il volume nasce dalla volontà di unire competenze e sensibilità diverse per posare lo sguardo sull'universo femminile "ristretto", multiforme e nello stesso tempo dotato di una forte identità comune. L'attenzione si sofferma su fattispecie restrittive che rispondono a ragioni diverse, si consumano secondo modalità e tempi propri ed entro luoghi di esecuzione specificamente dedicati. Nessuna di esse, però, può legittimamente abdicare al corredo garantistico attraverso il quale l'art. 13 della nostra Costituzione dà sostanza all'inviolabilità della libertà personale. Tutte, invece, debbono rispettare il principio di eguaglianza, che non tollera il dissolversi forzato delle diversità sotto un

trattamento ciecamente comune: la considerazione delle differenze di genere è una condizione essenziale della parità di genere. Nel volume s'incrociano modi diversi d'intendere tale differenza e di accostarsi ad essa nella valutazione dei presupposti e nella disciplina dei modi della restrizione della libertà personale nei confronti dell'universo femminile. Alcuni contributi retrospettivi s'incaricano di consentire uno sguardo sulle costanti e sulle variabili che hanno fino ad oggi segnato il cammino delle donne ristrette nel contesto italiano. Sono oggetto di attenzione specifica la restrizione femminile all'interno degli istituti penitenziari e le alternative al carcere, soprattutto legate alla maternità; l'internamento negli ospedali psichiatrici giudiziari e la transizione alle residenze per l'esecuzione delle misure di sicurezza; il trattenimento nei centri di permanenza per i rimpatri (ex C.I.E.). Tutte le realtà considerate descrivono comunità numericamente esigue. Rispetto agli uomini sono poche le donne detenute, internate, trattenute. E tuttavia esse sono portatrici di esigenze specifiche, che attendono risposte adeguate. I "piccoli" numeri della popolazione femminile a vario titolo ristretta favoriscono forme di concentrazione delle donne entro un numero limitato di strutture appositamente dedicate. Ne scaturiscono conseguenze di segno diverso, come testimoniano i contributi presenti nel volume. Possono risultare agevolate la considerazione delle specificità legate al genere e la ricerca di modelli d'intervento adeguati oppure possono consolidarsi forme di ghettizzazione ed emarginazione. Al fine di ricostruire lo stato dell'arte e rilevare punti di forza e criticità attraverso un costante raffronto tra norma e realtà, il volume mira ad integrare dialetticamente contributi che adottano punti di partenza

differenti e complementari. L'obiettivo è lo sviluppo di un'indagine critica sull'assetto che l'intrecciarsi di una molteplicità di fattori conferisce infine ai bisogni individuali ed alle esigenze collettive che si confrontano quando la necessità di proteggere l'infanzia si traduce nell'esigenza di sottrarre al carcere donne in conflitto con la giustizia penale, il bisogno di cura s'affianca alle istanze di difesa sociale nella coesistenza fra reato e disturbo mentale, l'immigrazione diventa terreno di scontro fra aspirazioni securitarie e tutela dei diritti e delle libertà fondamentali della persona.

Understanding Conduct Disorder and Oppositional-Defiant Disorder Frontiers Media SA

Il termine "dipendenza" richiama ai più una sola immagine: la droga, personificata nel tossico emarginato dalla società. Invece le addiction si ritrovano nelle forme più diverse e non sempre sono legate a una sostanza. Le nuove dipendenze si nutrono di scommesse, social network e cocktail, facendo leva sui nostri atteggiamenti, sul nostro vissuto. Dopo Nuove sostanze psicotrope, Danilo Lazzaro si concentra sulle dipendenze comportamentali, dagli hikikomori al gioco d'azzardo, fornendo strumenti per comprendere meglio la portata del fenomeno e la sottile ma enorme differenza tra abitudine e disturbo. Non mancano i pareri degli esperti, sotto forma di otto interviste esclusive a professionisti dei settori coinvolti nella gestione delle dipendenze.
