 A Pulitzer Prize-winning intelligence reporter presents a narrative account of a mysterious Jordanian agent that describes how he infiltrated both al-Qaeda and the CIA before killing himself and seven CIA operatives in a suicide bombing, an event that revealed sobering agency weaknesses. Reprint.

Solving Technology's People Problem

Morgan James Publishing
 Discover the most expensive mistakes London property buyers make and how you can acquire your ideal home on the best possible terms. Jeremy McGivern founded Mercury Homeseach in 2001. He has since become the leading expert on acquiring property in prime central London and represents some of the World's most

influential individuals and families. In 'The Prime London Property Puzzle' Jeremy McGivern shares the strategies that Mercury Homeseach uses to acquire the finest properties. Discover how to have first refusal, how to gain access to London's most exclusive 'off market' properties and proven negotiation strategies that will give you an advantage over estate agents and other buyers. Essential reading if you want to avoid expensive mistakes and wasted time.

Building Your Real Estate Riches

Hassell Street Press
 In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around

the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to

being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.

Bridgital Nation Oikos Way DBA y on Earth

Hong Kong is a city without ground. This is true both physically (built on steep slopes, the city has no ground plane) and culturally (there is no concept of ground). Density obliterates figure-ground in the city, and in turn re-defines public-private spatial relationships. Perception of distance and time is distorted through compact networks of pedestrian infrastructure, public transport and natural topography in the urban landscape. Without a ground, there can be no figure either. In fact, Hong Kong lacks any of the traditional figure-ground relationships that shape urban space: axis, edge, center, even fabric. *Cities Without Ground* explores this condition by mapping three-dimensional circulation networks that join shopping malls, train stations and public transport interchanges, public parks and private lobbies as a series of spatial

models and drawings. These networks, though built piecemeal, owned by different public and private stakeholders, and adjacent to different programs and uses, form a continuous space of variegated environments that serves as a fundamental public resource for the city. The emergence of the shopping malls as spaces of civil society rather than of global capital— as grounds of resistance— comes as a surprise. This continuous network and the microclimates of temperature, humidity, noise and smell which differentiate it constitute an entirely new form of urban spatial hierarchy. The relation between shopping malls and air temperature, for instance, suggests architectural implications in circulation—differentiating spaces where pedestrians eagerly flow or make efforts to avoid, where people stop and linger or where smokers gather. Air particle concentration is both logical and counterintuitive: outdoor air is more polluted, while the air in the higher-end malls is cleaner than air adjacent to lower value retail programs. Train stations, while significantly cooler than bus terminals, have only moderately cleaner air. Boundaries determined by sound or smell (a street of flower vendors or bird keepers, or an artificially perfumed mall) can ultimately provide more substantive spatial boundaries than a ground. While space in the city may be continuous, plumes of temperature differential or air particle intensity demonstrate that environments are far from equal.

Quantitative International Economics Anchor

The Routledge Handbook of Tourism Cities presents an up-to-date, critical and comprehensive overview of established and emerging themes in urban tourism and tourist cities. Offering socio-cultural perspectives and multidisciplinary insights from leading scholars, the book explores contemporary issues, challenges and trends. Organised into four parts, the handbook begins with an introductory section that explores contemporary issues, challenges and trends that tourism cities face today. A range of topics are explored, including sustainable urban tourism, overtourism and urbanisation, the impact of terrorism, visitor-host interactions, as well as reflections on present and future challenges for tourism cities. In Part II the marketing, branding and markets for tourism cities are considered, exploring topics such as destination marketing and branding, business travellers and exhibition hosting. This section combines academic scholarship with real-life practice and case studies from cities. Part

III discusses product and technology developments for tourism cities, examining their supply and impact on different travellers, from open-air markets to creative waterfronts, from social media to smart cities. The final Part offers examples of how urban tourism is developing in different parts of the world and how worldwide tourism cities are adapting to the challenges ahead. It also explores emerging forms of specialist tourism, including geology and ecology-based tourism, socialist heritage and post-communist destination tourism. This handbook fills a notable gap by offering a critical and detailed understanding of the diverse elements of the tourist experience today. It contains useful suggestions for practitioners, as well as examples for theoretical frameworks to students in the fields of urban tourism and tourism cities. The handbook will be of interest to scholars and students working in urban tourism, heritage studies, human geography, urban studies and urban planning, sociology, psychology and business studies.

Southeast Asia's China Challenge Bright Pen

This distinctive book sets forth, on an advanced level, various methods for the quantitative measurement of important relationships at issue in areas of the balance of payments and international trade and welfare. The results achieved in recent studies are presented and the directions for new research are indicated. This book is composed of two main parts. Part I deals with the balance of payments and consists of the first half of the book. One of the longest and almost important chapters of this part talks about, at length the time-series analysis of the demand for imports and exports from the point of view of an individual country. This subject has a long and somewhat checkered history dating from the 1940's, when a number of estimates using least squares multiple regression methods were made of import and export demand functions for the interwar period. The noteworthy feature of many of these estimates was that they suggested relatively low price elasticities of demand in international trade. The implication was thus drawn that the international price mechanism could not be relied on for balance-of payments adjustment purposes. This book talks about the topics of theory and measurement of the elasticity of substitution in international trade, estimating the international capital movements, and forecasting and policy analysis with econometric models. Part II deals with international trade and welfare.

While, there are many other books dealing with trade theory, this title focuses on a narrower range of topics that are not always mentioned or understood by individuals, such as the theory and measurement of trade dependence and interdependence, the analysis of the component factors a country has that affects how its export growth is over time, and the welfare effects of trade liberalization. This book serves as a guide and reference work for economics graduate students, academicians, and practicing economists in private and governmental circles. They will find this book

The Crimson Spoon World Bank Publications

A defining moment in James Law's architectural career occurred in 2000 when he was invited to design of both architecture and technology of the Dickson Cyber Express Shopping Mall – the world's first "Bricks and Clicks" retail complex in Hong Kong. This led to James coining the term "Cybertecture," to symbolize a new kind of design which merges technology and architecture as a future design that brings people "Live The Future." With growing reputation, James became an active advocate in the issues of future technology and design. As a dual design concept, Cybertecture is a broadspectrum design philosophy that can be applied to an infinite number of different types of projects and scenarios. The ultimate goal is to create a better world, where endeavours, processes and events take place in spaces that introduce people to a new level of comprehension and wisdom.

Accompanying the Channel 5 television series, this guide to wine follows Floyd on a regional wine tour. Meeting characters who reflect the lifestyle of the area, Floyd shares a joke, a meal and a few bottles of the locally produced wine.

Outbound Tourism of Scandinavia
Washington State University College of Business

For tourism product development and the promotion of destinations in nowadays-competitive age it is necessary to achieve a clear profile of the travel behavior and preferences of actual and potential clients. This is the aim of these reports which provide a sound basis of information on outbound tourism from the respective countries. They focus on the characteristics of outbound travel, give significant information on the generating markets and describe the target group profiles. These reports have become an essential and valuable tool for both the public and private sector in destinations interested in or receiving tourists from these markets as well as for the travel industry in these generating countries
Financing from Masses Edward Elgar Publishing

The Chinese are known throughout the world as avid gamblers with a long history of participation in games of chance. Historians have documented wagering on such games as far back as the early Chinese dynasties. Despite measures by ancient Chinese rulers to contain gambling, it proliferated, and Chinese games have evolved and multiplied since then. Desmond Lam provides a unique look into the little-known world of Chinese gambling from historical, cultural, psychological, and social perspectives. Chinese gamblers regularly patronize casinos in the United States, Canada, and Australia. The recent expansion of gambling in East Asia has attracted much global media attention. Macau, the only place in China where casino gambling is now legal, easily surpasses Las Vegas as the world's largest casino gaming market. Each year, Chinese from mainland China, Hong Kong, and Taiwan account for almost 90 percent of visitors to Macau. The expansion of the Chinese gambling industry has brought about much harm to Chinese communities, despite all of the development it has also stimulated. This book is the first to examine the beliefs, motivations, attitudes, and behaviors of Chinese gamblers, and will be of interest to students of history and sociology, as well as those studying the history and culture of China.

Dark Passage Oxford University Press, USA

This authoritative book includes cutting-edge insights from leading European and North American scholars who reflect upon business ethics. foundations, firms, markets and stakeholders in order to design more sustainable patterns of development for business and society. Together, the contributing authors advance critical, innovative and imaginative perspectives to rethink the mainstream models and address the sustainability challenge. With authentic leadership, Dr. Simon shares a realistic outlook for entrepreneurs by sharing his own failures and successes and invites real estate agents, every day investors, and entrepreneurial spirits alike to spread their entrepreneurial wings and fly.

Hard truths about Singapore's commercial & residential markets

Phuketindex.com Magazine Vol.06

Why the luxury market's fate rests in Chinese wallets The media has negatively focused on the Chinese political administration clamping down on gifting. Observers have come to doubt the strength of Chinese consumption as the key driver for luxury. The Bling Dynasty illustrates how doubts about Chinese consumption are ill-founded and Chinese luxury demand is on the cusp of becoming dominant. This book contains the research and expert views companies need to understand and address the new challenges posed by this dominance. Each chapter brings a different perspective, covering complex aspects of luxury consumption, with illustrations and real-world examples that support the research. Readers will gain insights through

interviews with brand executives, retailers, experts, and consumers. As an economic heavyweight, China is fast realizing its role in the luxury market. Chinese consumers should be accounting for more than a third of the global luxury market today, and half, if not more, in ten years' time. The Bling Dynasty runs counter to the conventional wisdom that expanding sectors become more global. Luxury is actually becoming over-dependent on Chinese sales. Readers will: Understand how Western brands developed in Asia and the challenges they are met with, notably ubiquity Learn why Chinese are purchasing luxury items abroad and what it means for the future of the sector Gain insights on why there are no Chinese luxury brands challenging Western models Realize that Chinese consumers are becoming similar to their American peers and that luxury competition goes way beyond preconceptions China's big spenders are increasingly mobile and this is affecting key markets. The Bling Dynasty provides new research and a comprehensive look at the booming business of luxury and the Chinese wallet.

"'Harvesting Color' presents the entire process of infusing your life with color-- finding the right plants, harvesting them at the best time, transforming the crop

into beautiful dye, and, finally, marring pigment to fiber. In this beautiful book, Rebecca Burgess showcases three dozen common plants that yield striking hues. Citing fascinating botanical lore, she demystifies the process of recognizing each plant in the wild. For those you can grow yourself, she details when to sow the seed and how to nurture the plant. For all the plants, you'll learn the optimal time to harvest, as well as how to extract the best dyes" --Cover flap.

Collins

A LIFE ON THE VERGE OF COLLAPSE Tyson Barrett used to be happy. Used to have a wife, a son, a thriving business. Now he has nothing. Just long, sleepless nights broken only by nightmares so terrifying they threaten his sanity. So when he discovers an underground drug trial that will "cure" him, he jumps at the chance. A CURE THAT SOUNDS TOO GOOD TO BE TRUE Everything seems great until things from Tyson's dreams start showing up in his waking life. Items from a dark past he thought he left buried at Sunnybrook Asylum. And when the nightmares threaten to return in full force, eerie trinkets aren't the only things waiting to come through. AN EVIL THAT CAN'T BE STOPPED Now Tyson must face a terror that has stalked him since childhood or risk losing everything he holds dear. The mind is full of halls. And some of the darkest passages lead to rooms better left closed.
