Annual Report Asian Development Bank
 From 2010 onward, Fiji witnessed one of its strongest spells of economic growth since independence. Extreme poverty is in the single digits, but nearly a third of the population is unable to meet basic needs. Fiji thus faces two major challenges: to create a business environment that can attract more private investment to help sustain its growth momentum, and to make that growth inclusive so that all of Fiji can benefit. This country diagnostic study undertaken by the Asian Development Bank identifies the critical constraints to inclusive growth in Fiji and proposes policy options for addressing them.

Colonial Reports--annual Asian Development Bank

This private sector assessment reviews Fiji's private sector environment in 2006-2012, against recommendations made in the Asian Development Bank (ADB) publication "2005 Promise Unfulfilled: Private Sector Assessment for Fiji". While Fiji has made considerable reform progress in a number of areas (including tax reforms, encouraging telecommunications competition, and reducing barriers to foreign investment), it still faces considerable challenges in responding to a range of macroeconomic shocks following the global economic crisis, and political and policy uncertainty at home.

Re-invigorating Private Sector Investment

This report provides a longitudinal study of the Fiji economy covering more than 2 decades of growth and development. It presents an economic update and outlook for the Fiji economy and assesses the key drivers of performance across key economic sectors. The report identifies potential reform strategies that can guide future policy action, assist in accelerating growth, and strengthen pro-poor policy development in Fiji.
