The Evolution of Economic Thought McGraw-Hill Education
McConnell, Brue and Flynn's *Macroeconomics: Brief Edition, 2e* comes from the same author team as the market-leading *Principles of Economics* textbook. *Macroeconomics: Brief Edition* tailors the core concepts from proven leader *Macroeconomics, 19th edition* to create a concise introduction to the course that is distinct in purpose, style, and coverage. Like the 19th edition, *Macroeconomics: Brief Edition, 2e* continues to be innovative

while teaching students in a clear, unbiased way. Content and pedagogy have 3 main goals: help the beginning student master the principles essential for understanding the economizing problem, specific economic issues, and the policy alternatives; help the student understand and apply the economic perspective and reason accurately and objectively about economic matters; and promote a lasting student interest in economics and the economy. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

Advanced Macroeconomics McGraw-Hill Education

The fifth edition of Romer's Advanced Macroeconomics continues its tradition as the standard text and the starting point for graduate macroeconomics courses and helps lay the groundwork for students to begin doing research in macroeconomics and monetary economics. Romer presents the major theories concerning the central questions of macroeconomics. The theoretical analysis is supplemented by examples of relevant empirical work, illustrating the ways that theories can be applied and tested. In areas ranging from economic growth and short-run fluctuations to the natural rate of unemployment and monetary policy, formal models are used to present and analyze key ideas and issues. The book has been extensively revised to incorporate important new topics and new research, eliminate inessential material, and further improve the presentation.
