Copley's Essentials of Accounting for Governmental and Not-for-Profit Organizations, 13e is best suited for those professors whose objective is to provide more concise coverage than what is available in larger texts. The main focus of this text is on the preparation of external financial statements which is a challenge for governmental reporting. The approach in this edition is similar to that used in practice. Specifically, day to day events are recorded at the fund level using the basis of accounting for fund financial statements. Governmental activities are recorded using the modified accrual basis. The fund-basis statements are then used as input in the preparation of government-wide statements. The preparation of government-wide

statements is presented in an Excel worksheet. NEW for the 13th edition is McGraw-Hill Connect, a digital teaching and learning environment that saves students and instructors time while improving performance over a variety of critical outcomes.

Accounting is the discipline with the
oldest historical culture, being the first to
be recognized by humanity when Adam
and Eve were made to account for what
they did in paradise. It is also the only
discipline that will come into play in the
Hereafter, where everybody would be
raised up as an accountant - to account
for all they have done during their life
time on earth! Accounting is a service-
providing discipline, with a rich
theoretical background, which makes

available information (especially
financial) to guide various decision-
making processes. Business owners,
creditors, managers, prospective
investors, government and its agencies,
employees and even the general public
seek accounting information to guide
them when taking various informed
decisions about reporting entities and
the environment within which they
operate. This book addresses the
historical accounting culture, its theories
as well as its practices. It is made up of
fifteen chapters, covering various
historical, theoretical and practical
aspects of Accounting, ranging from
accounting standardization to financial
reporting. The book is an attempt to
address some of the lacunae in
advanced accounting issues, both in

theory and in practice. Students of advanced accounting theory and practice at the professional and

academic levels in Universities, Polytechnics and Professional Institutes would find the book an essential companion.
