Planning and Control Using Oracle Primavera P6 Versions 8 to 18 PPM

Professional Planning and Control Using Oracle Primavera P6 Versions 8 to 20 PPM Professional A user guide (in Chinese) and training manual written for Project Management Professionals who wish to learn how to plan and control projects in an established Primavera Enterprise environment with or without Resources and Roles. This book is an update of the author's Primavera P6 Version 7 book and contains updated workshops, new content and an Earned Value chapter. It has been written so it may be used with any software industry version. The book is packed with screen shots, constructive tips and contains workshops with solutions at the end of each chapter for the reader to practice the skills taught. It has been written so it may be used with either the Professional Project

Management Client version or the Enterprise Project Portfolio Management Optional Client. The book is aimed at: People who wish learn the software but are unable to attend a training course and find the software reference manual hard going. Project management companies who wish to run their own software training courses or provide their employees with an alternative text to the vendor supplied user manual. Training organizations requiring a training manual to run their own training courses. Primavera Systems Inc. originally asked the author to write this book and this publication is ideal for people who would like to gain an understanding of how the software operates up to an intermediate level. It covers only Primavera Versions 8.1 to 8.4 Professional Client and Optional Client Due to the new menus and toolbars release in Version 8. It explains some of the differences from SureTrak, P3, Microsoft Project and Asta

Powerproject to assist people converting from other products. The book is designed to teach planners and schedulers in any industry how to setup and use the software in a project environment. It explains in plain English and in a logical sequence, the steps required to create and maintain an unresourced and resourced schedule. It tackles some of the more complex aspects of the software that the user manual does not address. It highlights the sources of information and the methods that should be employed to produce a realistic and useful project schedule. About the Author: Paul Harris holds an Honours Degree in Civil Engineering obtained in the UK and is a Certified Cost Engineer through AACEI International, a PRINCE2 Registered Practitioner, an Approved PRINCE2 Trainer and a "Managing Successful Programmes" Registered Practitioner. He has worked in the project controls industry for a number of years and has assisted many companies in a range of

industries to set up and run project controls systems. His Melbourne, Australia based company, Eastwood Harris Pty Ltd, offers project controls consulting and training services worldwide with a strong focus on Microsoft Project and Primavera software.

Professional Client &

Optional Client BookPOD
A user guide, reference book and two-day training course written for Project Management

Professionals who wish to learn how to plan and control both an unresourced and resourced project in an established Oracle Primavera environment. This book is an update of the author's unpublished book titled Planning and Control Using Primavera P6.1 Web and includes the new features of Oracle Primavera P6 Version 8.2 Web. The book is packed with screen shots, constructive tips and contains workshops with solutions at the end of each chapter for the reader to practice the skills taught. It has been written so it may be used with the EPPM Web tool. The book is aimed at: People who wish learn the software but are unable to attend a training course and find the software

reference manual hard going. Project management companies who wish to run their own software training courses or provide their employees with an alternative text to the vendor supplied user manual. Training organizations requiring a training manual to run their own training courses. This book is a PMI Approved course and instructors PowerPoint slide shows are available to training organizations. PMI REPs may apply to have this course licensed to them and award 21 PDUs to each attendee. Primavera Systems Inc. originally asked the author to write this book and this publication is ideal for people who would like to gain an understanding of how the software operates up to an intermediate level. It only covers the Primavera Versions 8.2 Web tool. It explains some of the differences from the Professional tool, SureTrak, P3, Microsoft Project and Asta Powerproject to assist people converting from other products. The book is designed to teach planners and schedulers in any industry how to setup and use the software in a project

environment. It explains in plain English and in a logical sequence, the steps required to create and maintain an unresourced and resourced schedule. It tackles some of the more complex aspects of the software that the user manual does not address. It highlights the sources of information and the methods that should be employed to produce a realistic and useful project schedule. The book provides advice on how on how the many software options may be applied to projects environments and it aims to teach readers how to plan and control projects created within the software package and stays focused on explaining how to use Primavera to schedule projects by: Concentrating on the core functions required to set up an enterprise environment and how to plan and control projects. Providing command lists at the start of each chapter as a quick reference. Providing a comprehensive table of contents and index of all topics. The book is intended to be used: As a self teach book, or A user guide, or A training manual for a two day training course. This book

is written by an experienced scheduler, who has used the software at the sharp end of projects and is not a techo. It draws on the author's practical experience in using the software in a wide variety of industries. It presents workable solutions to real day to day planning and scheduling problems and contains practical advice on how to set up the software and import data. About the Author: Paul Harris holds an Honours Degree in Civil Engineering obtained in the UK and is a Certified Cost Engineer through AACEI International, a PRINCE2 Registered Practitioner, an Approved PRINCE2 Trainer and a "Managing Successful Programmes" Registered Practitioner. BookPOD

This publication has been written to explain the functions that an administrator must understand in order to set up and manage a Primavera P6 EPPM database. This publication may be used to run a training course and includes exercises at the end of each chapter for the students to complete. After the course, students may use this publication as a reference book. The book is aimed at assisting database administrators to understand how to configure and administer a P6 database after the software and databases have been installed. The objectives of this book are to demonstrate: 1. The structure of a P6 database, 2. The P6 tools available to access, set up and administer a P6 Database, 3. The steps that should be considered when implementing a P6 database, 4. The P6

functions that an Administrator must understand in order to successfully administer a P6 EPPM database, 5. How to setup/configure a P6 Database using the Web interface, and How to administer a P6 Database using the Web interface. The book is aimed at: 1. People who wish learn the software but are unable to attend a training course and find the software reference manual hard going. 2. Project management companies who wish to run their own software training courses or provide their employees with an alternative text to the vendor supplied user manual. 3. Training organizations requiring a training manual to run their own training courses. This book is a PMI Approved course and instructors PowerPoint slide shows are available to training organizations. PMI REPs may apply to have this course licensed to them and award 14 PDUs to each attendee. Primavera Systems Inc. originally asked the author to write this book and this publication is ideal for people who would like to gain an understanding of how the software operates up to an

intermediate level. *Primavera P6 Essential Training* BookPOD
All scheduling software is difficult to learn for a number of reasons. None have the optimal settings when installed and Layouts, User Preferences and default options need to be adjusted to obtain the best possible performance. Usually the Help files do not connect the user to real life situations and do not explain the practical use of functions. Furthermore, there are many flicks and switches with obscure names that are difficult to understand or decide what they do or which are important. These issues make learning the software very difficult without a comprehensive guide written by an experienced user. Investing in a book written by Paul E Harris will address all these issues and allow you to setup the software properly and understand all the obscure functions letting you become productive more quickly and enhance your career opportunities and salary with a solid understanding of the software. This book is an update of the author's Primavera P6 Version 8 to 20 book and the workshops have been

updated so they start in the future. The book has been written so it may be used with any software industry version. The book is packed with screen shots, constructive tips and contains workshops with solutions at the end of each chapter for the reader to practice the skills taught. It has been written so it may be used with either the Professional Project Management Client version or the Enterprise Project Portfolio Management Optional Client. The book is aimed at: 1. People who wish learn the software but are unable to attend a training course and find the software reference manual hard going. 2. Project management companies who wish to run their own software training courses or provide their employees with an alternative text to the vendor supplied user manual. 3. Training organizations requiring a training manual to run their own training courses. The book is designed to teach planners and schedulers in any industry how to setup and use the software in a project environment. It explains in plain English and in a logical sequence, the

steps required to create and maintain an unresourced and resourced schedule. It tackles some of the more complex aspects of the software that the user manual does not address. It highlights the sources of information and the methods that should be employed to produce a realistic and useful project schedule. The book provides advice on how on how the many software options may be applied to projects environments and it aims to teach readers how to plan and control projects created within the software package and stays focused on explaining how to use Primavera to schedule projects by: Concentrating on the core functions required to set up an enterprise environment and how to plan and control projects. Providing command lists at the start of each chapter as a quick reference. Providing a comprehensive table of contents and index of all topics. The book is intended to be used: As a self-teach book, or A user guide, or A training manual for a three-day training course, instructor PowerPoint slide shows are available from the author. This book is

written by an experienced scheduler, who has used the software at the sharp end of projects and is not a techo. It draws on the author's practical experience in using the software in a wide variety of industries. It presents workable solutions to real day to day planning and scheduling problems and contains practical advice on how to set up the software and import data. [Version 8. 1 Professional Client Beginner's Guide BookPOD](#)
This book quickly gets down to the issues that many people grapple with when trying to use some of the more advanced features of the software and enlightens readers on the traps that some users fall into and how to avoid them. It demonstrates how the software ticks and explains some tricks that may be used to become more productive with the software. Suitable for people who understand the basics of P6 but want a short guide to give them insight into the less intuitive features of the software. It is packed with screen shots, constructive tips and is written in plain English. The book is based on the P6 Version 18 but may be used with earlier versions of P6 as this book points

out the differences where appropriate. The book picks out many of the key aspects from the author's existing books and adds a substantial amount of new and original text to produce a pocket guide that omits describing the intuitive and obvious functions and concentrates on the issues that many users get stuck on or find hard to understand.

Project Planning and Control Using Oracle Primavera P6 Version 8. 3 EPPM Web

P6 Real World Scheduling is called "real world" because the author wrote it drawing upon his 30+ years of experience consulting with contractors. He knows how contractors use scheduling software, what's important to them - and what is not! Tested and retested in the classroom. It will guide you through some of the quirks of P6 as well as teach you how to use the software the way

contractors use it. Other software manuals are often hundreds of pages long filled with dense text that wastes your time trying to cover every corner and nuance of the software - ultimately leaving readers more confused than before they started. P6 Real World Scheduling is written for Oracle's Primavera P6 Professional software using a local or multi-user database. It was written using version 15.1, but can be applied to previous and post versions of P6 with little concern. Rest assured that it will help the reader clearly grasp the many, sometimes puzzling nuances of this enterprise based software, such as the use of the OBS (Organizational Breakdown Structure), the EPS (Enterprise Project Structure), the lack of traditional save features, user security profiles, and its uncommon import / export components. P6 Real World Scheduling assumes that the reader has no previous exposure to the software and takes the reader through the process of creating a schedule covering the same features that a contractor would include on their typical schedule. This includes creating and

saving the schedule, covering numerous formatting options to customize the look of the schedule, working with calendars including 50% and 100% weather calendars, then activity coding the schedule to organize the activities into various Work Breakdown Structures. Different views of the schedule are explored and from there the schedule is resource loaded and cost loaded, including a real world analysis of an over-allocation of resources. The schedule is then Baselined and updated covering all possible update scenarios that may actually occur. With this manual and a few hours of your time, you will be ready to effectively use Oracle's Primavera P6 Professional on a real project.

Exploring Oracle Primavera P6 R8.4

A user guide and training manual written for Project Management Professionals who wish to learn how to plan and control projects in an established Primavera Enterprise environment with or without Resources and Roles. This book is an update of the author's Primavera P6 Version 7 book and contains updated workshops, new

content and an Earned Value chapter. It has been written so it may be used with any software industry version. The book is packed with screen shots, constructive tips and contains workshops with solutions at the end of each chapter for the reader to practice the skills taught. It has been written so it may be used with either the Professional Project Management Client version or the Enterprise Project Portfolio Management Optional Client. The book is aimed at: People who wish learn the software but are unable to attend a training course and find the software reference manual hard going. Project management companies who wish to run their own software training courses or provide their employees with an alternative text to the vendor supplied user manual. Training organizations requiring a training manual to run their own training courses. This book is a PMI Approved course and instructors PowerPoint slide shows are available to training organizations. PMI REPs may apply to have this course licensed to them and award 21 PDUs to each attendee.

Primavera Systems Inc. originally asked the author to write this book and this publication is ideal for people who would like to gain an understanding of how the software operates up to an intermediate level. It covers only Primavera Versions 8.1, 8.2 and 8.3 Professional Client and Optional Client Due to the new menus and toolbars release in Version 8. It explains some of the differences from SureTrak, P3, Microsoft Project and Asta Powerproject to assist people converting from other products. The book is designed to teach planners and schedulers

in any industry how to setup and use the software in a project environment. It explains in plain English and in a logical sequence, the steps required to create and maintain an unresourced and resourced schedule. It tackles some of the more complex aspects of the software that the user manual does not address. It highlights the sources of information and the methods that should be employed to produce a realistic and useful project schedule. About the Author Paul Harris holds an Honours Degree in Civil Engineering obtained

in the UK and is a Certified Cost Engineer through AACEI International, a PRINCE2 Registered Practitioner and a "Managing Successful Programmes" Registered Practitioner. He has worked in the project controls industry for a number of years and has assisted many companies in a range of industries to set up and run project controls systems. His Melbourne, Australia based company, Eastwood Harris Pty Ltd, offers project controls consulting and training services worldwide with a strong focus on Microsoft Project and Primavera software.
