Rubber toy vehicles seemed to suddenly appear on the scene in dime stores in 1935 and almost as suddenly disappear in 1955, when American-made plastic toys became much more affordable.

These fascinating rubber toys were produced by major companies Auburn Rubber Company and Sun Rubber Company, as well as smaller companies like the Judy Company, Gift Craft, Glolite, Viceroy, and Rubber Toys Unique. Author Dave Leopard, long-time collector of American-made toy cars and trucks who specializes in rubber toy vehicles, began researching this subject in 1987 and continues to obtain new items and information, which he has included in this collector's guide. Leopard presents a history of rubber toys and describes the American dime store where these toys were first available. He points out model differences and uses a numbering system to identify the vehicles in the book. The Auburn and Sun Rubber Companies have complete reviews, and pre-war American manufacturers as well as toys produced overseas are given coverage. There are also original catalog pages from Auburn and Sun, and a complete list of rubber toys featured in the book by manufacturer and type. Current collector values are given for each item featured. 'Burn some rubber' on your way to the bookstore to get your copy of Rubber Toy Vehicles.

A look back at vintage magazines and an invitation to enter the spellbinding world of luscious pin-up models. IMAGINED BY MALY SIRI, THIS COFFEE TABLE BOOK IS A REMINDER OF VINTAGE MAGAZINES AND AN INVITATION TO ENTER THE SPELLBINDING WORLD OF PIN-UPS Maly Siri's Pin-up Art Good Girls / Bad Girls raises two themes: - On one side, the "Good Girls": the damsels with soft skin powdering their faces in front of the mirror, the Tahitian girls with enchanting smiles and the brave soldiers... Their charm is due to their sparkling characters and apparent candour. - And on the other side, the "Bad Girls": the rouged vamps with sensuous looks, the spies, the melancholic blues singers and other mis ts... The fact that they are aware of their charms makes them even more dangerous... This book is a rich and delicious homage inspired by the iconography of the 1930's to 50's, a concentrate of pure glamour, with a preface by Chantal Thomass.

Using a three-part framework of Ideas, Arguments, and Contexts and Applications, International Relations, Second Edition, shows students how to think critically about issues and current events in world politics. Each chapter first describes key concepts and developments in the field (Ideas), then presents the main theoretical and analytical approaches (Arguments), and finally applies the main theories and approaches within the individual, state, and global contexts (Contexts and Applications).

Historical information is woven throughout the text, and every chapter ends with an extended case study ("The Uses of History") that demonstrates how what we have learned from the past can influence our future actions. Three full chapters on key approaches--realism (chapter 2), liberalism (chapter 3), and constructivism and other alternative views (chapter 4)--introduce students to a broad spectrum of approaches, and each chapter integrates discussions of relevant theories and levels of analysis. Visual Reviews at the end of each chapter not only recap key points but include Critical Thinking questions that reflect the chapter learning objectives.

The Elite Redline Guide Schiffer Publishing

This comprehensive reference guide reviews the literature concerning the impact of the automobile on American social, economic, and political history. Covering the complete history of the automobile to date, twelve chapters of bibliographic essays describe the important works in a series of related topics and provide broad thematic contexts. This work includes general histories of the automobile, the industry it spawned and labor-management relations, as well as biographies of famous automotive personalities. Focusing on books concerned with various social aspects, chapters discuss such issues as the car's influence on family life, youth, women, the elderly, minorities, literature, and leisure and recreation. Berger has also included works that investigate the government's role in aiding and regulating the automobile, with sections on roads and highways, safety, and pollution. The guide concludes with an overview of reference works and periodicals in the field and a description of selected research collections. The *Automobile in American History and Culture* provides a resource with which to examine the entire field and its structure. Popular culture scholars and enthusiasts involved in automotive research will appreciate the extensive scope of this reference. Cross-referenced throughout, it will serve as a valuable research tool.

Collecting vintage diecast toy cars has become an increasingly popular hobby over the last 25 years, and this book provides a comprehensive overview of the companies that made these toys during the 1950s and 1960s. As well as examining the major names such as Dinky Toys, Corgi Toys and Matchbox (Great Britain), Solido (France), Tekno (Denmark) and Tootsietoy (USA), this book is unique in its coverage of many smaller and more obscure brands, not only from Europe or the USA but from countries as far afield as Japan, Israel and Argentina. The book provides fascinating insights into the history of individual companies, accompanied by 250 photographs of rare examples, most of them with their original boxes. A further unique feature is the inclusion of a large selection of colorful and evocative illustrations from catalogs and period trade advertisements. For the newcomer to the hobby, this volume will provide an ideal introduction to the history of the manufacturers active in this field, while experienced collectors will make many new discoveries.
