As technology continues to become more sophisticated, mimicking natural processes and phenomena becomes more of a reality. Continued research in the field of natural computing enables an understanding of the world around us, in addition to opportunities for manmade computing to mirror the natural processes and systems that have existed for centuries. Nature-Inspired Algorithms for Big Data Frameworks is a collection of innovative research on the methods and applications of extracting meaningful information from data using algorithms that are capable of handling the constraints of processing time, memory usage, and the dynamic and unstructured nature of data. Highlighting a range of topics including genetic

algorithms, data classification, and wireless sensor networks, this book is ideally designed for computer engineers, software developers, IT professionals, academicians, researchers, and upper-level students seeking current research on the application of nature and biologically inspired algorithms for handling challenges posed by big data in diverse environments.

Journey After 10+2

Atlantic Publishers & Dist
White collar crime is a significant issue for everyone; it is not a victimless crime. It has an intense impact on everyone, not just the victims directly, but for all consumers and taxpayers in the form of higher costs, larger insurance premiums, payments, fees, taxes, etc. Keeping in mind the above-stated facts this Book is composed as in the market very rare books are available to cover in detail about white collar crime at a glance. This book can successfully claim to be a change from the conventional method

and it has covered all facets of White Collar Crime in India. The Chapters of the book were written by erudite Professors, and deans of different streams to articulate the application of White Collar Crime in divergent professions. In today's era when White Collar Crime is a burning issue in society, this book can help Researchers to extract information easily and to gain vast knowledge about it. Moreover, this book will be very helpful in both Text and Reference form and will generate a feeling among readers that "Make crime pay".
Breaking Down Language and Cultural Barriers Through Contemporary Global Marketing Strategies IGI Global
Discussions surrounding inclusivity have grown exponentially in recent years. In today's world where diversity, equity, and inclusion are the hot topics in all aspects of society, it is more important than ever to define what it means to be an inclusive society, as well as challenges and potential growth. Those

with physical and intellectual disabilities, including vision and hearing impairment, Down syndrome, locomotor disability, and more continue to face challenges of accessibility in their daily lives, especially when facing an increasingly digitalized society. It is crucial that research is brought up to date on the latest assistive technologies, educational practices, work assistance, and online support that can be provided to those classified with a disability. The Research Anthology on Physical and Intellectual Disabilities in an Inclusive Society provides a comprehensive guide of a range of topics relating to myriad aspects, difficulties, and opportunities of becoming a more inclusive society toward those with physical or intellectual disabilities. Covering everything from disabilities in education, sports, marriages, and more, it is essential for psychologists, psychiatrists, pediatricians, psychiatric nurses, clinicians, special education teachers, social workers, hospital administrators, mental health specialists, managers, academicians,

rehabilitation centers, researchers, and students who wish to learn more about what it means to be an inclusive society and best practices in order to get there.

Advanced Computing

IGI Global

This book is about containment, life, work, and restart cities affected by COVID 19, using selected empirical case studies. This book presents the spread of coronavirus spatially and temporally, analyses containment strategies and includes recommended strategies. Further, it analyses how life and work get transformed during the lockdown, and gradual opening up, and presents the future of work and life in cities impacted by COVID-19. This book discusses the concept of smart life and works in cities post-COVID-19 such that they do not reduce the quality of work and life and cannot create adverse economic and living consequences called the restart of a city after COVID-19. Selected Cities of special interest are studied. Special interest is because Kerala and Maharashtra got the worst affected in India by COVID 19 pandemic and the book focus on that.

Promoting Socio-Economic Development through Business Integration

Springer Nature

Every city has its unique and valuable identity, this identity is revealed through its physical and visual form, it is seen through the eyes of its residents and users. The city develops over time, and its identity evolves with it. Reflecting the rapid and constant changes the city is subjected to, Architecture and Arts, is the embodiment of the cultural, historical, and economical characteristics of the city. This conference was dedicated to the investigation of the different new approaches developed in Architecture and Contemporary arts. It has focused on the basis of urban life and identities. This volume provides discussions on the examples and tendencies in dealing with urban identities as well as the transformation of cities and urban cultures mentioned in terms of their form, identity, and their current art.

Contemporary art, when subjected to experiments, continues to be produced in various directions, to be consumed and to put forward new ideas. Art continuously renews

itself, from new materials to different means of communication, from interactive works to computer games, from new approaches to perceptual paradigms and problems of city and nature of the millennium. This is an Open Access ebook, and can be found on www.taylorfrancis.com. *Web Services: Concepts, Methodologies, Tools, and Applications* IGI Global Creating memories and joyous experiences for consumers is a key dimension affecting the profitability and growth of a hospitality firm. Drawing on global experiences, this new book looks at the diverse factors that create these positive experiences and provides insight into marketing and consumer behavior in the context of hospitality and tourism. The dynamics of emerging economies has been captured, and some lessons have been drawn from best practices across the globe.

6G-Enabled IoT and AI for Smart Healthcare Sultan Chand & Sons

The book presents a collection of peer-reviewed articles from the International Conference on Innovations in Cyber Physical Systems (ICICPS 2020). The conference provided opportunities for

the presentation of new research results and discussion about them. It was also an opportunity to generation of new ideas in all CPS aspects, including theory, tools, applications, systems, test-beds and field deployments. The range of topics explored is wide, and covers security, control, optimization, machine learning, game theory, mechanism design, mobile and cloud computing, model-based design, verification, data mining/analytics, signal processing, and human-in-the-loop shared or supervisory control. This book will be useful to researchers, students, industrialist, developers, and practitioners alike. Research Anthology on Physical and Intellectual Disabilities in an Inclusive Society Taylor & Francis The most awaited period of stepping out into college life is almost in front of you now. The choices that you make here will largely affect your entire future and life in general. So while one is readying oneself for life after twelfth, the dilemma about which college to choose and which course to choose from the wide array of career streams available after twelfth also increases. This underscores the need for

exploring the various career options available and their suitability with reference to the following:

- Learning about you
- Identifying your skills
- Knowing your weakness
- Utilizing your talents
- Your career dreams

Proceedings of the Second International Conference on Computer and Communication Technologies Springer Nature

Designing buildings and physical environments depends on social structure, social needs, economic data, environment, and technological development. Planning these environments is heavily influenced by cultural and regional need, the existing environment, and the materials available.

Reusable and Sustainable Building Materials in Modern Architecture is an essential reference source that discusses the shaping of building design through culture and materials as well as the influence of environment on building design.

Featuring research on topics such as passive design, ecological design, and urban design, this book is ideal for academicians, specialists, and researchers seeking

coverage on culture, environment, and building design.

Cyber-Physical

Systems IGI Global

Web service technologies are redefining the way that large and small companies are doing business and exchanging information. Due to the critical need for furthering automation, engagement, and efficiency, systems and workflows are becoming increasingly more web-based. *Web Services: Concepts, Methodologies, Tools, and Applications* is an innovative reference source that examines relevant theoretical frameworks, current practice guidelines, industry standards and standardization, and the latest empirical research findings in web services. Highlighting a range of topics such as cloud computing, quality of service, and semantic web, this multi-volume book is designed for computer engineers, IT specialists, software designers, professionals, researchers, and upper-level students interested in web services architecture, frameworks, and security.

India Today IGI Global

The book is about all aspects of computing,

communication, general sciences and educational research covered at the Second International Conference on Computer & Communication Technologies held during 24-26 July 2015 at Hyderabad. It hosted by CMR Technical Campus in association with Division – V (Education & Research) CSI, India. After a rigorous review only quality papers are selected and included in this book. The entire book is divided into three volumes. Three volumes cover a variety of topics which include medical imaging, networks, data mining, intelligent computing, software design, image processing, mobile computing, digital signals and speech processing, video surveillance and processing, web mining, wireless sensor networks, circuit analysis, fuzzy systems, antenna and communication systems, biomedical signal processing and applications, cloud computing, embedded systems applications and cyber security and digital forensic. The readers of these volumes will be highly benefited from the technical contents of the topics.

Knowledge Infrastructure and Higher Education in

India CRC Press

This book maps Indo-US relations from the turn of the last century. Amidst the changing world order, the bilateral ties between two of the world's greatest democracies have evolved from the thorny exchanges post-nuclear testing to present day's bonhomie. The essays in the volume include perspectives from political scientists, policymakers, and strategic studies experts which renew discussions on Indo-US collaborations and negotiations on a variety of traditional foreign policies issues, such as security, intervention, arms and terrorism, as well as cover new and emerging issues including climate change and environmental protection, strategic cooperation and maritime partnership and the role of Indian diaspora in the US economy. The volume will be of great interest to scholars and researchers of political science and international relations. It will also be of use to foreign policy and diplomacy practitioners, career bureaucrats and government think tanks.

Proceedings of International Conference on Innovations in

Information and Communication Technologies

CRC Press

One of the most challenging obstacles for many businesses in successfully reaching a global market stems from cultural and language barriers and the lack of a clear understanding of this issue. It is critical for businesses to understand these cultural and language barriers and how to face them through effective communications and cultural sensitivity. The companies that will thrive and see the most success are the ones whose employees communicate and collaborate effectively with customers, suppliers, and partners all over the world. *Breaking Down Language and Cultural Barriers Through Contemporary Global Marketing Strategies* provides both empirical and theoretical research focused on ways that business professionals and organizations are breaking down cultural and language barriers, integrating cultural sensitivity, and implementing cross-cultural management practices into their daily business practices. Featuring research on topics such as origin

effects, consumption culture, and cross-cultural management, managers, consultants, academic researchers, practitioners, business educators, and advanced students in various disciplines will find the content within this publication to be beneficial.

COVID 19, Containment, Life, Work and Restart IGI Global

Mobile commerce transactions continue to soar, driven largely by the ever-increasing adoption and use of smartphones and tablets. The use of this technology gives consumers the flexibility to shop whenever and wherever they want.

Mobile Electronic Commerce: Foundations, Development, and Applications addresses the role of industry, academia, sc

[Higher Education in the 21st Century: Challenges and Opportunities](#)

Springer Nature

The International Conference on ICT Innovations was held in September 2016, in Ohrid, Macedonia, with the main topic "Cognitive Functions and Next Generation ICT Systems". We live in the era where technologies are intimately woven into virtually all aspects of daily life and are

becoming almost invisible. While these technologies have considerable benefits, they also have a number of shortcomings and unforeseen consequences. For example, on the one hand, bodily sensors that track physical activity, physiological parameters and sleep patterns can help promote healthy habits and can enable early detection of problems. On the other hand, attention spans are becoming shorter and shorter due to constant interruptions by notifications, emails, and instant messages being delivered to cell phones or watches, and similar disturbances. Moreover, the privacy issues involved in storing and manipulation of these data must not be neglected. The technological convergence of sciences that were considered separate in the past, like information and communication technologies, cognitive sciences, nanotechnologies and biotechnologies, determines not only our society, health and economy, but also our education and culture. The conference gathered

academics, professionals and practitioners involved in developing solutions and systems in the industrial and business arena, especially innovative commercial implementations, to discuss novel applications of these next-generation, emerging technologies in the context of human cognitive functions.

Application of Gaming in New Media Marketing IGI Global

This book gathers selected papers presented at the International Conference on Innovations in Information and Communication Technologies (ICIICT 2022), held in Thailand during April 15–16, 2022. It presents the works on the intersection of the Computer Science and Communication Engineering. Topics covered in the book include communications engineering, Internet and web technology, computer and information science, artificial intelligence, data science and management, and ICT applications.

Drug Delivery Systems for Metabolic Disorders Springer

Though conflicts continue to arise over land use and land cover changes, the conversion of forest land

to cropland or other land uses such as housing and urban development have been on the rise in recent years. Decisions regarding land use and land cover influence climate change as well as various natural processes. While proper changes can minimize the effects and speed of climatic changes, the continued adverse changes may be accelerating the deterioration of the world’s condition.

Examining International Land Use Policies, Changes, and Conflicts presents the latest research on the present status of land use and land cover changes throughout the world in order to determine appropriate land use policies that can protect earth’s present and future condition. The findings of the studies investigate the conflicts behind the land tenure and land uses in different countries of the world and examines existing policies and the reasons behind changes in them. Ultimately, the book provides readers with knowledge on how land can be managed in a sustained manner, how landscape models are helpful for predicting and determining future land uses, how land can be

managed with the best architectural measures, and how urban forestry is helpful for better environmental management and adapting or mitigating climate change effects. Land users, agriculturalists, urban planners, policymakers, government officials, researchers, academicians, and students looking to improve their understanding of this topic for better use of land in the future will find this book to be an asset to their current research.

Capital Markets and Investment Decision

Behavior Springer
MBA has been the most sought after course in

every country owing to the reason that the course is very diverse and the MBA graduates are able to find placements in various types of corporate and service sector enterprises in the domestic country as well as in all other foreign countries. As regards admission, there are number of agencies conducting MBA Entrance Examinations for B schools in the domestic country as well as in foreign countries. This book will be of immense use for MBA aspirants who seek information about various MBA Entrance Examinations held in India as well as in the foreign countries and they can choose the best MBA Entrance Examination and the best B school. Keeping in view the above mentioned aspects, the book is written and designed to meet the current requirements of in-depth knowledge regarding the MBA education. The book brings an in-depth analysis on many related aspects of MBA education such as aptitude, attitude, leadership, learning, employability, financial sources accreditation and ranking, the role of CEOs in corporate sector, entrepreneurship, family business, biography of

leading business establishments, etc. This book can serve a great motivational force for those who want to start a business enterprise and also to those who are at present managing their own business enterprises. This book can be undoubtedly a stepping stone for students of MBA to choose the best B school, hone skills in Management, become entrepreneurs or get higher level placement in the ever changing domestic and global competitive business environment.

Handbook of Universities
IGI Global
Cyber-Physical Systems: AI and COVID-19
highlights original research which addresses current data challenges in terms of the development of mathematical models, cyber-physical systems-based tools and techniques, and the design and development of algorithmic solutions, etc. It reviews the technical concepts of gathering, processing and analyzing data from cyber-physical systems (CPS) and reviews tools and techniques that can be used. This book will act as a resource to guide COVID researchers as they move forward with

clinical and epidemiological studies on this outbreak, including the technical concepts of gathering, processing and analyzing data from cyber-physical systems (CPS). The major problem in the identification of COVID-19 is detection and diagnosis due to non-availability of medicine. In this situation, only one method, Reverse Transcription Polymerase Chain Reaction (RT-PCR) has been widely adopted and used for diagnosis. With the evolution of COVID-19, the global research community has implemented many machine learning and deep learning-based approaches with incremental datasets. However, finding more accurate identification and prediction methods are crucial at this juncture. Offers perspectives on the design, development and commissioning of intelligent applications Provides reviews on the latest intelligent technologies and algorithms related to the state-of-the-art methodologies of monitoring and mitigation of COVID-19 Puts forth insights on how future illnesses can be supported using intelligent corona

virus monitoring techniques
