The Coding Manual for Qualitative Researchers is unique in providing, in one volume, an in-depth guide to each of the

multiple approaches available for coding qualitative data. In total, 29 different approaches to coding are covered, ranging in complexity from beginner to advanced level and covering the full range of types of qualitative data from interview transcripts to field notes. For each approach profiled, Johnny Saldaña discusses the method's origins in the professional literature, a description of the method, recommendations for practical applications, and a clearly illustrated example.

Good Strategy/Bad Strategy clarifies the muddled thinking underlying too many strategies and provides a clear way to create and implement a powerful action-oriented strategy for the real world. Developing and implementing a strategy is the central task of a leader. A good strategy is a specific and coherent response to—and approach for—overcoming the obstacles to progress. A good strategy works by harnessing and applying power where it will have the greatest effect. Yet, Rumelt shows that there has been a growing and unfortunate tendency to equate Mom-and-apple-pie values, fluffy packages of buzzwords, motivational slogans, and financial goals with “strategy.” In Good Strategy/Bad Strategy, he debunks these elements of “bad strategy” and awakens an understanding of the power of a “good strategy.” He introduces nine sources of power—ranging from using leverage to effectively focusing on growth—that are eye-opening yet pragmatic tools that can easily be put to work on Monday morning, and uses fascinating examples from business, nonprofit, and military affairs to bring its original and pragmatic ideas to life. The detailed examples range from Apple to General Motors, from the two Iraq wars to Afghanistan, from a small local market to Wal-Mart, from Nvidia to Silicon Graphics, from the Getty Trust to the Los Angeles Unified School District, from Cisco Systems to Paccar, and from Global Crossing to the 2007-08 financial crisis. Reflecting an astonishing grasp and integration of economics, finance, technology, history, and the brilliance and foibles of the human character, Good Strategy/Bad Strategy stems from Rumelt’s decades of digging beyond the superficial to address hard questions with honesty and integrity.

With contributions from leading brand experts around the world, this valuable resource delineates the case for brands (financial value, social value, etc.) and looks at what makes certain brands great. It covers best practices in branding and also looks at the future of brands in the age of globalization. Although the balance sheet may not even put a value on it, a company’s brand or its portfolio of brands is its most valuable asset. For well-known companies it has been calculated that the brand can account for as much as 80 percent of their market value. This book argues that because of this and because of the power of not-for-profit brands like the Red Cross or Oxfam, all organisations should make the brand their central organising principle, guiding every

decision and every action. As well as making the case for brands and examining the argument of the anti-globalisation movement that brands are bullies which do harm, this second edition of *Brands and Branding* provides an expert review of best practice in branding, covering everything from brand positioning to brand protection, visual and verbal identity and brand communications. Lastly, the third part of the book looks at trends in branding, branding in Asia, especially in China and India, brands in a digital world and the future for brands. Written by 19 experts in the field, *Brands and Branding* sets out to provide a better understanding of the role and importance of brands, as well as a wealth of insights into how one builds and sustains a successful brand.

"A good read for anyone who wants to understand what actually determines whether a developing economy will succeed." —Bill Gates, "Top 5 Books of the Year" An Economist Best Book of the Year from a reporter who has spent two decades in the region, and who the Financial Times said "should be named chief myth-buster for Asian business." In *How Asia Works*, Joe Studwell distills his extensive research into the economies of nine countries—Japan, South Korea, Taiwan, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, and China—into an accessible, readable narrative that debunks Western misconceptions, shows what really happened in Asia and why, and for once makes clear why some countries have boomed while others have languished. Studwell's in-depth analysis focuses on three main areas: land policy, manufacturing, and finance. Land reform has been essential to the success of Asian economies, giving a kick-start to development by utilizing a large workforce and providing capital for growth. With manufacturing, industrial development alone is not sufficient, Studwell argues. Instead, countries need "export discipline," a government that forces companies to compete on the global scale. And in finance, effective regulation is essential for fostering, and sustaining growth. To explore all of these subjects, Studwell journeys far and wide, drawing on fascinating examples from a Philippine sugar baron's stifling of reform to the explosive growth at a Korean steel mill. "Provocative . . . *How Asia Works* is a striking and enlightening book . . . A lively mix of scholarship, reporting and polemic." —The Economist

NEW YORK TIMES BESTSELLER • Now a major motion picture directed by Martin Scorsese and starring Leonardo DiCaprio By day he made thousands of dollars a minute. By night he spent it as fast as he could. From the binge that sank a 170-foot motor yacht and ran up a \$700,000 hotel tab, to the wife and kids waiting at home and the fast-talking, hard-partying young stockbrokers who called him king, here, in Jordan Belfort's own words, is the story of the ill-fated genius they called the Wolf of Wall Street. In the 1990s, Belfort became one of the most infamous kingpins in American finance: a brilliant, conniving stock-chopper who led his merry mob on a wild ride out of Wall Street and into a massive office on Long Island. It's an extraordinary story of greed, power, and excess that no one could invent: the tale of an ordinary guy who went from hustling Italian ices to making hundreds of millions—until it all came crashing down. Praise for *The Wolf of Wall Street* "Raw and frequently hilarious."—The New York Times "A rollicking tale of [Jordan Belfort's] rise to riches as head of the infamous boiler room Stratton Oakmont . . . proof that there are indeed second acts in American lives."—Forbes "A cross between Tom Wolfe's *The Bonfire of the Vanities* and Scorsese's *GoodFellas* . . . From world-renowned author Erich Segal comes a powerful and moving saga of five extraordinary members of the Harvard class of 1958 and the women with whom their lives are intertwined.

Five lives, five love stories: Danny Rossi, the musical prodigy, risks it all for Harvard, even a break with his domineering father. Yet his real problems are too much fame too soon—and too many women. Ted Lambros spends his four years as a commuter, an outsider. He is obsessed by his desire to climb to the top of the Harvard academic ladder, heedless of what it will cost him in personal terms. Jason Gilbert, the Golden Boy—handsome, charismatic, a brilliant athlete—learns at Harvard that he cannot ignore his Jewish background. Only in tragedy will he find his true identity. George Keller, a refugee from Communist Hungary, comes to Harvard with the barest knowledge of English. But with ruthless determination, he masters not only the language but the power structure of his new country. Andrew Eliot is haunted by three centuries of Harvard ancestors who cast giant shadows on his confidence. It is not until the sad and startling events of the reunion that he learns his value as a man. Their explosive story begins in a time of innocence and spans a turbulent quarter century, culminating in their dramatic twenty-five year reunion at which they confront their classmates—and the balance sheet of their own lives. Always at the center; amid the passion, laughter, and glory, stands Harvard—the symbol of who they are and who they will be. They were a generation who made the rules—then broke them—whose glittering successes, heartfelt tragedies, and unbridled ambitions would stun the world. Praise for *The Class* “Erich Segal’s best.”—Pittsburgh Press “First class entertainment.”—Cosmopolitan “An absorbing page-turner.”—Publishers Weekly “A panoramic saga.”—Philadelphia Inquirer
