**Principles and Practices** Basic Books  
A rising young economist at Berkeley makes correlations between success and geography, explaining how such rising centers of innovation as San Francisco, Boston and Austin are likely to offer influential opportunities and shape the

national and global economies in positive or detrimental ways.

### **Economics** PublicAffairs

Now in its fourth edition, Ivan Png's Managerial Economics has been extensively revised with : a completely new introductory chapter emphasizing decision-making and behavioral biases intensive application to current issues including the sub-prime financial crisis and global competition streamlined presentation focusing on the economics

that managers need to know. As always, the text presents the key concepts of micro-economics intuitively, without requiring any sophisticated mathematics. Throughout, it emphasizes actual management application, and links to other functions including marketing and finance. The new fourth edition is updated with fresh up-to-date discussion questions from all over the world and enhanced with detailed instructor supplements. It is an ideal text for any course focusing on the

practical application of micro-economic principles to management. Truly useful economics for managers. An accompanying website, featuring a wealth of supplementary material, is available at <http://www.comp.nus.edu.sg/~ipng/ed4.htm>

*Evolution in Minutes* Routledge

"The Corona crisis and the Need for a Great Reset" is a guide for anyone who wants to understand how COVID-19 disrupted our social and economic systems, and what changes will be needed to create a more inclusive, resilient and sustainable world going forward. Thierry Malleret, founder of the Monthly Barometer, and Klaus Schwab, founder and executive Chairman of the World Economic Forum, explore what the root causes of these crisis were, and why they lead to a need for a Great Reset. Theirs is a worrying, yet hopeful analysis. COVID-19 has created a great disruptive reset of our global social, economic, and political systems. But the power of human beings lies in being foresighted and having the ingenuity, at least to a certain extent, to take their destiny into their hands and to plan for a better future. This is the purpose

of this book: to shake up and to show the deficiencies which were manifest in our global system, even before COVID broke out.

Quercus Publishing

The founders of London's leading think tank challenge readers to look at economic analysis in a different way.

*The Rough Guide to Economics* Luath Press Ltd

#1 New York Times Bestseller

"Significant...The book is both instructive and surprisingly moving." —The New York Times Ray Dalio, one of the world's most successful investors and entrepreneurs, shares the unconventional principles that he's developed, refined, and used over the past forty years to create unique results in both life and business—and which any person or organization can adopt to help achieve their goals. In 1975, Ray Dalio founded an investment firm, Bridgewater Associates, out of his two-bedroom apartment in New York City. Forty years later, Bridgewater has made more money for its clients than any other hedge fund in history and grown into the fifth most important private company in the United States, according to Fortune magazine.

Dalio himself has been named to Time magazine's list of the 100 most influential people in the world. Along the way, Dalio discovered a set of unique principles that have led to Bridgewater's exceptionally effective culture, which he describes as "an idea meritocracy that strives to achieve meaningful work and meaningful relationships through radical transparency." It is these principles, and not anything special about Dalio—who grew up an ordinary kid in a middle-class Long Island neighborhood—that he believes are the reason behind his success. In *Principles*, Dalio shares what he's learned over the course of his remarkable career. He argues that life, management, economics, and investing can all be systemized into rules and understood like machines. The book's hundreds of practical lessons, which are built around his cornerstones of "radical truth" and "radical transparency," include Dalio laying out the most effective ways for individuals and organizations to make decisions, approach challenges, and build strong teams. He also describes the innovative tools the firm uses to bring an idea meritocracy to life, such as creating

“baseball cards” for all employees that distill their strengths and weaknesses, and employing computerized decision-making systems to make believability-weighted decisions. While the book brims with novel ideas for organizations and institutions, Principles also offers a clear, straightforward approach to decision-making that Dalio believes anyone can apply, no matter what they’re seeking to achieve. Here, from a man who has been called both “the Steve Jobs of investing” and “the philosopher king of the financial universe” (CIO magazine), is a rare opportunity to gain proven advice unlike anything you’ll find in the conventional business press.

*200 Key Concepts Explained in an Instant*  
Penguin

Paul Glendinning is Professor of Applied Mathematics at the University of Manchester. He was founding Head of School for Mathematics at the combined University of Manchester and has published over fifty academic articles and an undergraduate textbook on chaos theory. Both simple and accessible, Math in Minutes is a visually led introduction to 200 key mathematical concepts. Each

concept is described by means of an easy-to-understand illustration and a compact, 200-word explanation. Concepts span all of the key areas of mathematics, including Fundamentals of Mathematics, Sets and Numbers, Geometry, Equations, Limits, Functions and Calculus, Vectors and Algebra, Complex Numbers, Combinatorics, Number Theory, and more. From the Trade Paperback edition.

**The Price of Tomorrow** Hachette UK Economics in Minutes condenses key economics concepts into 200 short and easily digested essays. Featuring not only fundamental ideas, such as the role of money and how the stock market works, but also subjects that are increasingly important to us today - unemployment, government debt and corporate tax avoidance, for example - it is the ideal introduction to a complex contemporary field. Key topics are succinctly described and accompanied by illustrations, making them simple to read and easy to remember. This convenient little reference guide will allow readers to understand the theories underpinning a subject that affects our lives on a daily basis. Chapters include: Supply and demand,

Globalization, Market failure, GDP and happiness, Risk and uncertainty, Living standards and productivity, Game theory, Economics and culture.

Ecocide Houghton Mifflin Harcourt Advances in Pacific Basin Business, Economics, and Finance is an annual publication designed to focus on interdisciplinary research in finance, economics, accounting and management among Pacific Rim countries.

### **200 Key Concepts Explained In An Instant** Quercus

A lively, inviting account of the history of economics, told through events from ancient to modern times and the ideas of great thinkers in the field What causes poverty? Are economic crises inevitable under capitalism? Is government intervention in an economy a helpful approach or a disastrous idea? The answers to such basic economic questions matter to everyone, yet the unfamiliar jargon and math of economics can seem daunting. This clear, accessible, and even humorous book is ideal for young readers new to economics and for all readers who seek a better understanding of the full sweep of economic history and ideas.

Economic historian Niall Kishtainy organizes short, chronological chapters that center on big ideas and events. He recounts the contributions of key thinkers including Adam Smith, David Ricardo, Karl Marx, John Maynard Keynes, and others, while examining topics ranging from the invention of money and the rise of agrarianism to the Great Depression, entrepreneurship, environmental destruction, inequality, and behavioral economics. The result is a uniquely enjoyable volume that succeeds in illuminating the economic ideas and forces that shape our world.

#### **The Price of Fish** PublicAffairs

'If you never had the time to plow through dreary Economics textbooks, but still want a flavour of its key concepts, illustrated with examples from daily life, this is the book for you.'-Raghuram Rajan, former Governor, Reserve Bank of India Why doesn't the government simply print more money so that everyone has enough? Who decides that seventy Indian rupees equal one American dollar? How do you figure out what to price a glass of lemonade at the Diwali mela? Are economists really as boring as they look? For answers to these

and other mystifying questions, look no further than this fun book! (Psst! You may even catch your adults sneaking a peek inside!)

#### *The Shortest and Surest Way to Understand Basic Economics* John Wiley & Sons

Principles of Macroeconomics is a lucid and concise introduction to the theoretical and practical aspects of macroeconomics. This revised and updated third edition covers key macroeconomic issues such as national income, investment, inflation, balance of payments, monetary and fiscal policies, economic growth and banking system. This book also explains the role of the government in guiding the economy along the path of stable prices, low unemployment, sustainable growth, and planned development through many India-centric examples. Special attention has been given to macroeconomic management in a country linked to the global economy. This reader-friendly book presents a wide coverage of relevant themes, updated statistics, chapter-end exercises, and summary points modelled on the Indian context. It will serve as an indispensable introductory resource for

students and teachers of macroeconomics. **Economics in Minutes** Oxford University Press

Quantum physics is the most fundamental -- but also the most baffling -- branch of science. Allowing for dead-and-alive cats, teleportation, antimatter, and parallel universes, as well as underpinning all of our digital technology, it's as important as it is mind-bending. This clear and compact book demystifies the strange and beautiful quantum world, and hence the nature of reality itself. Contents include: Schrodinger's cat, inside the atom, the particle zoo, the Higgs boson, Heisenberg's uncertainty principle, God playing dice, relativity, the Big Bang, dark energy and matter, black holes, the fate of the Universe, the Theory of Everything, quantum gravity, string theory, the multiverse, instant communication, quantum computing and cryptography, superconductivity, quantum biology, quantum consciousness, and much more. Written as a series of mini essays with 200 simple diagrams to help understanding, there can be no easier guide to this notoriously confusing subject. At last it's possible for non-specialists to understand

quantum theory and its central role in the birth of the universe and the very existence of life.

**Math in Minutes** Random House Trade Paperbacks

Both simple and accessible, Maths in Minutes is a visually led introduction to 200 key mathematical ideas. Each concept is quick and easy to remember, described by means of an easy-to-understand picture and a maximum 200-word explanation. Concepts span all of the key areas of mathematics, including Fundamentals of Mathematics, Sets and Numbers, Geometry, Equations, Limits, Functions and Calculus, Vectors and Algebra, Complex Numbers, Combinatorics, Number Theory, Metrics and Measures and Topology.

*The New Geography of Jobs* Quercus  
#1 NEW YORK TIMES BESTSELLER • ONE OF TIME MAGAZINE'S 100 BEST YA BOOKS OF ALL TIME The extraordinary, beloved novel about the ability of books to feed the soul even in the darkest of times. When Death has a story to tell, you listen. It is 1939. Nazi Germany. The country is holding its breath. Death has never been busier, and will become busier still. Liesel

Meminger is a foster girl living outside of Munich, who scratches out a meager existence for herself by stealing when she encounters something she can't resist—books. With the help of her accordion-playing foster father, she learns to read and shares her stolen books with her neighbors during bombing raids as well as with the Jewish man hidden in her basement. In superbly crafted writing that burns with intensity, award-winning author Markus Zusak, author of *I Am the Messenger*, has given us one of the most enduring stories of our time. “The kind of book that can be life-changing.” —The New York Times “Deserves a place on the same shelf with *The Diary of a Young Girl* by Anne Frank.” —USA Today DON'T MISS BRIDGE OF CLAY, MARKUS ZUSAK'S FIRST NOVEL SINCE THE BOOK THIEF.

Winners Take All Quercus

Evolution in Minutes is your compact and accessible guide to the central concepts of the science of evolution, revealing how biological populations change over successive generations. Covering the basics of speciation, genesis, and extinction in animals, plants, and humans alike—from the origins and development of

life to artificial selection and evolutionary algorithms--this is the fastest, fullest path to understanding evolution. Contents include fossils, microbes, genes, DNA, natural selection, Darwinism, genetic drift, mutation, gene migration, heredity, adaptation, and variation, as well as key biological concepts necessary to understand the fascinating field of evolution.

*Covid-19: The Great Reset* Rupa Publications

Hard math for elementary school is a math enrichment textbook, providing ideas to provide children with lessons that are harder, deeper, and more fun. It has chapters to supplement most textbook topics as well as chapters on topics, such as making polyhedra out of marshmallows and toothpicks, that make the book more fun and develop higher reasoning skills.

**The Elite Charade of Changing the World** Quercus

We have reached the point of no return. The existential threat of climate change is now a reality. The world has never been more vulnerable. Yet corporations are already planning a life beyond this point. The business models of fossil fuel giants

factor in continued profitability in a scenario of a five-degree increase in global temperature. An increase that will kill millions, if not billions. This is the shocking reality laid bare in a new, hard-hitting book by David Whyte. *Ecocide* makes clear the problem won't be solved by tinkering around the edges, instead it maps out a plan to end the corporation's death-watch over us. This book will reveal how the corporation has risen to this position of near impunity, but also what we need to do to fix it.

Poor Economics Lulu Press, Inc

What happened to the Roman Empire? Why was the Magna Carta so important? What led to the First World War? Why did the USSR collapse? *World History in Minutes* provides succinct answers to these questions - and many more - in 200 simple and accessible essays. From the 100 Years War to the Gulf Wars, and from the wisdom of Aristotle to the Civil Rights movement, this book distils the major events in human history into easily digestible chunks. Each essay is accompanied by an image - or a clear diagram to illustrate complex ideas - and will plug the gaps in your knowledge of the

most important eras, movements and events in the history of humankind. *World History in Minutes* is the perfect introduction to this expansive subject. Contents include: Neanderthals, Babylonians, Attila the Hun, Abyssinian Empire, Magna Carta, Black Death, Inca, Henry VIII Reformation, Ulster Plantations, Rousseau and the Enlightenment, Declaration of Independence, French Revolution, Tonga Civil War, Universal Suffrage, Spanish Influenza, Great Depression, Pearl Harbour, The Space Age, Civil Rights, Environmentalism, Oligarchs and Tiger Economies.

**Billion-Dollar Ball** Knopf Books for Young Readers

The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption,

slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

*Maths in Minutes* Manchester University Press

Perkins, a former chief economist at a Boston strategic-consulting firm, confesses he was an "economic hit man" for 10

years, helping U.S. intelligence agencies and multinationals cajole and blackmail

foreign leaders into serving U.S. foreign

policy and awarding lucrative contracts to American business.
