Learner's Journey 3ring

Technology has invaded
our working and
recreational lives to an
extent that few envisaged
20 or 30 years ago. We'd
be fools to avoid the
developments in personal,
mobile, and wearable
technology. Even if we
tried we'd still have to
deal with other

developments and
distractions in classroom
and learning technology
like smart boards, blogs,
video, games, students-
led learning, virtual
learning environments,
social media, etc. More
than this, however, is how
the advances in
technology, the economic
and physical
miniaturisation of
computing devices, have
impacted education: the

students, the teachers, the classrooms, the spaces, the connections, the aspirations, etc. 'The Really Useful #EdTechBook' is about experiences, reflections, hopes, passions, expectations, and professionalism of those working with, in, and for the use of technology in education. Not only is it an insight into how, or why, we work with these technologies, it's about how we as learning professionals got to where we are and how we go forward with our own

development. In this book respected individuals from different education sectors write about many aspects of learning technology; from Higher Education (Sue Beckingham, Peter Reed, Dr David Walker, Sheila MacNeil, Terese Bird, Wayne Barry, Inge de Waard, and Sharon Flynn), Further Education (Rachel Challen), to Museums (Zak Mensah), workplace learning (Julian Stodd, Julie Wedgwood, and Lesley Price) and primary schools / early years education (Mike

McSharry). With a foreword written by Catherine Cronin, from the National University Ireland, Galway, the breadth and depth of the experiences here are second to none. The knowledge these leading learning practitioners, researchers, and professionals, share, under the same cover, is a unique opportunity for you to read about the variety of approaches to learning technology, the different perspectives on the same technology, and how technology is

impacting our culture and learning infrastructure, from early-age classrooms to leading research Universities and from museums and workplace learning providers. It is about our passion for our work and our desire to make our work better through our own learning and development.

 "I must congratulate you on GLOBISH THE WORLD

OVER. It's a pioneering text of great importance, full of enthralling insights for native and non-native English users alike." -- Robert McCrum, author, The Story of English and Literary Editor, London Observer. Globish, as a concept, takes to task the world hegemony of arrogant English-speakers. Hence the landmark book Don't Speak English - Parlez Globish became a best-seller in French, and other languages, but it never appeared in English.
 GLOBISH THE WORLD

OVER is the first book written in Globish-English. Non-native English speakers from non-Anglophone countries use English better between themselves than with any native English speaker. Globish codifies their very efficient "similar limitations." The word Globish may strike English-speakers as an "odd" way to rename their English. However billions of speakers in Brazil, Russia, India and China will be the new "owners" of what the world is now calling Globish. The

implications are far-reaching. GLOBISH THE WORLD OVER discusses this phenomenon, and demonstrates that Globish - as a deliberate and sufficient subset of English for international communication - is limited more by a person's communication ability than by mere words.

This anthology brings together fiction, poetry, recipes, and memoirs by some of the best Portuguese-Canadian and Portuguese-American writers to narrate the Portuguese Diasporic experience in North America. These works focus on lived experiences, shared spaces and the ethnic identity through which this distinctive culture is lived in the United States of America and Canada, both of which have long been home to significant

and vibrant Portuguese communities that arrived roughly in the same waves of migration. In this book, you will find a range of texts full of passion, wit, and poise, even as they wrestle with a sense of loss about the passing of the torch from generation to generation, the attempts at integration into the mainstream, and the often overlooked third space or otherness often felt by Portuguese-Canadians and Portuguese-Americans. There are also stories

about the power gained from the preservation of cultural practices that promote a strong sense of self and strengthen family and community ties, and also the awareness that success can come from understanding one's legacy. We would like to emphasize that even though this anthology was compiled from the perspective of the Portuguese Diaspora to North America, the result goes beyond that community and reflects larger complexities of articulations in Canadian

and American everyday life and identity that will resonate with people of any ancestry in these countries. Among the many writers included are Katherine Vaz, George Monteiro, Irene Marques, Anthony Barcellos, August Mark Vaz, Millicent Borges Accardi, Sam Pereira, Darrell Kastin and Frank X. Gaspar. Each of them offers a unique view on the heterogeneity, intricateness, and vibrancy of experiences of the Portuguese Diasporas in Canada and the United States.

LOST Lessons was written

by Randy Johnson and David Rutledge. The book has been well received and is reaching varied individuals. Young adults who are dedicated followers of Jesus Christ are learning to see media, Hollywood and even the world from a Christian perspective, while those who aren't necessarily connecting with a church are seeing Jesus in a fresh way. Based on this success, the authors decided to write on Season 2 of LOST, but with a twist: they involved 56 high school juniors and
