A wide range of pests, diseases, and nutrient deficiencies can zap the vitality of any cannabis garden. Inexperienced gardeners often rely on pesticides that are not registered for edibles, as well as other harmful or ineffective techniques that can render plants unusable. This resourceful guide comes to the rescue, showing gardeners how to win back a garden and nurture plants to their full potential, using safe, organic, and integrated pest management techniques. In addition to providing readers with the know-how to get their plants healthy, *Marijuana Pest and Disease Control* highlights design and

garden practices to prevent future infections. Author Ed Rosenthal gears the book to gardeners at every level of experience and in any growing situation from indoor, outdoor, and greenhouse to hydro and terrace gardens. Extensive color photographs and illustration help identify the exact problem.

This Bud's for You presents Rosenthal's next view on the cutting edge of cannabis trends. It's for people who enjoy marijuana -- consuming and growing -- including information about the plant, its effects, new trends and products, and the emerging industry. It details new varieties commercially available with breeders giving their perspective on the hottest new strains and how classic varieties were crossed to create them. These are strains sold at local dispensaries in the form of bud,

edibles, and concentrates. Some stores also sell seeds and clones. Seeds for these strains are available worldwide online. It's also filled with tips and ideas from expert insiders: technical advice from the breeders, ways to judge marijuana and compare strains, and insights on how dispensary buyers make their selections. This *Bud's for You* goes from micro to macro looks at the world's favorite flower, zooming from large-scale commercial cultivation to the vital essences of trichome resin glands. Along the way, it covers product trends and emerging science, from the role of terpenes in creating marijuana's high to the evolution of scientific extraction methods and the revival of artisanal hash-making techniques.

Michael Pollan's *How to Change Your Mind* meets Christopher McDougall's *Born to Run* in this immersive, investigative look at the hidden culture of cannabis use among elite athletes (as well as weekend warriors)--and the surprising emerging science behind the elusive, exhilarating "runner's high" they all seek. Pot makes exercise fun. The link between performance enhancement and

cannabis has been an open secret for many years, so much so that with the wide-sweeping national legalization of cannabis, combining weed and working out has become the hottest new wellness trend. Why, then, is there still a skewed perception around this leafy substance that it only produces the lazy, red-eyed stoner laid out on a couch somewhere, munching on junk food? In fact, scientists have conducted extensive research that uncovers the power of the "runner's high"--the true holy grail of aerobic activity that was long believed to be caused by endorphins. In an extraordinary reversal, scientists believe marijuana may actually be the key to getting more Americans off their phones and on to their feet. In *Runner's High*, seasoned investigative journalist Josiah

Hesse takes readers on a journey through the secret world of stoned athletes, describing astounding, cannabis-inspired physical and mental transformations, just like he experienced. From the economics of the \$20 billion CBD market to the inherent inequalities in the enforcement of marijuana prohibition; from the mind-body connection behind the "runner's high" to the best way to make your own cannabis-infused power bars; Runner's High takes this groundbreaking science out of the lab and onto the trail, court, field, and pitch, fundamentally changing the way we think about exercise, recovery, and cannabis.
