ROWAN BRAXTON

[Critical Inquiry](#) Routledge

The Communication Yearbook annuals originally published between 1977 and 2009 publish diverse, state-of-the-discipline literature reviews that advance knowledge and understanding of communication systems, processes, and impacts across the discipline. Topics dealt with include Communication as Process, Research Methodology in Communication, Communication Effects, Taxonomy of Communication and European Communication Theory, Information Systems Division, Mass Communication Research, Mapping the Domain of Intercultural Communication, Public Relations, Feminist Scholarship, Communication Law and Policy, Visual Communication, Communication and Cross-Sex Friendships Across the Life Cycle, Television Programming and Sex Stereotyping, InterCultural Communication Training, Leadership and Relationships, Media Performance Assessment, Cognitive Approaches to Communication.

[A Critical Inquiry Into the Grounding of the Concept of Distorted Communication in the Context of the Mass Media](#) U of Minnesota Press

This book presents an overview of seventeen forms of inquiry used in curriculum research in education. Conventional disciplinary forms of inquiry, such as philosophical, historical, and scientific, are described, as well as more recently acknowledged forms such as ethnographic, aesthetic, narrative, phenomenological, and hermeneutic. Interdisciplinary forms such as theoretical, normative, critical, deliberative, and action research are also included. These forms of inquiry are distinguished from one another in terms of purposes, types of research questions addressed, and the processes and logic of procedure employed in arriving at knowledge claims.

[Composing Research, Communicating Results](#) Taylor & Francis

This book proposes a critical public relations approach to analyzing crisis communication with Malaysia Airlines flight 370 (MH370) disappearance (2014-2018) as a case study. It examines the discursive process of Malaysia's crisis response and image building, tracing Malaysia Airlines during the immediate response and the Malaysian establishment until the official suspension of the underwater search. The study features a critical discourse analysis of 84 national media texts and 85 response statements, focusing on three aspects: the national media representations of Malaysia's image, the national carrier and the government's rhetorical strategies of delivering stances and actions, and the dynamic process of image reconstruction and national recovery. The present project contributes to the current research area by integrating both linguistic and public relations perspectives, and more importantly, by highlighting the ideological impact instead of merely behavioral effectiveness in modern communication research. Target readers may find their interest in corporate crisis communication, critical inquiry about political public relations, and the MH370 incident in general.

[Handbook of Research in Educational Communications and Technology](#) Springer Nature
 Relating common theoretical models to true-to-life examples from law, ethics, education, and business, Inch and Warnick stress the importance of argumentation in everyday life as they build reader competence and critical awareness. Critical Thinking and Communication encourages readers to develop skills in both constructing and refuting arguments. Through exercises and examples, readers learn how to create individual arguments, extend argument cases, and understand how arguments are designed and how to interpret them. The text allow readers to conceptualize argumentation in the larger framework of verbal and written interaction, from public speaking and debating to interpersonal, intercultural, and small group communication.

[A Critical Public Relations Approach to Crisis Communication and Management](#) Elsevier Health Sciences

A succinct handbook on reading and responding critically to argumentative texts, suitable alike for courses in informal logic and the argumentative/persuasive essay.

[Perspectives on Mass Communication](#) Sage Publications

An analysis of teacher education reforms in Namibia in the post-independence era, from the perspective of government personnel, teacher educators, and teachers themselves. This book examines post-independence teacher education reforms in the southern African country of Namibia from the perspective of various actors in the reform process: Ministry

[Critical Inquiry](#) Teachers College Press

This state-of-the-art volume details the tools for computer conferencing and collaboration, the learning theories grounding their use, and the preliminary results of this merging of theory building with tool use.

[Electronic Collaborators](#) Rowman & Littlefield

The 5th edition of the prestigious AECT Handbook continues previous efforts to reach outside the traditional instructional design and technology community to the learning sciences and computer information systems communities toward developing a conceptualization of the field. However, given the pervasive and increasingly complex role technology now plays in education since the 1st edition of the Handbook in 1996, the editors have reorganized the research chapters in this edition to focus on the learning problems we are trying to solve with educational technologies, rather than to focus on the things we are using to solve those problems. Additionally, for the first time this edition of the Handbook reflects our field's growing understanding of the importance of design scholarship to inform practice by including design case chapters. These changes for this edition of the Handbook are intended to bring educational technology research into the broader framework of educational research by elaborating on the role instructional design and technology plays as a scholarly discipline in addressing education's increasingly complex issues. Provides comprehensive reviews of new developments in educational technology research and design practice. Includes concrete examples to guide future research and practice in the ways emerging technologies can be used to solve educational problems. Contains extensive references furnished to guide readers to the most recent research and design practice in the field of instructional design and technology.

[The Digital Humanist](#) Springer Science & Business Media

This volume presents insights on the challenges of digital communication and participation in agricultural and rural development. The COVID-19 pandemic has revealed that digital technology and mediated participation is more important and essential in managing ongoing communication for development projects than ever before. However, it has also underscored the various challenges and gaps in knowledge with digital participatory practices, including the further exclusion of marginalized groups and those with limited access to digital technology. The book considers how the concept of participation has been transformed by the realities of the pandemic, reflecting on essential principles and practical considerations of communication for development and social change, particularly in the context of global agriculture and food security, the well-being of rural communities, and evolving environmental challenges, such as climate change. In gathering these insights, this volume highlights lessons for the future of participatory development in communication for development and social change processes. This volume will be of great interest to students and scholars of agricultural and rural development, communication for development, digital communication, and sustainable development more broadly.

[Handbook of Research on Service-Learning Initiatives in Teacher Education Programs](#) Open Agenda Publishing

Now more than ever, effective communication skills are key for successful patient care and positive outcomes. Arnold and Boggs's *Interpersonal Relationships: Professional Communication Skills for Canadian Nurses* helps you develop essential skills for communicating effectively with patients,

families, and colleagues in order to achieve treatment goals in health care. Using clear, practical guidelines, it shows how to enhance the nurse-patient relationship through proven communication strategies, as well as principles drawn from nursing, psychology, and related theoretical frameworks. With a uniquely Canadian approach, and a variety of case studies, interactive exercises, and evidence-informed practice studies, this text ensures you learn how to apply theory to real-life practice.

Resources in Education University of Chicago Press

In this accessible introduction to communication activism, organizer Karen Jeffreys and sociologist Charlotte Ryan draw on more than two decades of ongoing collaboration, using the Rhode Island Coalition for the Homeless (RICH) as a case study. The book examines a community with shared values, decision-making, and conflict resolution procedures, tracking its organizing strategy and matched communication plan. The authors first describe a communication campaign during the welfare reform battles (1990–1995) in which they began to practice communication activism. In ongoing work with two organizations over the next two decades, they distill a model of communication activism that draws directly from vibrant traditions of empowerment communication in U.S. social movements and movements from the Global South. *Beyond Prime Time Activism* provides students and researchers with an invaluable look at contemporary activism practices and with practical tools tried and tested in two decades of social movement engagement. This book is ideal for anyone participating in social change movements or studying how they navigate communication and media inequalities.

Introducing Communication Research Springer Nature

In *Communication Yearbook 11* major contributions from leading scholars in a variety of communication fields are presented and then critiqued by other authorities (often representing complementary or competing schools of thought). Topics addressed and commented on include the mass media audience, the theory of mediation, effective policy for health care communication and feminist criticism of television.

Women Educators' Experiences during COVID-19 Frontiers Media SA

This edition of this handbook updates and expands its review of the research, theory, issues and methodology that constitute the field of educational communications and technology. Organized into seven sectors, it profiles and integrates the following elements of this rapidly changing field.

Introducing Communication Research Routledge

Winner of the Science Fiction Research Association Book Award A groundbreaking, alternate history of information technology and information discourses Although the scale of the information economy and the impact of digital media on social life in China today could pale that of any other country, the story of their emergence in the post-Mao sociopolitical environment remains untold. *Information Fantasies* offers a revisionist account of the emergence of the "information society," arguing that it was not determined by the technology of digitization alone but developed out of a set of technological imaginations and practices that arrived alongside postsocialism. Anticipating discussions on information surveillance, data collection, and precarious labor conditions today, Xiao Liu goes far beyond the current scholarship on internet and digital culture in China, questioning the limits of current new-media theory and history, while also salvaging postsocialism from the persistent Cold War structure of knowledge production. Ranging over forgotten science fiction, unjustly neglected films, corporeal practices such as qigong, scientific journals, advertising, and cybernetic theories, *Information Fantasies* constructs an alternate genealogy of digital and information imaginaries—one that will change how we look at the development of the postsocialist world and the emergence of digital technologies.

Arnold and Boggs's Interpersonal Relationships - E-Book Rowman & Littlefield

Women Educators' Experiences During COVID-19: On the Front Lines examines the gendered experiences, challenges, and rapid changes faced by women in higher education during COVID-19. The book's chapters cover lived experiences ranging from graduate students navigating the pandemic to those grappling with balancing motherhood and the academy. Through these diverse perspectives, this edited collection explores the impact of the diversity and nuances of the feminine identity on navigating higher education during an international health crisis. Ultimately, contributors provide recommendations for best practices and suggestions for change for administrators, faculty, and policymakers to dismantle the academy as a male-dominated institution. Scholars of communication, gender studies, and higher education will find this book of particular interest.

The Rhetorical Legacy of Wangari Maathai Springer

Introducing Communication Research: Paths of Inquiry teaches students the basics of communication research in an accessible manner by using interesting real-world examples, engaging application exercises, and up-to-date resources. Best-selling author Donald Treadwell and new co-author Andrea Davis guide readers through the process of conducting communication research and presenting findings for scholarly, professional, news/media, and web audiences. The Fourth Edition continues to emphasize the Internet and social media as topics of, and tools for, communication research, and incorporates new content on online methodologies, qualitative

research, critical methodologies, and ethics.

A Critical Inquiry into Queer Utopias SUNY Press

An up-to-date and comprehensive resource for scholars and students of critical intercultural communication studies In the newly revised second edition of *The Handbook of Critical Intercultural Communication*, a lineup of outstanding critical researchers delivers a one-stop collection of contemporary and relevant readings that define, delineate, and inhabit what it means to 'do critical intercultural communication.' In this handbook, you will uncover the latest research and contributions from leading scholars in the field, covering core theoretical, methodological, and applied works that give shape to the arena of critical intercultural communication studies. The handbook's contents scaffold up from historical revisitings to theorizings to inquiry and methodologies and critical projects and applications. This work invites readers to deeply immerse themselves in and reflect upon the thematic threads shared within and across each chapter. Readers will also find: Newly included instructors' resources, including reading assignments, discussion guides, exercises, and syllabi Current and state-of-the-art essays introducing the book and delineating each section Brand-new sections on critical inquiry practices and methodologies and contemporary critical intercultural projects and topics such as settler colonialism, intersectionalities, queerness, race, identities, critical intercultural pedagogy, migration, ecologies, critical futures, and more Perfect for scholars, researchers, and students of intercultural communication, intercultural studies, critical communication, and critical cultural studies, *The Handbook of Critical Intercultural Communication*, 2nd edition, stands as the premier resource for anyone interested in the dynamic and ever evolving field of study and praxis: critical intercultural communication studies.

Critical Pragmatics John Wiley & Sons

This anthology is a symposium on queer space and queer utopias. Through the presentation of empirical work by contemporary queer theorists this book aims to create a critical dialogue about the emergence of queer spaces and the ways in which they aim to further queer futurity.

Digital Communication for Agricultural and Rural Development SAGE Publications

The development of communication studies has been a lively process of adoption and integration of theoretical constructs from Pragmatism, Critical Theory and Cultural Studies. *Critical Communication Studies* describes the intellectual and professional forces that have shaped research interests and formed alliances in the pursuit of particular goals. Hanno Hardt reflects on the need to come to terms with the role of history in academic work and locates the intellectual history within the context of competing social theories. The book provides a substantive foundation for understanding the field and will be a major text in all courses dealing with communication history and theory.

Critical Communication Studies Routledge

This book offers a critical introduction to the core technologies underlying the Internet from a humanistic perspective. It provides a cultural critique of computing technologies, by exploring the history of computing and examining issues related to writing, representing, archiving and searching. The book raises awareness of, and calls for, the digital humanities to address the challenges posed by the linguistic and cultural divides in computing, the clash between communication and control, and the biases inherent in networked technologies. A common problem with publications in the Digital Humanities is the dominance of the Anglo-American perspective. While seeking to take a broader view, the book attempts to show how cultural bias can become an obstacle to innovation both in the methodology and practice of the Digital Humanities. Its central point is that no technological instrument is culturally unbiased, and that all too often the geography that underlies technology coincides with the social and economic interests of its producers. The alternative proposed in the book is one of a world in which variation, contamination and decentralization are essential instruments for the production and transmission of digital knowledge. It is thus necessary not only to have spaces where DH scholars can interact (such as international conferences, THATCamps, forums and mailing lists), but also a genuine sharing of technological know-how and experience. "This is a truly exceptional work on the subject of the digital....Students and scholars new to the field of digital humanities will find in this book a gentle introduction to the field, which I cannot but think would be good and perhaps even inspirational for them....Its history of the development of machines and programs and communities bent on using computers to advance science and research merely sets the stage for an insightful analysis of the role of the digital in the way both scholars and everyday people communicate and conceive of themselves and "others" in written forms - from treatises to credit card transactions." Peter Shillingsburg *The Digital Humanist* is not simply a translation of the Italian book *L'umanista digitale* (il Mulino 2010), but a new version tailored to an international audience through the improvement and expansion of the sections on social, cultural and ethical problems of the most widely used methodologies, resources and applications. TABLE OF CONTENTS // Preface: Digital Humanities at a Political Turn? by Geoffrey Rockwell / PART I: The Socio-Historical Roots - Chap. 1: Technology and the Humanities: A History of Interaction - Chap. 2: Internet, or The Humanistic Machine / PART II: Theoretical and Practical Dimensions - Chap. 3: Writing and Content Production - Chap. 4: Representing and Archiving - Chap. 5: Searching and Organizing / Conclusions: DH in a Global Perspective
