DEANDRE OCONNOR

L'Informazione bibliografica Taschen

Sebastião Salgado's photographs have been shown around the world. In *From my land to the Planet* the photographer tells us the story of his most famous reportages: from the black and white portraits of unknown men and women, workers or refugees, to the more recent Genesis project, a portrait of the most uncontaminated places of our planet. With a kindness and a disarming simplicity, Salgado rebuilds his path, exposes his beliefs, makes us witnesses of his emotions. In this volume his talent as a storyteller and the authenticity of a man who knows how to combine activism and professionalism, talent and generosity, clearly emerge. The reader will discover fascinating

stories of every corner of the world, both near and remote, from Africa to the Americas, and then again the birth of the Instituto Terra, of the Genesis project, of Magnum Photos and Amazonas Images.

Africa is a source of amazing bio-diversity and home to some of

the planet's most spectacular landscapes. The sights of this awe-inspiring continent are captured with consummate skill and sensitivity by master lensman Michael Poliza. With extensive experience photographing the animals and terrain of Africa, Poliza's viewpoint is shaped by his concern for the fragile ecosystems he chronicles. These images embody the soul of Africa's flora and fauna with a true artist's eye for color and composition. This book will be enjoyed for years to come. Poliza started as a child actor on German TV, then founded several highly successful IT ventures in the US and Germany. His "STARSHIP MILLENNIUM VOYAGE," around the world on a 75 ft expedition yacht, was avidly followed by millions via internet. Poliza now focuses mainly on filming and photography, including work for the Discovery Channel. He spends a great deal of time based in Cape Town, and is a pioneer in the use of digital photography for coffee table books.

This book is a reflection on the subjects and places that made the deepest impression on the author during his years spent in Eastern Africa. His interest and skill in capturing the emotions of wild animals, their resilience and beauty make it unique. The author has sought out the most dramatic weather conditions for his photographs—morning mists, dust storms and heavy rains, or rays of light shining through the clouds—and followed the animals on endless journeys along ancient trails, across dry lakes or raging rivers, documenting their never-ending fight for

survival. He had his camera with him all the time, always hoping for the perfect blend of elements to come together in one image.

Appearing on the world stage with the 2008 Olympic games in Beijing, China has intrigued Westerners since the days of Marco Polo. French journalist Christina Lionnet takes us on an exciting journey through this vast and varied land. With a clear sensibility, Lionnet's photographs offer a painterly exploration of the paradoxes and complexities of the Chinese landscape as well as its soul. Her lens captures a dazzling array of century-spanning architecture, intriguing peoples and age-old customs. The ambiguous beauty of an ancient and enigmatic culture is masterfully visualized.

Nella valle del fiume Omo ai confini dell'Etiopia vivono sedici minoranze etniche che hanno avuto ben scarsi cambiamenti nel corso della loro storia. L'autore ha cercato di non dare solamente un carnet di viaggio, e nemmeno una mera descrizione come negli asettici rapporti etnografici, ma di prestare attenzione alle dinamiche sociali, in una prospettiva diacronica e storica, accennando alle correnti interne a quelle culture e alle incipienti critiche e trasformazioni in atto, e dunque rendendo la dimensione della complessità delle modifiche di mentalità.

From My Land to the Planet teNeues

Inspired by far-away places in Asia, Africa and South America, people create small oases in private homes to remind them of exotic cultures. Thus ethno design has become a new trend in

interior design: tropical wood furniture, bright colors like orange and red, ethno art and accessoires such as african sculptures, were rediscovered and merged with modern interiors. Exotic elements such as buddha statues, palmtrees and animal rugs are blended with modern architecture. Modern Ethno Design presents around 50 outstanding projects inspired by the fusion and powers of pagan rites. An index with contact information is enclosed.

The introduction of the Porsche 901 in 1963 marked a milestone in automotive history. Although the name later had to be changed because Peugeot had patented having a 0 in the middle of car model numbers, the 911 didn't let anything stand in the way of its becoming an iconic sports car. This success story spans all the way from the 901 and the Carrera RS 2.7 (which with its characteristic rear spoiler--the so-called "ducktail"--was the fastest production car of its time) right up to the current generation of the 991. For the 50th birthday of the populous 911 family, the famous automotive photographer Rene Staud, whose *The Mercedes-Benz 300 SL Book* has also been published by teNeues, showcases the most important models--all in his typically radiant and distinctive style.

This collection from Cellina von Mannstein finds the beauty in flawed and funky situations. Her freewheeling images celebrate decadent excess as well as the aesthetics of disorder and confusion. Before taking up fine art and fashion photography, von Mannstein worked in film. Her compositions hold your attention and are compellingly real. For her, telling a story -- not just creating an image -- is what it's all about. These original works

have the atmosphere of dark fairytales with dream-like juxtapositions and hints of seediness.

We bring into full light some excerpts on musical subjects which were until now scattered throughout the most famous scientific texts. The main scientific and musical cultures outside of Europe are also taken into consideration. The first and most important property to underline in the scientific texts examined here is the language they are written in. This means that our multicultural history of the sciences necessarily also becomes a review of the various dominant languages used in the different historical contexts. In this volume, the history of the development of the sciences is told as it happened in real contexts, not in an alienated ideal world.

African American Tarot/ Afroamericano Tarot All'Insegna del Giglio

The culture of two continents blends together in this one-of-a-kind tarot deck-creating a fresh perspective on what it means to be African-American. Publisher Review: Although actually more focused on African myth and lore rather than African American contributions to civilization, this deck is a wonderful introduction to both explorations as well as being close enough to the RWS tradition as to be useful as a divination tool for any Tarot reader. Great for those interested in African culture and pride, as well as for meditation and past life regressions. In-Depth Review: This deck is terrific, a wonderful resource to begin learning about African culture and history. Each card has an image [read more]
