Home | About Us | Products & Services | Contact Us. OCG Headquarters 79-24 71st Ave Glendale, NY 11385 OCG Fiber-optic communication is a method of transmitting information from one place to another by sending pulses of infrared light through an optical fiber. The light is a form of carrier wave that is modulated to carry information. Fiber is preferred over electrical cabling when high bandwidth, long distance, or immunity to electromagnetic interference is required. Fiber-optic communication - Wikipedia The fifth edition of Fiber Optic Communications by Joseph C. Palais marks the book's twentieth anniversary. In the 20 years since the first edition of the book was published, fiber optics systems have become more flexible and less costly and information capacity and transmission length have increased.
