PHI Learning

Pvt. Ltd.
This book
comprises
select papers
from the
International
Conference on
Emerging

Trends in Civil
Engineering
(ICETCE
2018). Latest
research
findings in
different
branches of

civil engineering such as structural engineering, construction materials, geotechnical engineering, water resources engineering, environmental engineering, and transportation infrastructure are covered in this book. The book also gives an overview of emerging topics like smart materials and structures, green building technologies, and intelligent transportation system. The

contents of this book will be beneficial for students, academicians, industrialists and researchers working in the field of civil engineering.

ELECTRICAL DRAWING AND CAD (22033)
Penram International Publishing (India) Pvt. Ltd.

This book shows a vision of the present and future of Industry 4.0 and identifies and examines the most pressing research issue in Industry 4.0.

Containing the contributions of leading researchers and academics, this book includes recent publications in key areas of interest, for example: a review on the Industry 4.0: What is the Industry 4.0, the pillars of Industry 4.0, current and future trends, technologies, taxonomy, and some case studies (A.U.T.O 4.0, stabilization of digitized process). This book also provides an essential tool

in the process of migration to Industry 4.0. The book is suitable as a text for graduate students and professionals in the industrial sector and general engineering areas. The book is organized into two sections: 1. Reviews 2. Case Studies Industry 4.0 is likely to play an important role in the future society. This book is a good reference on Industry 4.0 and includes some case studies. Each

chapter is written by expert researchers in the sector, and the topics are broad; from the concept or definition of Industry 4.0 to a future society 5.0. Power Electronics and Its Applications CRC Press

potential to be significantly more scalable than conventional AI methods. • Includes a collection of case studies with experimentation results to adhere to the practical approaches • Examines challenges in dataset generation, synthetic datasets, analysis, and prediction algorithms in stochastic ways • Discusses methodologies to achieve accurate results by improving the

quality of data
 • Comprises cases in healthcare and agriculture with implementation and impact of quality data in building AI applications
Cognitive Radio
 eBookIt.com Globally considered as one of the key technologies in the field of wireless communications, cognitive radio has the capability to solve the issues related to radio spectrum scarcity with the help of dynamic

spectrum allocation. It discusses topics including software defined radio architecture, linear predictive coding, variance fractal compression, optimal Codec design for mobile communication system, digital modulation techniques, spectrum sensing in cognitive radio networks and orthogonal frequency division multiplexing in depth. The

text is primarily written for senior undergraduate and graduate students, in learning experimental techniques, designing and implementing models in the field wireless communication.

Hindi is the most widely spoken language in the Republic of India, and Hindi speakers can also be found in Mauritius, Fiji

and Trinidad. This comprehensive dictionary featuring over 40,000 modern entries and a useful guide to transliterations is ideal for students or travelers to any of these regions.

Automotive Systems

R R Sheth & Co Pvt Ltd
This manual is specially written for Students who are interested in understanding Structured Query Language and PL-SQL concepts in

the Computer Engineering and Information technology field and wants to gain enhance knowledge about power of SQL Language in Relational Database Management System Development. The manual covers practical point of view in all aspects of SQL and PL/SQL including DDL, DML, DCL sublanguages, also there are practices for Views, Group by, Having Clause. All PL-SQL concepts

like Condition and Loop Structures, Functions and Procedures, Cursor, Triggers, Locks are illustrated using best examples

Fundamentals of Power Electronics
CRC Press

This comprehensive introduction to power semiconductor devices, their characteristics, and their ratings will take you step-by-step through the most important topics in the field. Highly applications-

oriented, this course presents the student with six projects which offer the opportunity to simulate results on a computer using software such as SPICE or PSpice. This course is ideal for engineers, engineering managers, technicians, and anyone with an interest in the theory, analysis, design, or applications of power electronics circuits and systems.

Advanced Java
CRC Press

This book has been written with total focus on meeting the objectives of the subject 'Contracts and Accounts' as given by the syllabus of WBSCTE. The text has been written so as to create interest in the minds of students in learning further.

SCR Manual

CRC Press

I feel elevated in presenting the New edition of this standard treatise. The favourable reception, which the previous edition and

reprints of this book have enjoyed, is a matter of great satisfaction for me. I wish to express my sincere thanks to numerous professors and students for their valuable suggestions and recommending the patronise this standard treatise in the future also.

The Swiss Family Robinson

Technical Publications Automotive Manufacturing Processes discusses basic principles and

operational procedures of automotive manufacturing processes, issues in the automotive industry like material selection, and troubleshooting. Every chapter includes specific learning objectives, multiple-choice questions to test conceptual understanding of the subject and put theory into practice, review questions, solved problems, and unsolved exercises. It

covers important topics including material decision-making processes, surface hardening processes, heat treatment processes, effects of friction and velocity distribution, the metallurgical spectrum of forging, and surface finishing processes. Features: Discusses automotive manufacturing processes in a comprehensive manner with

the help of applications. Provides case studies addressing issues in the automotive industry and manufacturing operations in the production of vehicles. Discussion on material properties while laying emphasis on the materials and processing parameters. Covers applications and case studies of the automotive industry. The text will be useful for senior undergraduates, graduate

students and academic researchers in areas including automobile engineering, industrial and manufacturing engineering and mechanical engineering. INDUSTRIAL ENGINEERING AND QUALITY CONTROL
Course Code 22657 S.
Chand Publishing
This book introduces the principles and practices in automotive systems, including modern automotive systems that incorporate

the latest trends in the automobile industry. The fifteen chapters present new and innovative methods to master the complexities of the vehicle of the future. Topics like vehicle classification, structure and layouts, engines, transmissions, braking, suspension and steering are illustrated with modern concepts, such as battery-electric, hybrid electric and fuel cell vehicles and

vehicle maintenance practices. Each chapter is supported with examples, illustrative figures, multiple-choice questions and review questions. Aimed at senior undergraduate and graduate students in automotive/automobile engineering, mechanical engineering, electronics engineering, this book covers the following: Construction and working

details of all modern as well as fundamental automotive systems Complexities of operation and assembly of various parts of automotive systems in a simplified manner Handling of automotive systems and integration of various components for smooth functioning of the vehicle Modern topics such as battery-electric, hybrid electric and fuel cell vehicles Illustrative

examples, figures, multiple-choice questions and review questions at the end of each chapter
TRAFFIC ENGINEERING
G Delmar Thomson Learning
The book deals with planning of buildings keeping in view good ventilation, thermal comfort, and acoustic requirements apart from satisfying minimum standards and rules and regulations of local

authorities, economy and future expansions are also taken care of in the building planning. Drawings are made to give clear details of the buildings. The book explains detail in making building drawings with the aid of computer. This book covers the requirement of Building Planning and Drawing course of diploma as well as degree courses. The practising engineers will also find it as

an excellent reference book. To understand the commands of AutoCAD and use them, the sequential procedure and steps involved while drawing plan, elevation and section are stored as screen captures and collection of these screen shots are placed in a CD which is enclosed with this book.

Solid Waste Management

Oswal Publishers
This book is a reference guide to explosives for

emergency responders such as firefighters, police officers, and EMS staff as well as security personnel. Through color photographs and short descriptions, the student can identify explosives by general type and learn the appropriate way to treat each of them. Written in a general, non-technical style, the book is a fast and easy guide for those with little or no knowledge of, or experience with,

<p>explosives.(Keywords: Terrorism) <u>Contracts & Accounts (WBSCTE)</u> Institute of Electrical & Electronics Engineers(IEEE) Introduction to Textile Fibres provides necessary information for beginners. In many textile institutions, this book was widely referred by students and staff for teaching diploma and degree courses. In 1989, the book won the coveted "Best</p>	<p>Technical Book in Textile" - Century Mills Award through Textile Association (India). This revised edition of the book offers new topics and updated statistical figures. <u>Automotive Systems</u> I K International Pvt Ltd Advanced Java is a textbook specially designed for undergraduate and post graduate students of Computer Science. It focuses on developing the</p>	<p>applications both at basic and moderate level. This text book is divided into seven units. The first unit introduces Java network programming. In this unit along with the basic concepts of networking, the programming using Sockets, InetAddress, URL and URLConnection class is discussed in a lucid manner. The second unit is based on JDBC programming. In this unit, connecting with the database is</p>
--	--	---

discussed with examples and illustrations. Then next two chapters focuses on server side programming by means of Servlet programming and JSP. In third unit, the illustration of how to create and execute servlets is given. Then the concept of cookies and session management is discussed. In the next subsequent unit the Java Server Pages - its overview and programming is studied. In the last three

units the advanced concepts of Java programming such as JSF, Hibernate and Java Web Framework : Spring is discussed. The contents of this textbook is supported with numerous illustrations, examples, program codes, and screenshots. With its lucid presentation and inclusion of numerous examples the book will be very useful for the readers. Laboratory Manual for Introductory

Electronics Experiments
Oswal Printers & Publishers Pvt Limited Engineering Education has emerged as a fast developing 'discipline' in itself with universities across the world opening up exclusive 'Departments of Engineering Education' which is also impacting the socio-economic system in India. Most of the engineering institutions in India are part of the 'hub-and-spoke' university

education system unique to India. Scientifically developing the 'Outcome-based Curriculum' (OBC) uniformly across India has been a daunting task, due to the dearth of an authentic book on OBC addressing the need of the Indian Engineering Education System. This being the first book of its kind in India and with OBC serving as the 'Constitution' of 'Outcome-based Education'

(OBE), it will go a long way to address this need. The unique feature of this book is that it is replete with examples to explain the various concepts of planning, designing and implementing the OBC in engineering institutions. Different aspects of Outcome-based Teaching Learning (OBTL) and Outcome-based Assessment (OBA) are also discussed vividly. Apart from the

examples weaved into the lucidly written seven chapters, additional examples and important formats are provided in the 'Annexures'; another unique feature of this book. Every engineering UG, PG, or Diploma teacher would be happy to possess a personal copy of this book for 24x7 access which will help to clear their doubts as it arises then and there. TARGET

<p>AUDIENCE • Technical Instruction • Technical Teacher Trainers • Curriculum Specialists/Ins tructional Designers • Education Policy Makers What the reviewers' say "The technical education has to adopt Outcome- Based Curriculum and there was a dire need of authentic literature which would serve as a base document for scientifically developing OBC. The book reflects the</p>	<p>expertise of both the authors who have more than 30 years of experience in industry and academics in designing and implementing different variants of OBC for various technical education programmes. Such a book will serve as a reference for future generations to avoid 're- inventing the wheel again and again." —Dr. M.P. Poonia, Vice- Chairman, AICTE "National</p>	<p>Institute of Technical Teacher Training and Research (NITTTR) Bhopal has been spearheading different forms of OBC for the last five decades in which the authors have contributed substantially. Care has been taken such that this book will not only benefit the Indian engineering education system, but also the engineering teaching fraternity at the international</p>
