Schnaiberg's concept of the treadmill of production is arguably the most visible and enduring theory to emerge in three decades of environmental sociology. Elaborated and tested, it has been found to be an accurate predictor of political-economic changes in the global economy. In the global South, it has figures prominently in the work of structural environmental analysts and has been used by many political-economic movements. Building new extensions and applications of the treadmill theory, this new book shows how and why northern analysts and governments have failed to protect our environment and secure our future. Using an empirically based political-economic perspective, the authors outline the causes of environmental degradation, the limits of environmental protection policies, and the failures of institutional decision-makers to protect human well-being.

Towards an Integrated Theory in Criminology Univ of California Press

This book brings together leading figures in history, sociology, political science, feminism and critical theory to interpret, evaluate, criticize and update Weber's legacy. In a collection of specially commissioned pieces and translated articles the Weberian scholarship recognizes Max Weber as the figure central to contemporary debates on the need for societal rationality, the limits of reason and the place of culture and conduct in the supposedly post-religious age. In Part 1, Wolfgang Mommsen, Wilhelm Hennis, Guenther Roth and Wolfgang Schluchter provide a full and varied account of the theme of rationalization in the world civilizations. In Part 2 Pierre Bourdieu and Barry Hindess critically examine Weber's social action model, and Johannes Weiss and Martin Albrow address the putative 'crisis' of Western rationality. In Part 3 Jeffrey Alexander, Ralph Schroeder, Bryan Turner, Roslyn Bologh and Sam Whimster scrutinize Weber's understanding of modernity with its characteristic plurality of 'gods and demons'; they focus on its implications for individuality and personality, the body and sexuality, feminism and aesthetic modernism. Part 4 turns to politics, law and the state in the contemporary world: Colin Gordon on liberalism, Luciano Cavalli on charismatic politics, Stephen Turner and Regis Factor on decisionism and power and Scott Lash on modernism, substantive rationality and law. This book was first published in 1987.

Sociology for the South National Learning Corporation

An updated edition of a standard in its field that remains relevant more than thirty years after its original publication. Over thirty years ago, sociologist and University of California, Berkeley professor

Arlie Hochschild set off a tidal wave of conversation and controversy with her bestselling book, *The Second Shift*. Hochschild's examination of life in dual-career households finds that, factoring in paid work, child care, and housework, working mothers put in one month of labor more than their spouses do every year. Updated for a workforce that is now half female, this edition cites a range of updated studies and statistics, with an afterword from Hochschild that addresses how far working mothers have come since the book's first publication, and how much farther we all still must go.

Reassembling the Social is a fundamental challenge from one of the world's leading social theorists to how we understand society and the 'social'. Bruno Latour's contention is that the word 'social', as used by Social Scientists, has become laden with assumptions to the point where it has become misnomer. When the adjective is applied to a phenomenon, it is used to indicate a stabilized state of affairs, a bundle of ties that in due course may be used to account for another phenomenon. But Latour also finds the word used as if it described a type of material, in a comparable way to an adjective such as 'wooden' or 'steely'. Rather than simply indicating what is already assembled together, it is now used in a way that makes assumptions about the nature of what is assembled. It has become a word that designates two distinct things: a process of assembling; and a type of material, distinct from others. Latour shows why 'the social' cannot be thought of as a kind of material or domain, and disputes attempts to provide a 'social explanations' of other states of affairs. While these attempts have been productive (and probably necessary) in the past, the very success of the social sciences mean that they are largely no longer so. At the present stage it is no longer possible to inspect the precise constituents entering the social domain. Latour returns to the original meaning of 'the social' to redefine the notion, and allow it to trace connections again. It will then be possible to resume the traditional goal of the social sciences, but using more refined tools. Drawing on his extensive work examining the 'assemblages' of nature, Latour finds it necessary to scrutinize thoroughly the exact content of what is assembled under the umbrella of Society. This approach, a 'sociology of associations', has become known as Actor-Network-Theory, and this book is an essential introduction both for those seeking to understand Actor-Network Theory, or the ideas of one of its most influential proponents.

The McDonaldization of Society Sourcebooks, Inc.

Now in its Eighth Edition, George Ritzer's *McDonaldization of Society* continues to stand as one of the pillars of modern day sociological thought. By linking theory to 21st century culture, this book resonates with students in a way that few other books do, opening their eyes to many current issues, especially in the areas of consumption and globalization. Through vivid, story-telling prose, Ritzer provides an insightful introduction to the ways in which the principles of the fast-food restaurant are coming to dominate sectors of American society as well as the rest of the world. This new edition has been fully updated to include a new focus on McDonaldization of the workforce.

Praxis II Test Review for the Praxis II Subject Assessments Pearson College Division

From the author of *The Presentation of Self in Everyday Life*, Stigma analyzes a person's feelings about himself and his relationship to people whom society calls "normal." Stigma is an illuminating excursion into the situation of persons who are unable to conform to standards that society calls normal. Disqualified from full social acceptance, they are stigmatized individuals. Physically deformed people, ex-mental patients, drug addicts, prostitutes, or those ostracized for other reasons must constantly strive to adjust to their precarious social identities. Their image of themselves must daily confront and be affronted by the image which others reflect back to them. Drawing extensively on autobiographies and case studies, sociologist Erving Goffman analyzes the stigmatized person's

feelings about himself and his relationship to "normals" He explores the variety of strategies stigmatized individuals employ to deal with the rejection of others, and the complex sorts of information about themselves they project. In Stigma the interplay of alternatives the stigmatized individual must face every day is brilliantly examined by one of America's leading social analysts.
