For colleges and universities around the world, Financial Accounting IFRS, 2nd Edition by Jerry J. Weygandt, Paul D. Kimmel, and Donald E. Kieso, is designed to assist students learning accounting topics under the rules of IFRS. The book addresses every accounting topic from the perspective of IFRS and includes examples based on international companies. Following the reputation for accuracy, comprehensiveness, and currency, this highly anticipated new edition retains key features, such as the table of contents, comprehensive problem sets, and accuracy, on which users of Weygandt Financial Accounting IFRS have come to rely. The focus of this text is on international companies, discussing financial accounting principles and procedures within the context of IFRS, and providing end-of-chapter exercises and problems that present students with foreign currency examples such as the yen or euro. Students using WileyPLUS do real accounting, get real results. WileyPLUS is a student-centered learning and assessment online environment, where students complete automatically graded homework, get feedback on their answers, and access learning materials like the eText at the point of learning. Students come to class prepared because the program is a designed to meet the needs of today's

accounting classroom with an innovative question design that facilitates effective learning of accounting concepts, skills, and procedures. WileyPLUS sold separately from text.

Gain a deeper understanding of financial reporting under IFRS through clear explanations and extensive practical examples. IFRS can be a complex topic, and books on the subject often tackle its intricacies through dense explanation across thousands of pages. Others seek to provide an overview of IFRS and these, while useful for the general reader, lack the depth required by practitioners and students. IFRS Essentials strikes a balance between the two extremes, offering concise interpretation of the crucial facts supported by a wealth of examples. Problems and their solutions are demonstrated in a manner which is short, straightforward and simple to understand, avoiding complex language; jargon and redundant detail. This book is suitable for students and lecturers at universities and other educational institutions, auditing and accounting trainees, and employees in the area of accounting and auditing who seek to develop their practical skills and deepen their knowledge of IFRS.

*Intermediate Accounting* John Wiley & Sons

This textbook, originally by D. Annand and H. Dauderis, was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).

*Financial Accounting, 10th Edition* Springer Nature

Financial Accounting and Reporting is the most up to date text on the market. Now fully updated in its fourteenth edition, it includes extensive coverage of International Accounting Standards (IAS) and International Financial Reporting Standards (IFRS). This market-leading text offers students a clear, well-structured and comprehensive treatment of the subject. Supported by illustrations and exercises, the book provides a strong balance of theoretical and conceptual coverage. Students using this book will gain the knowledge and skills to help them apply current standards, and critically appraise the underlying concepts and financial reporting methods.

*Financial Accounting with International Financial Reporting Standards* John Wiley & Sons

Offering both technical and interpretative content, this is the only

truly balanced financial accounting textbook to provide students not only with the 'how' and 'why' of financial information, but also guidance on what this means in practice.

'This book will be welcomed by students and academics alike. The text is easy to read and well laid out, the case studies are very helpful, and it is supplemented by a good range of quality supporting material' Christopher Coles, Department of Accounting and Finance, University of Glasgow 'A hugely enjoyable and informative book with an international focus' Eleimon Gonis, University of the West of England, Bristol  
Financial Accounting is the ideal book for anyone with little prior knowledge or who is new to this subject area. The book retains the clear writing style and unique international focus which led to the success of previous editions. This approach enables the teaching of financial accounting in a way that is not country-specific. This fully updated text uses the International Financial Reporting Standards (IFRS) as its framework to explain key concepts and practices while linking them with contemporary real-life examples from around the world. What's new! Fully updated to reflect the extensive changes that have occurred in the three years since writing the fifth edition; Expanded discussion of accounting by SMEs and partnerships (Chapter 4); New discussion on capital maintenance (Chapter 8); Added material on integrated reporting and sustainability (Chapter 6); Expanded discussion of revenue recognition, including reference to IFRS 15 (Chapter 8). The text is ideal for undergraduates and MBA students worldwide taking a first course in financial accounting. Visit [www.pearsoned.co.uk/alexander](http://www.pearsoned.co.uk/alexander) to find valuable online resources for both students and lecturers, including an instructor's manual and full set of power point slides. David Alexander is Professor Emeritus of Accounting at the University of Birmingham Business School, England. Christopher Nobes is Professor of Accounting at Royal Holloway, University of London, England. He is also Professor at the University of Sydney, and Adjunct Professor at the Norwegian Business School. From 1993 to 2001 he was a member of the board of the International Accounting Standards Committee.

Looking for an introductory text in financial accounting? Then look no further than this book, created by an experienced author team specifically for those with little or no previous knowledge of the subject. With a clear written style this accessible book is unique in teaching financial accounting from a non-country specific perspective, using International Financial Reporting Standards (IFRS) as its framework to explain concepts and standards. Building on the success of the first edition this truly international book continues to draw examples from Europe, the US and beyond, and has been updated to incorporate the extensive changes of the past three years. Key features New! Expanded and amended coverage of group accounting and of

financial analysis. Real-life examples are included from a wide range of countries. Activities and 'Why it Matters' boxes integrated throughout each chapter to challenge students and stimulate further interest. End-of-chapter self-assessment questions and answers. Exercises at the close of each chapter. Includes a glossary of terms used in IFRS (and UK and US) accounting. Ideal for undergraduate and MBA students worldwide, taking a first course in financial accounting. (maybe highlight this or put in a separate box?) "This book is particularly timely. It is written extremely clearly. It is unusual in that it takes as its base the International Accounting Standards, which I firmly believe are going to be the worldwide requirements of the future." Sir David Tweedie, Chairman - International Accounting Standards Boards. "Refreshing in its breadth and comprehensiveness." Dr Aileen Pierce - University College Dublin. David Alexander is Professor of Accounting and Head of the Department of Accounting and Finance at the University of Birmingham Business School, England. Christopher Nobes is PricewaterhouseCooper's Professor of Accounting at the University of Reading, England. From 1993 to 2001 he was a representative on the board of the International Accounting Standards Committee.

While there is growing interest in IFRS within the US, interest outside the US has exploded. Weygandt's fourth edition of Financial Accounting: IFRS highlights the integration of more US GAAP rules, a desired feature as more foreign companies find the United States to be their largest market. The highly anticipated new edition retains each of the key features (e.g. TOC, writing style, pedagogy, robust EOC) on which users of Weygandt Financial have come to rely, while putting the focus on international companies/examples, discussing financial accounting principles and procedures within the context of IFRS, and providing EOC exercises and problems that present students with foreign currency examples instead of solely U.S. dollars.
