Walking Closer with God
Oxford University Press,

Incorporating the thinking, feeling, and behaving dimensions of human experience, the ninth edition of Corey's best-selling text offers an easy-to-understand text that helps students compare and contrast the therapeutic models expressed in counseling theories. Corey introduces students to the major theories (psychoanalytic, Adlerian, existential, person-centered, Gestalt, reality, behavior, cognitive-behavior, family systems, feminist, and postmodern approaches) and demonstrates how each theory can be applied to a single case (Stan). With his trademark style, he shows students how to apply those theories in practice, and helps them learn to integrate the theories into an individualized counseling style. This book is the center of a suite of products that includes a revised student manual, Case Approach to Counseling and

Psychotherapy (2013), The Art of Integrative Counseling (2013) and media resources like the DVDs titled DVD for Theory and Practice of Counseling and Psychotherapy: The Case of Stan and Lecturettes, and DVD for Integrative Counseling: The Case of Ruth and Lecturettes, which features the same videos as the Integrative Counseling CD-ROM redesigned for today's classrooms. In this powerful volume, six qualitative methods are used to analyze a couple therapy with a troubled young couple, illustrating the intricate processes and sub-processes of therapy through client interactions with their therapists and with each other. Increasingly popular for revealing the nuances and complexity of human interactions, qualitative approaches focus on process and discursive methods which can be particularly rewarding in multi-client settings.

Through the examples that make up the text, practitioners and researchers become better acquainted with the power of qualitative perspectives and are encouraged to examine their own views on therapy as they consider these and other concepts: The development of dialogical space in a couple therapy session. Introducing novelties into therapeutic dialogue: the importance of minor shifts of the therapist. Therapists' responses for enhancing change through dialogue: dialogical investigations of change. Fostering dialogue: exploring the therapists' discursive contributions in a couple therapy. Dominant story, power, and positioning. Constructing the moral order of a relationship in couples therapy. Research Perspectives in Couple Therapy: Discursive Qualitative Methods ably demonstrates the balance between therapeutic art and science for family and couples therapists, psychologists, and other mental health professionals in research and practice. Structured, therapist-led approaches to play therapy are becoming increasingly popular due to their time-limited nature and efficacy for such specific disorders as trauma and attachment issues. This is the first book to provide comprehensive coverage of numerous directive play therapy techniques and interventions that are empirically validated and can be adapted for use in clinical, school, group, and family settings. Designed for both students and practitioners, the text addresses the theoretical bases for these approaches and provides in-depth, practical guidance for their use. It examines such diverse approaches as cognitive behavioral, solution focused, sensorimotor, and the use of creative arts in play therapy. Each approach is covered in terms of its theoretical foundation, research basis, specific techniques for practice, and a case example. The text describes how to adapt directive play therapy

techniques for use in various contexts, such as with families, in groups, and in schools.
