Maxwell gives clear and actionable advice on what we can do to improve in each of these areas. From learning to manage your emotions and increase your energy, to conquering

procrastination and becoming more comfortable with taking risks, you will surpass your own expectations to become a better you than you ever thought possible.

### Ultimate Leadership

Thomas Nelson Incorporated The United States is among the wealthiest nations in the world, but it is far from the healthiest. Although life expectancy and survival rates in the United States have improved dramatically over the past century, Americans live shorter lives and experience more injuries and illnesses than people in other high-income countries. The U.S. health disadvantage cannot be attributed solely to the adverse health status of racial or ethnic minorities or poor people: even highly advantaged Americans are in worse health than their counterparts in other, "peer" countries. In light of the new and growing evidence about the U.S. health disadvantage, the National Institutes of Health asked the National Research Council (NRC) and the Institute of Medicine (IOM) to convene a panel of experts to study the issue.

The Panel on Understanding Cross-National Health Differences Among High-Income Countries examined whether the U.S. health disadvantage exists across the life span, considered potential explanations, and assessed the larger implications of the findings. U.S. Health in International Perspective presents detailed evidence on the issue, explores the possible explanations for the shorter and less healthy lives of Americans than those of people in comparable countries, and recommends actions by both government and nongovernment agencies and organizations to address the U.S. health disadvantage.

Leadership

#1 New York Times

bestselling author John C.

Maxwell's latest book will

enhance the lives of

leaders, professionals,

and anyone who wants to

achieve success and

personal growth. We often

treat the word capacity as

if it were a natural law of

limitation. Unfortunately,

most of us are much more

comfortable defining what

we perceive as off limits

rather than what's really

possible. Could it be that

many of us have failed to

expand our potential

because we have allowed

what we perceive as

capacity to define us?

What if our limits are not

really our limits? In his

newest book, John

Maxwell identifies 17 core

capacities. Some of these

are abilities we all already

possess, such as energy,

creativity and leadership.

Others are aspects of our

lives controlled by our

choices, like our attitudes,

character, and

intentionality. Maxwell examines each of these capacities, and provides clear and actionable advice on how you can increase your potential in each. He will guide you on how to identify, grow, and apply your critical capacities. Once you've blown the "cap" off your capacities, you'll find yourself more successful--and fulfilled--in your daily life.

\* Our summary is short, simple and pragmatic. It allows you to have the essential ideas of a big book in less than 30 minutes. By reading this summary, you will learn how to become a leader. You will also learn: that the four character traits of a leader are authenticity, self-control, humility and courage; that there are fifteen "diseases" that can attack a person's character; that there are false excuses for giving up on being a leader; that there are five degrees of leadership; that when everything becomes a priority, there is no priority at all; that too much time and attention should not be given to issues of little importance. John C. Maxwell is an evangelical pastor, author, speaker, and

coach, recognized as one of the world's leading leadership specialists. In 2014, "Business Insider" and "Inc." magazines voted him the most influential expert on leadership issues. He leads organizations such as the John Maxwell Company, the John Maxwell Team, EQUIP and the John Maxwell Leadership Foundation. In this book, he teaches his readers how to develop their leadership skills. Learning that takes place day by day, whether or not one is a "born leader". \*Buy now the summary of this book for the modest price of a cup of coffee! Why do some people achieve great personal success, yet never succeed in building a business or making an impact in their organization? John C. Maxwell knows the answer. "The greatest leadership principle that I have ever learned in over twenty-five years of leadership," says Maxwell, "is that those closest to the leader will determine the success level of that leader." It's not enough for a leader to have vision, energy, drive, and conviction. If you want to

see your dream come to fruition, you must learn how to develop the leaders around you. Whether you're the leader of a non-profit organization, small business, or Fortune 500 company, *Developing the Leaders Around You* can help you to take others to the limits of their potential and your organization to a whole new level.

Your every significant choice -- every important decision you make -- is determined by a force operating deep inside your mind: your perspective on time -- your internal, personal time zone. This is the most influential force in your life, yet you are virtually unaware of it. Once you become aware of your personal time

zone, you can begin to see and manage your life in exciting new ways. In *The Time Paradox*, Drs. Zimbardo and Boyd draw on thirty years of pioneering research to reveal, for the first time, how your individual time perspective shapes your life and is shaped by the world around you. Further, they demonstrate that your and every other individual's time zones interact to create national cultures, economics, and personal destinies. You will discover what time zone you live in through Drs. Zimbardo and Boyd's revolutionary tests. Ask yourself:

- Does the smell of fresh-baked cookies bring you back to your childhood?
- Do you believe that nothing will ever change in your world?
- Do you believe that the present encompasses all and the future and past are mere abstractions?
- Do you wear a watch, balance your checkbook, and make to-do lists -- every day?
- Do you believe that life on earth is merely preparation for life after death?
- Do you ruminate over failed relationships?
- Are you the life of every party -- always late, always laughing, and always broke?

These statements are

representative of the seven most common ways people relate to time, each of which, in its extreme, creates benefits and pitfalls. *The Time Paradox* is a practical plan for optimizing your blend of time perspectives so you get the utmost out of every minute in your personal and professional life as well as a fascinating commentary about the power and paradoxes of time in the modern world. No matter your time perspective, you experience these paradoxes. Only by understanding this new psychological science of time zones will you be able to overcome the mental biases that keep you too attached to the past, too focused on immediate gratification, or unhealthily obsessed with future goals. Time passes no matter what you do -- it's up to you to spend it wisely and enjoy it well. Here's how.
