From a veteran culture writer and modern movie expert, a celebration and analysis of the movies of 1999—"a terrifically fun snapshot of American film culture on the brink of the Millennium....An absolute must for any movie-lover or pop-culture nut" (Gillian Flynn). In 1999, Hollywood as we know it exploded: *Fight Club*. *The Matrix*. *Office Space*. *Election*. *The Blair Witch Project*. *The Sixth Sense*. *Being John Malkovich*. *Star Wars: The Phantom Menace*. *American Beauty*. *The Virgin Suicides*. *Boys Don't Cry*. *The Best Man*. *Three Kings*. *Magnolia*. Those are just some of the landmark titles released in a dizzying movie year, one in which a group of daring filmmakers and performers pushed cinema to new limits—and took audiences along for the ride. Freed from the restraints of budget, technology, or even taste, they produced a slew of classics that took on every topic imaginable, from sex to violence to the end of the world. The result was a highly unruly, deeply influential set of films that would not only change filmmaking, but also give us our first glimpse of the coming twenty-

first century. It was a watershed moment that also produced *The Sopranos*; Apple's AirPort; Wi-Fi; and Netflix's unlimited DVD rentals. "A spirited celebration of the year's movies" (Kirkus Reviews), *Best. Movie. Year. Ever.* is the story of not just how these movies were made, but how they re-made our own vision of the world. It features more than 130 new and exclusive interviews with such directors and actors as Reese Witherspoon, Edward Norton, Steven Soderbergh, Sofia Coppola, David Fincher, Nia Long, Matthew Broderick, Taye Diggs, M. Night Shyamalan, David O. Russell, James Van Der Beek, Kirsten Dunst, the Blair Witch kids, the Office Space dudes, the guy who played Jar-Jar Binks, and dozens more. It's "the complete portrait of what it was like to spend a year inside a movie theater at the best possible moment in time" (Chuck Klosterman).

The Mad Max Effect provides an in-depth analysis of the Mad Max series, and how it began as an inventive concoction of a number of influences from a range of exploitation genres (including the biker movie, the revenge film, and the car chase cinema of the 1970s), to eventually inspiring a fresh cycle of international low budget 'road warrior' movies that appeared on home video in the 1980s. The Mad Max Effect is the first detailed academic study of the most famous and celebrated post-apocalypse film series, and examines how a humble Australian action movie came from the cultural margins of exploitation cinema to have a profound impact on the broader media landscape.

Paul Tremblay's terrifying twist to the home invasion novel—inspiration for the upcoming major motion picture from Universal Pictures "Tremblay's personal best. It's that good." — Stephen King Seven-year-old Wen and her parents, Eric and Andrew, are vacationing at a remote cabin on a quiet New Hampshire lake. Their closest neighbors are more than two miles in either direction along a rutted dirt road. One afternoon, as Wen catches grasshoppers in the front yard, a stranger unexpectedly appears in the driveway. Leonard is the largest man Wen has ever seen, but he is young, friendly, and he wins her over almost instantly. Leonard and Wen talk and play until Leonard abruptly apologizes and tells Wen, "None of what's going to happen is your fault." Three more strangers then arrive at the cabin carrying unidentifiable, menacing objects. As Wen sprints inside to warn her parents, Leonard calls out: "Your dads won't want to let us in, Wen. But they have to. We need your help to save the world." Thus begins an unbearably tense, gripping tale of paranoia, sacrifice, apocalypse, and survival that escalates to a shattering conclusion, one in which the fate of a loving family and quite possibly all of humanity are entwined. The Cabin at the End of the World is a masterpiece of terror and suspense from the fantastically fertile imagination of Paul Tremblay.

The birth and rise of popular Italian cinema since the early 1950s can be attributed purely to necessity. The vast number of genres, sub-genres, currents and crossovers and the way they have overlapped, died out or replaced each other has been an attempt, in postwar years, to contain the invasion of U.S. product while satisfying the demands the American industry had created in Italy. The author explores one of the most multi-faceted and contradictory industries cinema has ever known through the careers of those most closely associated with it. His recorded interviews were conducted with directors and actors both well-known and upcoming.

The Sci-Fi Movie Guide William Morrow

One of Entertainment Weekly's Best Books of 2022! "New York Times journalist Kyle Buchanan details the bonkers construction of director George Miller's long-awaited and often seemingly-doomed fourth Mad Max movie via testimony from the filmmaker, Charlize Theron, Tom Hardy, and a host of others. The result is an epic and - when it comes to the Theron-Hardy on-set relationship - acrimonious tale no less jaw-dropping than the movie itself." -- Entertainment Weekly A full-speed-ahead oral history of the nearly two-decade making of the cultural phenomenon Mad Max: Fury Road—with more than 130 new interviews with key members of the cast and crew, including Charlize Theron, Tom Hardy, and director George Miller, from the pop culture reporter for The New York Times, Kyle Buchanan. It won six Oscars and has been hailed as the greatest action film ever, but it is a miracle Mad Max: Fury Road ever made it to the screen... or that anybody survived the production. The story of this modern classic spanned nearly two decades of wild obstacles as visionary director George Miller tried to mount one of the most difficult shoots in Hollywood history. Production stalled several times, stars Tom Hardy and Charlize Theron clashed repeatedly in the brutal Namib Desert, and Miller's crew engineered death-defying action scenes that were among the most dangerous ever committed to film. Even accomplished Hollywood figures are flummoxed by the accomplishment: As the director Steven Soderbergh has said, "I don't understand how they're not still shooting that film, and I don't understand how hundreds of people aren't dead." Kyle Buchanan takes readers through every step of that moviemaking experience in vivid detail, from Fury Road's unexpected origins through its outlandish casting process to the big-studio battles that nearly mutilated a masterpiece. But he takes the deepest dive in reporting the astonishing facts behind a shoot so unconventional that the film's fantasy world began to bleed into the real lives of its cast and crew. As they fought and endured in a wasteland of their own, the only way forward was to have faith in their director's mad vision. But how could Miller persevere when almost everything seemed to be stacked against him With hundreds of exclusive interviews and details about the making of Fury Road, readers will be left with one undeniable conclusion: There has never been a movie so drenched in sweat, so forged by fire, and so epic in scope.

Darkening the Italian Screen Macmillan

What is the fate of cinema in an age of new technologies, new aesthetic styles, new modes of cultural production and consumption? What becomes of cinema and a century-long history of the moving image when the theatre is outmoded as a social and aesthetic space, as celluloid gives over to digital technology, as the art-house and multiplex are overtaken by a proliferation of home entertainment systems? The Orientation of Future Cinema offers an ambitious and compelling argument for the continued life of cinema as image, narrative and experience. Commencing with Lumière's Arrival of a Train at a Station, Bruce Isaacs confronts the threat of contemporary digital technologies and processes by returning to cinema's complex history as a technological and industrial phenomenon. The technology of moving images has profoundly changed; and yet cinema materialises ever more forcefully in digital capture and augmentation, 3-D perception and affect, High Frame Rate cinema, and the evolution of spectacle as the dominant aesthetic mode in contemporary studio production.

Leonard Maltin's Movie Guide HarperCollins

This book unravels the profound implications of biodiversity offsetting for nature-society relationships and its links to environmental and social inequality. Drawing on people's resistance against its implementation in several urban and rural places across England, it explores how the production of equivalent natures, the core promise of offsetting, reframes socio-natures both discursively and materially transforming places and livelihoods. The book draws on theories and concepts from human geography, political ecology, and Marxist political economy, and aims to shift the trajectory of the current literature on the interplay between offsetting, urbanization and the neoliberal reconstruction of conservation and planning policies in the era following the 2008 financial crash. By shedding light on offsetting's contested geographies, it offers a fundamental retheorization of offsetting capable of demonstrating how offsetting, and more broadly revanchist neoliberal policies, are increasingly used to support capitalist urban growth producing socially, environmentally and geographically uneven outcomes. Nature Swapped and Nature Lost brings forward an understanding of environmental politics as class politics and sees environmental justice as inextricably linked to social justice. It effectively challenges the dystopia of offsetting's ahistorical and asocial non-places and proposes a radically different pathway for gaining social control over the production of nature by linking struggles for the right to the city with struggles for the right to nature for all.

Chick flicks. Brokeback Mountain. Bollywood. Superhero movies. Sophie's Choice. Ben Affleck and Sandra Bullock. Avant-garde musicals... If this sort of stuff is your cup of tea, then this isn't the book for you. Blokey film enthusiast Dave Franklin instead concentrates on the politically incorrect delights of Coffy, Magnum Force and Boogie Nights while paying tribute to the likes of Christopher Walken, Paul Schrader, 70's disaster movies and Brian De Palma. There's even some tongue-in-cheek appreciation of the God-like Steven Seagal. So settle back, forget about identity politics and the prevailing lefty narrative, and immerse yourself in a book that values celluloid entertainment above all else. Or as Rob Reiner says at the start of the immortal Spinal Tap: "Enough of my yakking. Let's boogie."
