Analysing developments in digital technologies and institutional changes, this book provides an overview of the current frenetic state of

transformation within the global automobile industry. An ongoing transition brought about by the relocation of marketing, design and production centres to emerging economies, and experimentation with new mobility systems such as electrical, autonomous vehicles, this process poses the question as to how original equipment manufacturers (OEMs) and newcomers can remain competitive and ensure sustainability. With contributions from specialists in the

automobile sector, this collection examines the shifts in power and geographical location occurring in the industry, and outlines the key role that public policy has in generating innovation in entrepreneurial states. Offering useful insights into the challenges facing emerging economies in their attempts to grow within the automobile industry, this book will provide valuable reading for those researching internationalization and emerging markets, business strategy and

more specifically, the automotive industry.

The articles in this volume present original research on the encoding of meaning in a variety of

constructions and languages. Many of the contributions take the framework of Role and Reference Grammar as a point of reference, either by applying it to the analysis of linguistic data or by discussing, extending, and challenging some of its assumptions. The topics of the articles range from general questions concerning the relation of meaning and its syntactic realization to the study of specific grammatical phenomena in a number of typologically diverse

languages, including Yucatec Maya, Kabardian, Tagalog, Murik-Kopar, Avatime, Whitesands, Tundra Yukaghir, and various Indo-European languages. The articles will be of interest to researchers and advanced students working on the interface between syntax, semantics and pragmatics. This series 'Studies in Language and Cognition' explores issues of mental representation, linguistic structure and representation, and their interplay. The research presented in this series is

grounded in the idea explored in the Collaborative Research Center 'The structure of representations in language, cognition and science' (SFB 991) that there is a universal format for the representation of linguistic and cognitive concepts.

 Magic will make you invincible. If it doesn't kill you first. In a world where magic is punishable by death, brothers Aric and Fadan stumble upon a mysterious, ancient book -

A Manual of Magic. They are faced with a choice: take the book straight to the Emperor or see if one of them has the forbidden magical Talent. A decision that will change their lives, and the Empire itself, forever. The brothers are swept away, sent to opposite ends of the world, one to train as a Dragon Hunter while the other taps into magical powers that could spell his execution. Dark forces are moving in the shadows, and while the nobility whispers of rebellion, an ancient evil,

long thought gone, is about to awaken. Can Aric and Fadan save the Empire? Will they survive to ever see each other again?

 Ce livre propose aux étudiants en première année d'études supérieures près de 250 exercices dans les domaines classiques de l'analyse et de l'algèbre, pour un "entraînement intensif" aux mathématiques. Rédigés

dans un style simple et accessible, les exercices ont été conçus pour faire écho autant que possible à des situations ou problèmes auxquels les étudiants sont quotidiennement confrontés. Regroupés en chapitres et de difficulté croissante, ils sont accompagnés de leur solution. Les exercices types de chaque chapitre bénéficient d'un corrigé détaillé. Chaque chapitre débute, en outre, par un minimum de rappels théoriques (définitions, notations et propriétés

fondamentales).

 Fils du fondateur d'une ligue de chasseurs de trésors, Manix Leroy n'est pas en accord avec le code d'honneur de son père. Plutôt que de rendre toutes les découvertes à des musées de façon anonyme, cet archéologue orgueilleux fait ce qui lui plaît des trésors qu'il trouve. Perdu depuis plus de 300 ans, le Grand diamant Moghol est le nouveau trésor recherché par Leroy. Ce dernier espère vendre la merveille afin de résoudre

les problèmes financiers de la compagnie dont il héritera bientôt. Sans le sou et talonné par des chasseurs de trésors ennemis, Manix verra que cette mission est la plus difficile qu'il aura à compléter... En parallèle, au 17^e siècle, la vie d'une enfant indienne croise celle d'un commerçant européen. Elle seule sait ce qui est advenu du Grand diamant Moghol...
