Humans have the capacity to detect and experience a wide spectrum of emotions in everyday life. However, the ability to identify and interpret those emotions is not a skill commonly held by all individuals, despite the significance of this skill. Promoting Trait Emotional Intelligence in Leadership and Education provides the latest information on enabling educators and leaders across industries to monitor the emotions of others as well as their own in order to interact effectively with others. Focusing on best practices and methods for training those in education and leadership positions, this publication is essential to the research needs of education administrators, professors, managers, and professionals in various disciplines.

Cobbey's Annotated Statutes of Nebraska ... Corwin Press

Peter Caws provides a fresh and often iconoclastic treatment of some of the most vexing problems in the philosophy of science: explanation, induction, causality, evolution, discovery, artificial intelligence, and the social implications of technological rationality. Caws's work has been shaped equally by the insights of Continental philosophy and a concern with scientific practice. In these twenty-eight essays spanning more than a quarter of a century, he ranges from discussions of the work of French philosopher Gaston Bachelard, to relations between science and surrealism, to the concept of intentionality, to the limits of quantitative description. A lively mix of history, theory, speculation, and analysis, Yorick's World presents a

vision of science that includes human history and social life. It will interest professional philosophers and scientists, and at the same time its directness will make it readily accessible to nontechnical readers.

Council of War: A History of the Joint Chiefs of Staff, 1942--1991 follows in the tradition of volumes previously prepared by the joint History Office dealing with JCS involvement in national policy, the Korean War, and the Vietnam War. Adopting a broader view than earlier volumes, it surveys the JCS role and contributions from the early days of World War II through the end of the Cold War. Written from a combination of primary and secondary sources, it is a fresh work of scholarship, looking at the problems of this era and their military implications. The main prism is that of the joint Chiefs of Staff, but in laying out the JCS perspective, it deals also with the wider impact of key decisions and the ensuing policies. The narrative traces the role and influence of the Joint Chiefs of Staff from their creation in 1942 through the end of the Cold War in 1991. It is, first and foremost, a history of events and their impact on national policy. It is also a history of the Joint Chiefs of Staff themselves and their evolving organization, a reflection in many ways of the problems they faced and how they elected to address them. Over the years, the Joint History Office has produced and published numerous detailed monographs on JCS participation in national security policy. There has never been, however, a single-volume narrative summary of the JCS role. This book, written from a combination of primary and secondary sources, seeks to fill that void. Contents: Chapter 1 * THE WAR IN EUROPE * The Origins of Joint Planning * The North Africa Decision and Its Impact * The Second Front Debate and JCS Reorganization * Preparing for Overlord * Wartime Collaboration with the Soviet Union * Chapter 2 * THE ASIA-PACIFIC WAR AND THE BEGINNINGS OF POSTWAR PLANNING * Strategy and Command in the Pacific * The China-Burma-India Theater * Postwar Planning Begins * Ending the War with Japan * Dawn of the Atomic Age * Chapter 3 * PEACETIME CHALLENGES * Defense Policy in Transition * Reorganization and Reform * War Plans, Budgets, and the March Crisis of 1948 * The Defense Budget for FY 1950 * The Strategic Bombing Controversy * Chapter 4 * MILITARIZING THE COLD WAR * Pressures for Change * The H-Bomb Decision and NSC 68 * Onset of the Korean War * The Inch'on Operation * Policy in Flux * Impact of the Chinese Intervention * MacArthur's Dismissal * Europe--First Again * Chapter 5 * EISENHOWER AND THE NEW LOOK * The 1953 Reorganization * Ending the Korean War * A New Strategy for the Cold War * Testing the New Look: Indochina * Confrontation in the Taiwan Strait * The "New Approach" in Europe * NATO's Conventional Posture * Curbing the Arms Race * Chapter 6 * CHANGE AND CONTINUITY * Evolution of the Missile Program * The Gaither Report * The "Missile Gap" and BMD Controversies * Reorganization and Reform, 1958--1960 * Defense of the Middle East * Cuba, Castro, and Communism * Berlin Dangers * Chapter 7 * KENNEDY AND THE CRISIS PRESIDENCY * The Bay of Pigs * Berlin under Siege * Laos * Origins of the Cuban Missile Crisis * Showdown over Cuba * Aftermath: The Nuclear Test Ban * Chapter 8 * THE MCNAMARA ERA * Chapter 9 * VIETNAM: GOING TO WAR * Chapter 10 * VIETNAM: RETREAT AND WITHDRAWAL * Chapter 11 * DETENTE * Chapter 12 * THE SEARCH FOR STRATEGIC STABILITY Chapter 13 * THE RETURN TO CONFRONTATION SALT II * Chapter 14 * THE REAGAN BUILDUP * Chapter 15 * A NEW RAPPROCHEMENT * Chapter 16 * ENDING THE COLD WAR * Chapter 17 * STORM IN THE DESERT * Origins of the Chapter 18 * CONCLUSION * Glossary

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

This book seeks to understand what bring to pass the birth of modern physics by focusing upon the formation of the concept of force. This would be the first book to note the important role magnetism has played in this process. Indeed, the force between celestial bodies, before the introduction of the Isaac Newtonian gravitational force, is first introduced by Johannes Kepler by analogy with the magnetic force. Moreover, this book, by concentrating our attention on the magnetism, fully describes the developments and the recognition of the force concept during the Middle Ages. The detailed description of the Middle Ages and the Renaissance is a strong point of this book. By discussing and emphasizing on the role accomplished by the magnetic force, this book makes clear the connection between the natural magic and the modern experimental physics. This book will open up a new aspect of the birth of modern physics.
