'Language Teacher Education' is an introduction to language teacher training and development for teachers and providers in pre-service and in-service programmes. The text outlines the main theories of human learning and applies them to teacher education. Based on a broadly social constructivist perspective, it suggests a framework for planning pre-service and in-service programmes, and is illustrated both with case studies from a range of training situations around the world and appendices containing teacher education materials. Language Teacher Education is intended to inform readers' practical decisions and to help them build their own theories of teacher learning.

*New Perspectives on Grammar Teaching in Second Language Classrooms* brings together various approaches to the contextualized teaching of grammar and communicative skills as integrated components of second language instruction. Its purpose is to show from both theoretical and practical perspectives that grammar teaching can be made productive and useful in ESL

and EFL classrooms. In this text: \*First-rate scholars approach the teaching of grammar from multiple complementary perspectives, providing an original, comprehensive treatment of the topic. \*Discourse analysis and research data are used to address such pedagogical areas as grammatical and lexical development in speaking, listening, reading, and writing. \*The communicative perspective on ESL and EFL instruction that is presented provides ways for learners to enhance their production skills, whereas the meaning-based grammar instruction can supplement and strengthen current methodology with a communicative focus. This volume is intended as a foundational text for second language grammar pedagogy courses at the advanced undergraduate and master's levels.

*Language Awareness in the Classroom* addresses the central educational question of the impact that explicit language knowledge has on learning and language learning. A substantial Introduction defines the issues and key concepts and relates them to contemporary educational policy and practice in Europe and internationally. The papers are organised into four thematic sections: the extent and nature of language awareness in teacher education; school-based language awareness programmes; tertiary education initiatives and modes of evaluation of language awareness programmes.

*Global Rules, Global Roles* SAGE

This book raises the issue of what a teacher needs to know about English in

order to teach it effectively. It leads teachers to awareness of the language through a wide range of tasks which involve them in analysing English to discover its underlying system.

### **Tasks for Teachers of English**

Springer

This book contains a collection of more than 20 up-to-date overviews of a variety of aspects of language awareness and the role of metalinguistic knowledge in language development and education. The contributions offer a balanced perspective on a range of topics, including first and second language acquisition, classroom talk, language use in the multicultural work place, translation, Esperanto, whole language, historical perspectives from the UK and the Netherlands, critical pedagogy, the education of language teachers, the teaching of grammar, phonology and writing. The book offers a comprehensive perspective on metalinguistic knowledge and processes, and presents a coherent argument for building an element of language awareness into the language curriculum at all educational levels.

*Pedagògiques: Actes* Springer

This book uses an in-depth, phenomenological interview approach to explain the generational characteristics of today's Chinese university youths and the critical dispositions they believe indispensable in acquiring English as an academic language in and outside school settings. By presenting the authentic voices of the recruited participants, the book clarifies how English for academic purposes (EAP), as an emerging global phenomenon and a research-informed practice, enables and empowers them for conscious self-transformation and critical awareness development through

language study. The book also explores issues arising in the fields of general English language teaching as well as traditional and critical EAP, and discusses university English language learners' learning needs and rights. The book further promotes a dynamic and transformative University EAP pedagogy of particularity, practicality, and possibility moving from the oppression of language education to its liberation, and the increasing critical consciousness among the present and future university youths in a time of great social changes. Teachers in Action Cambridge University Press

Teacher Language Awareness (TLA) is an area of increasing interest to those involved in language teacher education. This book provides an introduction to the nature of TLA, assesses its impact upon teaching and its potential impact on learning. The book focuses specifically on grammar. It aims to encourage teachers and others involved in language education to think more deeply about the importance of TLA and to adopt a more principled approach to the planning of those parts of their programmes associated with it.

The Cumulative Book Index Pearson P T R

This book provides an accessible introduction to action research for teachers, by encouraging teachers to adopt a research attitude to their practice and development. It bridges the gap between theoretical and practical teacher training. This versatile resource book contains a range of tasks suitable for many different in-service teacher education and development programmes. The materials are specifically designed to help teachers develop their skills, knowledge and attitudes so they can become more

effective teachers. The book will be of particular interest to teacher trainers in countries which are undergoing educational reform, or where teacher training is being given special priority by the Government and Ministry of Education.

Cumulative Book Index Springer

This collection provides a state-of-the-art survey of key issues and approaches in contemporary second language teaching.

Language Teacher Education OUP Oxford

The Routledge Handbook of English Language Teaching is the definitive reference volume for postgraduate and advanced undergraduate students of Applied Linguistics, ELT/TESOL, and Language Teacher Education, and for ELT professionals engaged in in-service teacher development and/or undertaking academic study. Progressing from 'broader' contextual issues to a 'narrower' focus on classrooms and classroom discourse, the volume's inter-related themes focus on: ELT in the world: contexts and goals planning and organising ELT: curriculum, resources and settings methods and methodology: perspectives and practices second language learning and learners teaching language: knowledge, skills and pedagogy understanding the language classroom. The Handbook's 39 chapters are written by leading figures in ELT from around the world. Mindful of the diverse pedagogical, institutional and social contexts for ELT, they convincingly present the key issues, areas of debate

and dispute, and likely future developments in ELT from an applied linguistics perspective. Throughout the volume, readers are encouraged to develop their own thinking and practice in contextually appropriate ways, assisted by discussion questions and suggestions for further reading that accompany every chapter. The papers included in the volume look at how language awareness affects the outcomes of foreign and second language acquisition in advanced learners. The book focuses on questions such as how much linguistic knowledge is open to the learner's conscious experience, what should and should not be considered the knowledge of language, how language awareness can be enhanced in the classroom, and, most crucially, what effects language awareness has on attained proficiency. Some papers in the volume also address methodological challenges of researching language awareness, such

as the difficulty of defining and measuring awareness with sufficient precision.

An overview of form-focused instruction as an option for second language grammar teaching. It combines theoretical concerns, classroom practices, and teacher education.

Connecting Theory and Practice Springer Science & Business Media

Materials Development in Language Teaching aims to help readers apply current theoretical principles and research findings to the practical realities of developing and exploiting classroom materials. The authors also suggest new ideas and directions in materials development, which readers can pursue for themselves. This book is accessible to readers with little previous experience in the field, and is essential reading for all those involved in developing materials for language teaching. In the second edition of this highly popular title, each chapter has been comprehensively revised and updated to take into account both recent research and the significant technological developments since the first edition was published in 1998. Two new chapters have been added to assess the potential of electronic media for materials development. These chapters include an overview of the technologies available, as well as individual case studies and activities.

*The Cambridge Guide to Pedagogy and Practice in Second Language Teaching* UNAM

This volume explores the defining element in the work of language teacher educators: language itself. The book is in two parts. The first part holds up to scrutiny concepts of language that underlie much practice in language teacher education yet too frequently remain under-examined. These include language as social institution, language as verbal practice, language as reflexive practice, language as school subject and language as medium of language learning. The chapters in the second part are written by language teacher educators working in a range of

institutional contexts and on a variety of types of program including both long and short courses, both pre-service and in-service courses, and teacher education practice focusing variously on metalinguistic awareness for teachers,

language improvement, and classroom communication. The unifying factor is that collectively they illuminate how language teacher educators research their practice and reflect on underlying principles.
