"... a must read for those
wanting to craft a
vocation in finance." --

Adrian Gore, CEO,

Discovery Group; "... no
better book for a student
or practitioner who wants
more than is usually on
offer in finance courses in
our universities." -- Paul
Oslington, Professor of
Economics and Dean of
Business, Alphacrucis
College, Sydney. To
develop a vocation we
ask: what do I want to be
remembered for? This
involves aspiring to

personal integrity and a
life well lived. Those
working in the financial
sector fulfill vocations by
finding ways to serve
social purposes, to
allocate resources
efficiently and to provide
financial security—while
remembering the needy.
This means contributing
to institutions, where
people can flourish
personally and create

appropriate products and services. The ethics of those working on finding their vocation do not flow from rules and obligations, but from a personal commitment to seeking what is good. This life is based on the fundamental personal virtue, integrity. This book is written for those who aspire to the cultivation of the personal virtues of wisdom, self-control, courage, and justice.

 A rare analytical look at the financial crisis using

simple analysis The economic crisis that began in 2008 revealed the numerous problems in our financial system, from the way mortgage loans were produced to the way Wall Street banks leveraged themselves. Curiously enough, however, most of the reasons for the banking collapse are very similar to the reasons that Long-Term Capital Management (LTCM), the largest hedge fund to date, collapsed in 1998. The Crisis of Crowding looks at LTCM in greater detail, with new

information, for a more accurate perspective, examining how the subsequent hedge funds started by Meriwether and former partners were destroyed again by the lapse of judgement in allowing Lehman Brothers to fail. Covering the lessons that were ignored during LTCM's collapse but eventually connected to the financial crisis of 2008, the book presents a series of lessons for hedge funds and financial markets, including touching upon the circle of greed from

homeowners to real estate agents to politicians to Wall Street. Guides the reader through the real story of Long-Term Capital Management with accurate descriptions, previously unpublished data, and interviews Describes the lessons that hedge funds, as well as the market, should have learned from LTCM's collapse Explores how the financial crisis and LTCM are a global phenomena rooted in failures to account for risk in crowded spaces with leverage Explains why

quantitative finance is essential for every financial institution from risk management to valuation modeling to algorithmic trading Is filled with simple quantitative analysis about the financial crisis, from the Quant Crisis of 2007 to the failure of Lehman Brothers to the Flash Crash of 2010 A unique blend of storytelling and sound quantitative analysis, *The Crisis of Crowding* is one of the first books to offer an analytical look at the financial crisis rather than

just an account of what happened. Also included are a layman's guide to the Dodd-Frank rules and what it means for the future, as well as an evaluation of the Fed's reaction to the crisis, QE1, QE2, and QE3. *Reflecting and Transforming in a Self-Discovery Journey* McGraw-Hill Education Sheds light on the most common errors investors make and offers a user-friendly framework to bypass these mistakes by helping to avoid fighting the market,

misunderstanding performance and letting one's emotions cloud the right decision.

Clarifying Our Vocation

McGraw-Hill/Irwin

Protect and grow your finances with help from this definitive and practical guide to behavioral economics—revised and updated to reflect new economic realities. In their fascinating investigation of the ways we handle money, Gary Belsky and

Thomas Gilovich reveal the psychological forces—the patterns of thinking and decision making—behind seemingly irrational behavior. They explain why so many otherwise savvy people make foolish financial choices: why investors are too quick to sell winning stocks and too slow to sell losing shares, why home sellers leave money on the table and home buyers don't get the biggest bang for their buck, why borrowers pay too much credit card interest and savers can't

sock away as much as they'd like, and why so many of us can't control our spending. Focusing on the decisions we make every day, Belsky and Gilovich provide invaluable guidance for avoiding the financial faux pas that can cost thousands of dollars each year. Filled with fresh insight; practical advice; and lively, illustrative anecdotes, this book gives you the tools you need to harness the powerful science of behavioral economics in any financial environment.

From the New York Times bestselling author of *How to Be a Bawse* comes an “insightful and charmingly funny” (Rupi Kaur) primer on learning to come home to your truest and happiest self. “I love Lilly’s honest and helpful advice about achieving happiness.”—Mindy Kaling, #1 New York Times bestselling author of *Why Not Me?* “It’s time to flip right side up. It’s time for this book title to make sense. It’s time to be a triangle.”

Everyone—even world-famous actress, author, and creator Lilly Singh—knows that sometimes life just sucks. In this book, Singh provides a safe space where readers can learn how to create a sense of peace within themselves. Without sugarcoating what it’s like to face adversity—including acknowledging her own intensely personal struggles with identity, success, and self-doubt—Singh teaches readers to “unsubscribe” from cookie-cutter ideals.

With her signature blend of vulnerability, insight, and humor, Singh instructs readers to “be a triangle,” creating a solid foundation for your life, one that can be built upon, but never fundamentally changed or destroyed. As she puts it, we must always find a way to come home to ourselves: “we must create a place, a system of beliefs, a simple set of priorities to come back to should life lead us astray, which it definitely will.” Like a wise, empathetic friend who always keeps

you honest, Singh pushes you to adjust your mindset and change your internal dialogue. The result is a deeply humane, entertaining, and uplifting guide to befriending yourself and becoming a true “miracle for the world.”

The 5 Mistakes Every Investor Makes and How to Avoid Them McGraw-Hill/Glencoe

The New York Times bestselling, groundbreaking investigation of how the global elite's efforts to "change the world"

preserve the status quo and obscure their role in causing the problems they later seek to solve. An essential read for understanding some of the egregious abuses of power that dominate today’s news. Former New York Times columnist Anand Giridharadas takes us into the inner sanctums of a new gilded age, where the rich and powerful fight for equality and justice any way they can--except ways that threaten the social order and their position atop it. We see how they rebrand

themselves as saviors of the poor; how they lavishly reward "thought leaders" who redefine "change" in winner-friendly ways; and how they constantly seek to do more good, but never less harm. We hear the limousine confessions of a celebrated foundation boss; witness an American president hem and haw about his plutocratic benefactors; and attend a cruise-ship conference where entrepreneurs celebrate their own self-interested magnanimity. Giridharadas asks hard

questions: Why, for example, should our gravest problems be solved by the unelected upper crust instead of the public institutions it erodes by lobbying and dodging taxes? He also points toward an answer: Rather than rely on scraps from the winners, we must take on the grueling democratic work of building more robust, egalitarian institutions and truly changing the world. A call to action for elites and everyday citizens alike. *Getting Investing Right*

Knowledge updating is a never-ending process and so should be the revision of an effective textbook.

The book originally written fifty years ago has, during the intervening period, been revised and reprinted several times. The authors have, however, been thinking, for the last few years that the book needed not only a thorough revision but rather a substantial rewriting. They now take great pleasure in presenting to the readers the twelfth, thoroughly revised and enlarged, Golden Jubilee edition of the book. The subject-matter in the entire book

has been re-written in the light of numerous criticisms and suggestions received from the users of the earlier editions in India and abroad. The basis of this revision has been the emergence of new literature on the subject, the constructive feedback from students and teaching fraternity, as well as those changes that have been made in the syllabi and/or the pattern of examination papers of numerous universities.
