"Despite widespread scepticism in receiving societies, migrants often remain loyal to their former homeland and stay active in the politics there. "Beyond Dutch borders" is about such ties. Combining extensive fieldwork with quantitative data, this book compares how transnational political involvement among guest workers from Turkey and post-colonial migrants from Surinam living in the Netherlands has evolved over the past half-century. It looks at Turks seeking to improve their position in Dutch society, Kurds lobbying for equal rights in Turkey and Surinamese hoping to boost development in their country of origin. Sending-state governments, political parties and organisations are shown to be key shapers of transnational migrant politics both in opposition to, and support of, homeland ruling elites. Meanwhile, it becomes clear that migrants' border-crossing loyalties and engagement have not dented their political integration in the receiving societies - quite the opposite. Certainly in this respect, the sceptics have been wrong."

It has been almost twenty years since DSM-III created a major shift in psychiatric classification procedures and in diagnostic and treatment practice by introducing the multi-axial system and, for our patients specifically, the Axis II: Personality Disorders. Researchers and clinicians were forced to focus on many issues related to the field of personality and its disorders. This meant an immense impetus for research, both empirical and theoretical. Many recent developments are described in this book, as reviews or as original articles. This book also covers developments in Europe as well as in North America. Important questions still remain unanswered, such as: What is the relationship between the different clusters: A, B, & C? Are we talking about dimensions, categories, or typologies? What can be done for patients who have more than one personality disorder? Is a prototypical approach required? Consequently, is a multiconceptual approach in treatment and research required? The authors contribute to this discussion and provide guidelines for further thinking in research and treatment planning. For clinicians, it is of major importance to know whether the disorder can be influenced by treatment, and whether permanent change is

really possible. A very important question is whether a person indeed has a personality disorder, and how this diagnosis affects clinical practice.

 This study bridges the gap that exists between studies dedicated to the history of slavery in the Western and Islamic worlds. It sets itself the goal of understanding how slavery persisted and then met its end in the Ottoman Empire. It concentrates on the period between 1800-1909 and examines the policies of the Ottoman state regarding slavery both before and after the reform period known as the Tanzimat. It also looks at the British involvement in the issue.

Inci Bilgin Tekin's study offers a comparative perspective on two very challenging contemporary female playwrights, Liz Lochhead and Cherrie Moraga, and their Scottish and Chicane adaptations of myths—such as the Greek Medea and Oedipus or the Mayan Popul Vuh—which address ethnic, racial, gender, and hierarchical oppression. Her book incorporates postcolonial and feminist readings of Lochhead's and Moraga's plays while it also explores different mythologies on the background. Bilgin Tekin not only introduces an original point of view on Liz Lochhead's and Cherrie Moraga's plays as adaptations or rewrites, but also calls attention to the non-canonized Scottish, Aztec, and Mayan mythologies. Following an innovative approach, she discusses the question in which ways Lochhead's and Moraga's adaptations of myths are challenges to the canon and further suggests a feminist version of Augusto Boal's Theatre of the Oppressed. The study appeals to readers of mythology, drama, and comparative literature. Those interested in postcolonial and feminist theories will also gain valuable new insights.

This book explores how traditional Sunni Muslim conceptions have informed or shaped Islamization strategies in contemporary Turkey. In particular, the author proposes to examine the teaching curriculum of the Ministry of Education, which oversees Turkish public religious education; the activities and teachings of Diyanet, the constitutional organ responsible for managing all religious affairs; and the ideas and activities of three Muslim religious groups currently operating in Turkey. The monograph explains how the interpretation and practice of Islam affects various situations in the Muslim world and analyzes the concept of nature in Islam, which has been an indivisible component of Islamic tradition since the beginning.

The realization of information structural units has been intriguing as information packaging has

reflections in the semantic, pragmatic, syntactic and prosodic domains. This book extends the investigation by bringing data from all these domains and presenting an analysis for the model of grammar. Based on three-way classification for information packaging, semantic investigation presents insights on compositionality and positional restrictions for topic, focus and discourse anaphoric phrases. The prosodic experimental studies reveal how focus shapes prosody and how diverse languages encode such information packaging. Drawing on the findings of experimental studies reflecting the interaction of information structure with quantifier scope, negation and aspectual markers, clause internal functional projections and scope domains are proposed in the syntactic analysis. The analysis offers new perspectives for movement operations, functional categories, phases which are central themes for the Minimalist Program. Building on the investigation of information structure within semantic, prosodic, syntactic perspectives, the book will appeal to researchers working on either of these domains or their interfaces.

'The Delights of Learning Turkish' is a self-study course book that takes the learner from the beginner level to the intermediate level in Turkish. It is designed for English speakers, targeting adult and young adult learners; especially for those planning to settle and live in Turkey or visiting Turkey for business or pleasure. It is a comprehensive, explanatory approach to Turkish language teaching how to construct and use the language both in formal and colloquial forms with dialogues, examples, grammar points, vocabulary and exercises. It shows the grammatical structures in detail with examples, which enables the learners to make their own sentences instead of depending on off-the-shelf phrases. In the book, you can also find general information about the Turkish alphabet and Turkish language as well as notes on Turkish culture in daily life. Covering so many language points, this book is also a grammar reference that targets a wide range of audience including advanced learners. At the end of the book, you will find the keys to the exercises. There are also Turkish - English and English - Turkish glossary sections as well as Turkish proverbs and idioms added to the book with explanations.

Master FPGA digital system design and implementation with Verilog and VHDL This practical guide explores the development and deployment of FPGA-based digital systems using the two most popular hardware description languages, Verilog and VHDL. Written by a pair of digital circuit design experts, the book offers a solid grounding in FPGA principles, practices, and applications and provides an overview of more complex topics. Important concepts are demonstrated through real-world examples, ready-to-run code, and inexpensive start-to-finish projects for both the Basys and Arty boards. Digital System Design with FPGA: Implementation Using Verilog and VHDL covers:

- Field programmable gate array fundamentals
- Basys and Arty FPGA boards
- The Vivado design suite
- Verilog and VHDL
- Data types and operators
- Combinational circuits and circuit blocks
- Data storage elements and sequential circuits
- Soft-core microcontroller and digital interfacing

Elementary Turkish is designed to provide beginning students with sufficient Turkish to meet most of their everyday needs. Once students complete the two volumes, they should be able to speak, understand, read, and write Turkish at the mid-intermediate level. The variety of Turkish presented in this textbook corresponds to standard Turkish, the official language of the Republic of Turkey and the language spoken by educated Turkish speakers. Both volumes can be used in a classroom setting or as self-study aids.

Modern mainstream economics is attracting an increasing number of critics of its high degree of abstraction and lack of relevance to economic reality. Economists are calling for a better reflection of the reality of imperfect information, the role of banks and credit markets, the mechanisms of economic growth, the role of institutions and the possibility that markets may not clear. While it is one thing to find flaws in current mainstream economics, it is another to offer an alternative paradigm which, can explain as much as the old, but can also account for the many 'anomalies'. That is what this book attempts. Since one of the biggest empirical challenges to the 'old' paradigm has been raised by the second largest economy in the world - Japan - this book puts the proposed 'new paradigm' to the severe test of the Japanese macroeconomic reality.
