Whether known as "The Entertainment Capital of the World" or Sin City, Glitter Gulch or even "Lost Wages" Nevada, the dazzling city of Las Vegas has undergone incredible transformation—from ancient watering hole to Mormon fort, from

whistle stop to mob-run profit center—to become the fastest-growing urban community in the nation. Home to nearly 1.5 million residents, a melting pot of races and cultures, this great metropolis boasts a thrilling history of vices and virtues but, above all, a steadfast and uncompromising spirit.

Winner of the Pulitzer Prize "A masterwork . . . the novel astonishes with its inventiveness . . . it is nothing

less than a grand comic fugue.”—The New York Times Book Review A Confederacy of Dunces is an American comic masterpiece. John Kennedy Toole's hero, one Ignatius J. Reilly, is "huge, obese, fractious, fastidious, a latter-day Gargantua, a Don Quixote of the French Quarter. His story bursts with wholly original characters, denizens of New Orleans' lower depths, incredibly true-to-life dialogue, and the zaniest series of high and low comic adventures" (Henry Kisor, Chicago Sun-Times).

When a meteorite lands in Surrey, the locals don't know what to make of it. But

as Martians emerge and begin killing bystanders, it quickly becomes clear—England is under attack. Armed soldiers converge on the scene to ward off the invaders, but meanwhile, more Martian cylinders land on Earth, bringing reinforcements. As war breaks out across England, the locals must fight for their lives, but life on Earth will never be the same. This is an unabridged version of one of the first fictional accounts of extraterrestrial invasion. H. G. Wells's military science fiction novel was first published in book form in 1898, and is considered a classic of English literature.

Understanding the New Global Economy: A European Perspective argues that

globalisation is facing economic and political headwinds. A new global economic geography is emerging, cross-border relationships are changing, and global governance structures must come to terms with a new multipolar world. This book clarifies the fundamental questions and trade-offs in this new global economy, and gives readers the tools to understand contemporary debates. It presents a range of possible policy options, without being prescriptive. Following a modular structure, each chapter takes a similar approach but can also be read as a stand-alone piece. State-of-the-art academic research and historical experiences are weaved throughout the book, and readers are pointed towards relevant sources of information . This

text is an accessible guide to the contemporary world economy, suited to students of international economics, political economy, globalisation, and European studies. It will also be valuable reading for researchers, professionals, and general readers interested in economics, politics, and civil society. Cycle World Magazine Routledge Classical FORTRAN is a college text, self-study guide, and reference about computer programming for numerical calculations. The book features a conversational, classroom-proven style that is easy to read and contains numerous case studies and examples. The author provides practical advice on program design, documentation, and coding style and unusually detailed coverage of floating-point arithmetic. He

thoroughly discusses performance measurement and optimization and introduces parallel processing using MPI, FORTRAN-90, High Performance FORTRAN, and vector processing. The author also gives expert advice on dealing with troublesome legacy codes. Hybrid Diplomacy with NGOs World Scientific

This book represents an ambitious effort to bring leading Yijing scholars together to examine the globalisation and localisation of the 'Book of Changes' from cross-cultural and comparative perspectives. It focuses on how the Yijing has been used to support ideologies, converted into knowledge, and assimilated into global cultures in the modern period, transported from the Sinosphere to British, American and

French cultural traditions, travelling from East Asia to Europe and the United States. The book provides conceptualised narratives and cross-cultural analyses of the global popularisation and local assimilation of the Yijing, highlighting the transformation and application of the Yijing in different cultural traditions, and demonstrating how it acquired different meanings and took on different roles in the context of a global setting. In presenting a novel contribution to understandings of the multifaceted nature of the Yijing, this book is essential reading for scholars and students interested in the 'Classic of Changes'. It is also a useful reference for those studying Chinese culture, Asian philosophy, East Asian studies, and

translation studies.

"An accomplished architect and urbanist goes back to the roots of what makes cities attractive and livable, demonstrating how we can restore function and beauty to our urban spaces for the long term. Nearly everything we treasure in the world's most beautiful cities was built over a century ago. Cities like Prague, Paris, and Lisbon draw millions of visitors from around the world because of their exquisite architecture, walkable neighborhoods, and human scale. Yet a great deal of the knowledge and practice behind successful city planning has been abandoned over the last hundred years—not because of traffic, population growth, or other

practical hurdles, but because of ill-considered theories emerging from Modernism and reactions to it. The errors of urban design over the last century are too great not to question. The solutions being offered today—sustainability, walkability, smart and green technologies—hint at what has been lost and what may be regained, but they remain piecemeal and superficial. In *The Art of Classic Planning*, architect and planner Nir Haim Buras documents and extends the time-tested and holistic practices that held sway before the reign of Modernism. With hundreds of full-color illustrations and photographs that will captivate architects, planners, administrators, and developers, *The Art of Classic Planning* restores and revitalizes the foundations of urban

planning. Inspired by venerable cities like Kyoto, Vienna, and Venice, and by the great successes of LÖEnfantÖs Washington, HaussmannÖs Paris, and BurnhamÖs Chicago, Buras combines theory and a host of examples to arrive at clear guidelines for best practices in classic planning for todayÖs world. The Art of Classic Planning celebrates the enduring principles of urban design and invites us to return to building beautiful cities."

The vitamin D is widely advertised as a solution for a large spectrum of diseases and health issues. Growing number of pharmaceuticals and supplements containing vitamin D, increasing availability of them in pharmacies, stores, online distribution and,

sometimes, an intrusive commercial publicity campaigns have raised great interest, and have triggered reasonable controversies and fears. The self-administration of high doses of vitamin D has also appeared major concern in society. There is an increasing number of dilemmas regarding side effects including nephrocalcinosis, urinary stone disease, drug interactions and other adversity. On the other hand, it is recognized that vitamin D deficiency is a global health problem with potential negative consequences on health, welfare and morbidity during growth and adulthood, and therefore influencing health care services worldwide. According to current published reports, the vitamin D deficiency is regarded a significant risk factor for several

civilization diseases including cancer, cardiovascular diseases, hypertension, autoimmune and metabolic disorders, infectious diseases and many other chronic conditions. Thus, it is essential to discuss vividly, and share scientific reports and evidence demonstrating both the safety issues and the significance of vitamin D for health of children, adolescents, middle-aged men and women, professionally active individuals, and seniors. This eBook is a collection of articles presented at the 3rd International Conference “Vitamin D - Minimum, Maximum, Optimum” (EVIDAS 2017) held in Warsaw (Poland) on September 22–23, 2017. EVIDAS (European Vitamin D Association) is a scientific society focused on vitamin D and its meaning for human health.
