This popular textbook has always enjoyed a deserved reputation for accessibility and thoroughness. Now in its third edition, its contents have been fully updated and restructured to make them even easier to use. Readers will benefit from the coverage of current accounting practices and legislation, in addition to the range of worked examples and self-test activities throughout the book. information's role in making sound business decisions and focuses upon the aspects of accounting practice which are most relevant to the non-specialist manager. It is ideal for first year undergraduates of business studies, higher students and those pursuing professional accountancy qualifications. Comprehensive and flexible exercises, problems, and cases at the end of every chapter allow students to build a knowledge foundation, apply the material covered in the chapter, and develop critical thinking, communication, and interpersonal skills. By placing the more procedural learning objectives at the end of every chapter and listing them as supplemental objectives, instructors can choose how much procedural detail to assign in their course. Chapter 1 is annotated to introduce students to the pedagogy used throughout the text. Student annotations are introduced in the first chapter and appear throughout to help students explore and reinforce concepts. There will be two new video cases in this edition, for a total of five.
